## REVISION HISTORY

### 10/13—Rev. E to Rev. F

|                                                                       |            |
|-----------------------------------------------------------------------|------------|
| Changed Open-Drain to Open-Drain with Internal Pull-Up Resistor ..... | Throughout |
| Updated Outline Dimensions .....                                      | 8          |
| Changes to Ordering Guide .....                                       | 9          |

### 8/08—Rev. D to Rev. E

|                                  |   |
|----------------------------------|---|
| Changes to Table 3 .....         | 5 |
| Updated Outline Dimensions ..... | 8 |
| Changes to Ordering Guide .....  | 9 |

### 10/05—Rev. C to Rev. D

|                                  |           |
|----------------------------------|-----------|
| Updated Format .....             | Universal |
| Added Figure 3 .....             | 5         |
| Changes to Table 3 .....         | 5         |
| Updated Outline Dimensions ..... | 8         |
| Edits to Ordering Guide .....    | 9         |

### 9/03—Rev. B to Rev. C.

|                                  |           |
|----------------------------------|-----------|
| Added SC70 .....                 | Universal |
| Edits to Specifications .....    | 2         |
| Edits to Ordering Guide .....    | 4         |
| Updated Outline Dimensions ..... | 7         |

|                                              |   |
|----------------------------------------------|---|
| Typical Performance Characteristics .....    | 6 |
| Theory of Operation .....                    | 7 |
| Timing Diagrams for All Devices .....        | 7 |
| ADM1813 and ADM1818 .....                    | 7 |
| ADM1810, ADM1812, ADM1815, and ADM1817 ..... | 7 |
| ADM1811 and ADM1816 .....                    | 7 |
| Outline Dimensions .....                     | 8 |
| Ordering Guide .....                         | 9 |

### 2/03—Rev. A to Rev. B.

|                                                               |   |
|---------------------------------------------------------------|---|
| Edits to Features .....                                       | 1 |
| Deleted Table I .....                                         | 1 |
| Edits to Specifications .....                                 | 2 |
| Edits to Absolute Maximum Ratings .....                       | 3 |
| Edits to Ordering Guide .....                                 | 3 |
| Added Typical Performance Characteristics .....               | 4 |
| Edits to ADM1813 AND ADM1818 section .....                    | 5 |
| Edits to ADM1810, ADM1812, ADM1815, and ADM1817 Section ..... | 5 |
| Edits to ADM1811 and ADM1816 Section .....                    | 5 |
| Updated Outline Dimensions .....                              | 6 |

### 3/02—Rev. 0 to Rev. A.

|                                                           |   |
|-----------------------------------------------------------|---|
| Addition of Table .....                                   | 1 |
| Edits to Ordering Guide .....                             | 3 |
| Addition of New Text to ADM1813 and ADM1818 Section ..... | 4 |

### 4/99—Revision 0: Initial Version

## SPECIFICATIONS

$V_{CC}$  = full operating range,  $T_A$  =  $-40^{\circ}\text{C}$  to  $+105^{\circ}\text{C}$ , unless otherwise noted.

Table 1.

| Parameter                                             | Min            | Typ            | Max  | Unit          | Comments                                                                                                                |
|-------------------------------------------------------|----------------|----------------|------|---------------|-------------------------------------------------------------------------------------------------------------------------|
| SUPPLY                                                |                |                |      |               |                                                                                                                         |
| Voltage                                               | 1              |                | 5.5  | V             | $T_A = 0^{\circ}\text{C}$ to $105^{\circ}\text{C}$                                                                      |

## ABSOLUTE MAXIMUM RATINGS

$T_A = 25^\circ\text{C}$ , unless otherwise noted.

Table 2.

| Parameter                               | Rating           |
|-----------------------------------------|------------------|
| $V_{CC}$                                | −0.3 V to +6.0 V |
| Input Current                           | 20 mA            |
| Operating Temperature Range             | −40°C to +105°C  |
| Storage Temperature Range               | −65°C to +150°C  |
| $\theta_{JA}$ Thermal Impedance, SOT-23 | 270°C/W          |
| $\theta_{JA}$ Thermal Impedance, SC70   | 146°C/W          |
| Lead Temperature (Soldering, 10 sec)    | 300°C            |
| Vapor Phase (60 sec)                    | 215°C            |
| Infrared (15 sec)                       | 220°C            |

Stresses above those listed under Absolute Maximum Ratings may cause permanent damage to the device. This is a stress rating only; functional operation of the device at these or any other conditions above those indicated in the operational section of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

### ESD CAUTION

**ESD (electrostatic discharge) sensitive device.** Charged devices and circuit boards can discharge without detection. Although this product features patented or proprietary protection circuitry, damage may occur on devices subjected to high energy ESD. Therefore, proper ESD precautions should be taken to avoid performance degradation or loss of functionality.

## PIN CONFIGURATIONS AND FUNCTION DESCRIPTIONS

Figure 6. Power-Up Reset Timeout vs. Temperature

## THEORY OF OPERATION

### TIMING DIAGRAMS FOR ALL DEVICES

The following two timing diagrams are valid for [ADM1810](#), [ADM1811](#), [ADM1812](#), [ADM1813](#), [ADM1815](#), [ADM1816](#), [ADM1817](#), and [ADM1818](#).

Figure 9. Power-Down Timing Diagram

Figure 10. Power-Up Timing Diagram

### ADM1813 AND ADM1818

The [ADM1813](#) and [ADM1818](#) are low cost voltage monitoring devices featuring an open-drain with internal pull-up resistor output and optional push-button reset function.

Figure 11. [ADM1813/ADM1818](#) Typical Application

An optional push-button reset switch can be connected between  $\overline{\text{RST}}$  and ground. Pressing this switch pulls the reset output low. If the push-button reset button pulls the  $\overline{\text{RST}}$  output low for a period greater than 1  $\mu\text{s}$  when the reset button releases the  $\overline{\text{RST}}$  line to float high, then the  $\overline{\text{RST}}$  line stays low for another 150 ms typical.

Figure 12. Push-Button Reset Timing Diagram

The [ADM1818](#) range has 2.88 V and 2.55 V (typical) trip point options that allow the user to monitor 3.3 V and 3 V supplies. For 5 V monitoring requirements, the [ADM1813](#) range has 4.62 V and 4.35 V (typical) trip point options.

### ADM1810, ADM1812, ADM1815, AND ADM1817

The [ADM1812](#) is a 5 V supply monitor with an active high push-pull output and trip point options of 4.62 V and 4.35 V typical. The [ADM1810](#) is similar to the [ADM1812](#), except that the [ADM1810](#) has an active low push-pull output stage. The [ADM1817](#) is suitable for monitoring 3.3 V, 3 V, and 2.5 V supplies, with an active high push-pull output and trip point options of 3.06 V, 2.88 V, 2.55 V, 2.31 V, and 2.18 V typical. The [ADM1815](#) is similar to the [ADM1817](#), except that the [ADM1815](#) has an active low push-pull output stage.

The [ADM1810/ADM1812/ADM1815/ADM1817](#) can connect directly to most microprocessor reset inputs without the need for external components.

Figure 13. [ADM1810/ADM1812/ADM1815/ADM1817](#) Typical Application

### ADM1811 AND ADM1816

The [ADM1811](#) is a 5 V supply monitor with an active low open-drain with internal pull-up resistor output and trip point options of 4.62 V and 4.35 V typical. The [ADM1816](#) also has an active low open-drain with internal pull-up resistor output but is suitable for monitoring lower voltage supplies of 3.3 V, 3 V, and 2.5 V.

Figure 14. [ADM1811/ADM1816](#) Typical Application
