AMP MCP Interconnection System Contact Systems

Section Catalog 1307998-2 Revised 12-2009 Main Catalog 1654400-1 Chapter 3 – Issued 3-2010

Introduction

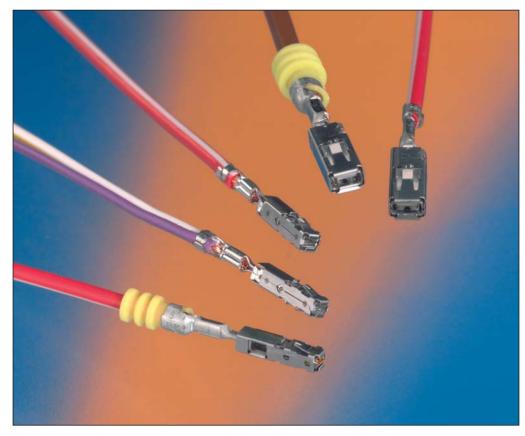

The AMP MCP Contact System is mainly used in the automotive industry. Each contact consists of a flat receptacle, which mates with a flat tab. Every contact has got a steel spring and a copper alloy body.

The two-piece contact design means that the electrical and mechanical properties are separated. One end of the contact body is crimped to wire and the other end mates with the matching tab. The closed spring has got several functions and also different advantages for the complete contact system.

- Protection of the contact springs
- No over elongation of the contact springs possible under normal circumstances
- No possibility to connect from the rear side
- Protection against mechanical damage
- Good guiding in the cavity
- Secondary locking possible (from 4 directions)
- Assembly into housing fully-automatically

In addition there are usually two lances on the steel to spring. These serve to lock the contact securely in the housing.

The Main Advantages of the Body are:

- Several contact points
- Large range of wire sizes (from 0.2 mm² at AMP MCP 1.5K up to 16.0 mm² at AMP MCP 9.5)
- Base material with very high current capability
- High vibrational load

Tabs and receptacles can be applied in both sealed and unsealed connectors.

AMP MCP contacts can be fast and economically arranged to the lead using Tyco Electronics application tooling. Receptacle Contacts (for 0.6 mm Tab Thickness)

Technical Features

Contact Material:

CuNiSi

Top Spring: Stainless Steel

Contact Finish:

Tin plated, selective silver plated, selective gold plated

Wire Size Range:

0.20-0.35 mm², 0.5-1.0 mm², >1.0-1.5 mm² (FLR Cable)

Current Carrying Capacity:

up to 20 Ampere

(at 20 °C ambient temperature)

Temperature Range:

-40 °C ... +130 °C (tin plated) -40 °C ... +140 °C (silver plated) -40 °C ... +150 °C (gold plated)

Modular Dimensions (Centerline):

Introduction

The AMP MCP Connector System offers receptacle and tab housings with capability for waterproofing and resistance to conditions of extreme vibration.

The system is designed for electronic and electrical applications in motor vehicles, where vibrations and mechanical stress, in the long term, can affect the quality on the contact system.

AMP MCP Connectors

- High reliability status supported for long term use
- High vibration level supported
- Perfect design to avoid quality problems, reduce manufacturing and service cost
- Integrated secondary locking device delivered in pre-locked position
- Wire-to-wire sealed and unsealed connectors (SWS)
- Wire-to-board sealed and unsealed connectors (SWS)
- Polarisation, several keyings
- Locking mechanism for smaller connectors/mating aid for higher numbers of ways
