## REMINDERS FOR USING THESE PRODUCTS

Before using these products, be sure to request the delivery specifications.

### SAFETY REMINDERS

Please pay sufficient attention to the warnings for safe designing when using these products.

## **⚠** REMINDERS

The storage period is less than 6 months. Be sure to follow the storage conditions (Temperature: 5 to 40°C, Humidity: 20 to less).	70% RH or
If the storage period elapses, the soldering of the terminal electrodes may deteriorate.	
On not use or store in locations where there are conditions such as gas corrosion (salt, acid, alkali, etc.).	
<ul> <li>Before soldering, be sure to preheat components.</li> <li>The preheating temperature should be set so that the temperature difference between the solder temperature and chip tendoes not exceed 150°C.</li> </ul>	nperature
<ul> <li>Soldering corrections after mounting should be within the range of the conditions determined in the specifications.</li> <li>If overheated, a short circuit, performance deterioration, or lifespan shortening may occur.</li> </ul>	
When embedding a printed circuit board where a chip is mounted to a set, be sure that residual stress is not given to the c the overall distortion of the printed circuit board and partial distortion such as at screw tightening portions.	hip due to
Self heating (temperature increase) occurs when the power is turned ON, so the tolerance should be sufficient for the set t design.	hermal
Carefully lay out the coil for the circuit board design of the non-magnetic shield type.  A malfunction may occur due to magnetic interference.	
Use a wrist band to discharge static electricity in your body through the grounding wire.	
On not expose the products to magnets or magnetic fields.	
On one use for a purpose outside of the contents regulated in the delivery specifications.	
The products listed on this catalog are intended for use in general electronic equipment (AV equipment, telecommunication equipment, home appliances, amusement equipment, computer equipment, personal equipment, office equipment, measure equipment, industrial robots) under a normal operation and use condition.  The products are not designed or warranted to meet the requirements of the applications listed below, whose performance	e and/or
quality require a more stringent level of safety or reliability, or whose failure, malfunction or trouble could cause serious dar society, person or property.	nage to
If you intend to use the products in the applications listed below or if you have special requirements exceeding the range of	r conditions

- (1) Aerospace/Aviation equipment
- (2) Transportation equipment (cars, electric trains, ships, etc.)
- (3) Medical equipment
- (4) Power-generation control equipment

set forth in the each catalog, please contact us.

- (5) Atomic energy-related equipment
- (6) Seabed equipment
- (7) Transportation control equipment

- (8) Public information-processing equipment
- (9) Military equipment
- (10) Electric heating apparatus, burning equipment
- (11) Disaster prevention/crime prevention equipment
- (12) Safety equipment
- (13) Other applications that are not considered general-purpose applications

When designing your equipment even for general-purpose applications, you are kindly requested to take into consideration securing protection circuit/device or providing backup circuits in your equipment.

### EMC Components

## **Common Mode Filters**

## With built-in ESD protection element type

Product compatible with RoHS directive
Halogen-free
Compatible with lead-free solders

# Overview of TCE0806G Type

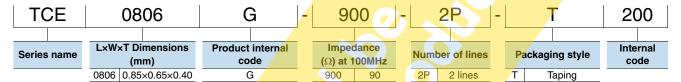

### **FEATURES**

- EMC component with an ESD protective device (ESD suppressor) added to a conventional thin-film common mode filter based on the thin-film processing techniques and material technology cultivated from HDD head manufacturing.
- One component can be used both as a common mode noise countermeasure and for ESD protection.
- The number of parts and mounting area were greatly reduced.

### APPLICATION

Noise countermeasure and ESD protection for high-speed differential interfaces (USB2.0, MIPI, HDMI) for mobile devices and general consumer products such as smart phones, tablets, digital cameras, and portable music players.

#### PART NUMBER CONSTRUCTION

### ■ OPERATING TEMPERATURE RANGE, PACKAGE QUANTITY, PRODUCT WEIGHT

	Temperat	ure range	Package quantity	Individual weight
Type	Operating	Storage		
Туре	temperature	temperature*		
	(°C)	(°C)	(pieces/reel)	(mg)
TCE0806G	-25 to +85	-25 to +85	10,000	1.1

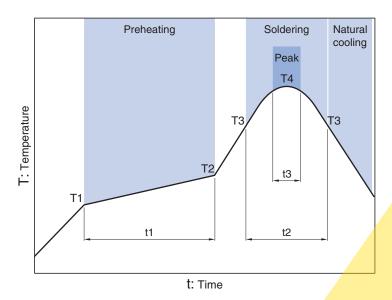

<sup>\*</sup> The Storage temperature range is for after the circuit board is mounted.

OROHS Directive Compliant Product: See the following for more details.https://product.tdk.com/info/en/environment/rohs/index.html

OHalogen-free: Indicates that CI content is less than 900ppm, Br content is less than 900ppm, and that the total CI and Br content is less than 1500ppm.

### ■ RECOMMENDED REFLOW PROFILE

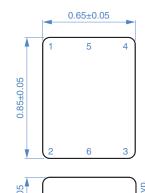

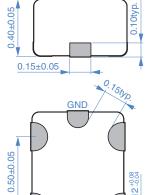

Preheating Soldering		9		Peak	7			
Temp.		Time	Temp.	Time		Temp.	Time	
T1	T2	t1	Т3	t2		T4	t3	
150°C	180°C	60 to 120s	230°C	10 to 30s	7	245°C	5s max.
