

DESCRIPTION

As technology changes and adapts, so does Adafruit! Rather than the regular USB A, this cable has **USB C to Micro B** plugs!

USB C is the latest industry-standard connector for transmitting data *and* power. Like Lightning and MagSafe cables, USB C has no up or down orientation. And who among us has inserted USB correctly the first time? Works great with any computer that has a USB C port, and will let you attach any of our dev boards with classic Micro B connectors (which is, like, 95% of them)

This cable is about 3 feet long (just a little less than 1 meter), so you get just the right amount of length for your project. [We also have a 1 foot long cable.](#)

TECHNICAL DETAILS

- Length: 3ft / 0.9m
- Diameter: 3.5mm

Product Weight: 20.0g / 0.7oz
