

Pin Descriptions

Package Type: TO92S (Type A)

| Pin Number | Pin Name | Description |
|------------|----------|------------------|
| 1 | VCC | Power supply pin |
| 2 | GND | Ground pin |
| 3 | OUT | Output pin |

Package Type: SC59

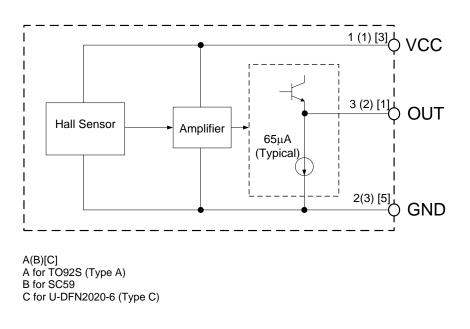

| Pin Number | Pin Name | Description |
|------------|----------|------------------|
| 1 | VCC | Power supply pin |
| 2 | OUT | Output pin |
| 3 | GND | Ground pin |

Package Type: U-DFN2020-6 (Type C)

| Pin Number | Pin Name | Description |
|------------|----------|---|
| 1 | OUT | Output pin |
| 2 | NC | No connection (Note 4) |
| 3 | VCC | Power supply pin |
| 4 | NC | No connection (Note 4) |
| 5 | GND | Ground pin |
| 6 | NC | No connection (Note 4) |
| Pad | Pad | Center exposed pad is internally connected to GND. It can be connected to GND or left open circuit on the PCB. (Note 5) |

Notes: 4. NC is "No Connection" pin and is not connected internally. This pin can be left open or tied to ground. 5. PAD is the bottom side exposed pad.

Functional Block Diagram

Absolute Maximum Ratings (Note 6)

| Symbol | Parameter | Rating | | Unit |
|----------------------|------------------------------|----------------------|-------------|------|
| V _{CC} | Supply Voltage | 10 | 10 | |
| V _{CC_INST} | Instantaneous Supply Voltage | 50 | | V |
| | Power Dissipation | TO92S (Type A) | 400 | |
| PD | | SC59 | 230 | mW |
| | | U-DFN2020-6 (Type C) | 230 | |
| T _A | Ambient Temperature | -40 to +125 | -40 to +125 | |
| T _{STG} | Storage Temperature | -50 to +150 | -50 to +150 | |
| _ | ESD (Human Body Model) | 6000 | 6000 | |
| _ | ESD (Machine Model) | 600 | | V |

Notes: 6. Stresses greater than those listed under *Absolute Maximum Ratings* can cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under *Recommended Operating Conditions* is not implied. Exposure to *Absolute Maximum Ratings* for extended periods can affect device reliability.

Recommended Operating Conditions (@TA = +25°C)

| Symbol | Parameter | Min | Max | Unit |
|-----------------|-----------------------|-----|------|------|
| V _{CC} | Supply Voltage | 3 | 8 | V |
| T _{OP} | Operating Temperature | -40 | +105 | °C |

Electrical Characteristics (@V_{CC} = 5V, T_A = +25°C, unless otherwise specified.)

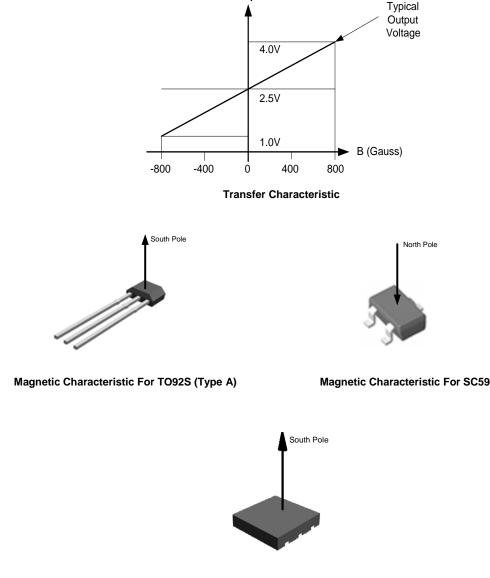

| Symbol | Parameters | Conditions | Min | Тур | Max | Unit |
|--------------------|----------------------------|-------------------------|-------------------------------|-------------------------------|------|----------|
| Icc | Supply Current | — | 2 | 3 | 4 | mA |
| V _{NULL} | Quiescent Output Voltage | B = 0 (Gauss) | 2.25 | 2.5 | 2.75 | V |
| V _{SEN} | Output Voltage Sensitivity | B = 0 to ±600 (Gauss) | 1.7 | 2.1 | 2.5 | mV/Gauss |
| V _{OUT_S} | Output Voltage Span | — | 1.0 to (V _{CC} -1.0) | 0.8 to (V _{CC} -0.8) | _ | V |
| R _{OUT} | Output Resistor | — | — | 60 | 120 | Ω |
| В | Linear Magnetic Range | — | ±500 | ±800 | _ | Gauss |
| _ | Linearity of Span | — | — | 0.7 | _ | % |
| — | Output Noise | Bandwidth=10Hz to 10kHz | — | 90 | _ | μV |

Transferring Characteristics (@V_{CC} = 5V)

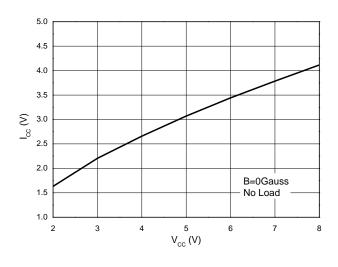

When there is no external magnetic field (B=0Gauss), the quiescent output voltage is one-half the supply voltage in general.

For TO92S (Type A) and U-DFN2020-6 (Type C) packages, if a South magnetic pole approaches the part marking surface (the side with part marking ID) of the Hall effect sensor, the circuit will drive the output voltage higher. In contrary, a North magnetic pole will drive the output voltage lower. The variations of voltage level up or down from the quiescent output voltage (the null voltage) are symmetrical and proportional to the magnetic flux density. In the SC59, the die is placed underneath the lead frame and therefore when a magnet pole approaches the SC59 part marking surface, the direction of the magnetic field in to the die is reversed compared to TO92S (Type A). This results in a reverse response to the magnetic flux density in SC59 package compared with TO92S (Type A) and U-DFN2020-6 (Type C) packages. (i.e. if the reverse magnetic pole approaches the part marking surface of SC59, the output is the same as TO92S (Type A) package.) The largest magnetic sensitivity is obtained with a supply voltage of 8V, but at the cost of increased supply current and a slight loss of output symmetry. So, it is not recommended to work in such condition unless the output voltage magnitude is a main issue. The output signal can be capacitively coupled to a next-level amplifier for further amplifying if the changing frequency of the magnetic field is high.

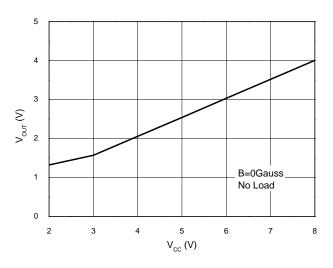

Magnetic Characteristic For U-DFN2020-6 (Type C)

Performance Characteristics

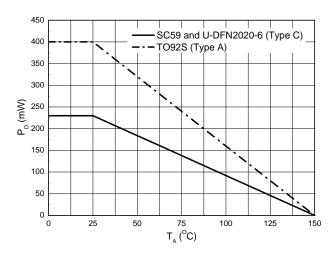

Supply Current vs. Supply Voltage

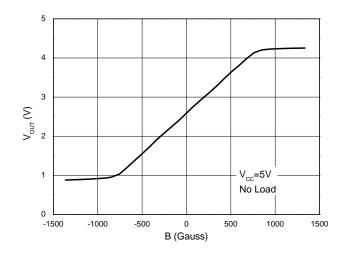

Output Voltage vs. Supply Voltage

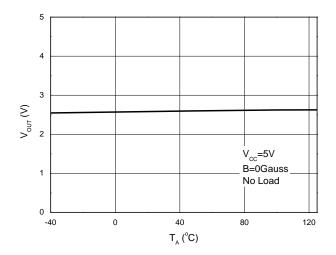

Power Dissipation vs. Ambient Temperature

Output Voltage vs. Magnetic Field

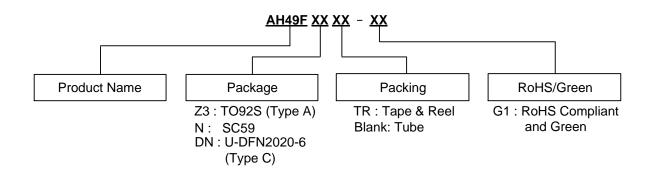

Output Voltage vs. Ambient Temperature

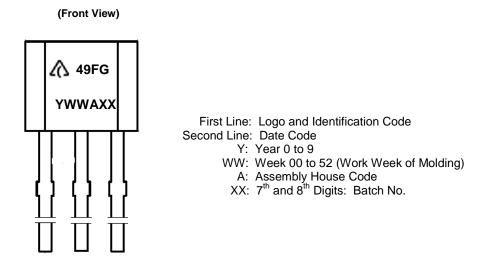

Ordering Information

| Package | Temperature Range | Part Number | Marking ID | Packing |
|----------------------|-------------------|--------------|------------|------------------|
| TO92S (Type A) | | AH49FZ3-G1 | 49FG | 1000/Bulk |
| SC59 | -40°C to +105°C | AH49FNTR-G1 | GT6 | 3000/Tape & Reel |
| U-DFN2020-6 (Type C) | | AH49FDNTR-G1 | CN | 3000/Tape & Reel |

LIFE SUPPORT

Diodes Incorporated products are specifically not authorized for use as critical components in life support devices or systems without the express written approval of the Chief Executive Officer of Diodes Incorporated. As used herein:

- A. Life support devices or systems are devices or systems which:
 - 1. are intended to implant into the body, or
 - 2. support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in significant injury to the user.
- B. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or to affect its safety or effectiveness.

Customers represent that they have all necessary expertise in the safety and regulatory ramifications of their life support devices or systems, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of Diodes Incorporated products in such safety-critical, life support devices or systems, notwithstanding any devices- or systems-related information or support that may be provided by Diodes Incorporated. Further, Customers must fully indemnify Diodes Incorporated and its representatives against any damages arising out of the use of Diodes Incorporated products in such safety-critical, life support devices or systems.
