

HCPL0700, HCPL0701, HCPL0730, HCPL0731

Low Input Current High Gain Split Darlington Optocouplers

Single Channel: HCPL0700, HCPL0701, Dual Channel: HCPL0730, HCPL0731

Features

- Low input current: 0.5mA
- Superior CTR: 2000%
- Superior CMR – 10 kV/μs
- CTR guaranteed 0°C to 70°C
- U.L. Recognized (file# E90700)
- VDE 0884 recognized (file# 136616)
– approval pending for HCPL0730/0731
- BSI recognized (file# 8661, 8662)
– HCPL0700/0701 only

Applications

- Digital logic ground isolation
- Telephone ring detector
- EIA-RS-232C line receiver
- High common mode noise line receiver
- μP bus isolation
- Current loop receiver

Description

The HCPL0700, HCPL0701, HCPL0730 and HCPL0731 optocouplers consist of an AlGaAs LED optically coupled to a high gain split darlington photodetector housed in a compact 8-pin small outline package. The HCPL0730 and HCPL0731 devices have two channels per package for optimum mounting density.

The split darlington configuration separating the input photodiode and the first stage gain from the output transistor permits lower output saturation voltage and higher speed operation than possible with conventional darlington phototransistor optocoupler.

The combination of a very low input current of 0.5mA and a high current transfer ratio of 2000% makes this family particularly useful for input interface to MOS, CMOS, LSTTL and EIA RS232C, while output compatibility is ensured to CMOS as well as high fan-out TTL requirements.

Schematics

Truth Table

| LED | V _O |
|-----|----------------|
| ON | LOW |
| OFF | HIGH |

Absolute Maximum Ratings ($T_A = 25^{\circ}\text{C}$ unless otherwise specified)

Stresses exceeding the absolute maximum ratings may damage the device. The device may not function or be operable above the recommended operating conditions and stressing the parts to these levels is not recommended. In addition, extended exposure to stresses above the recommended operating conditions may affect device reliability. The absolute maximum ratings are stress ratings only.

| Symbol | Parameter | | Value | Units |
|----------------------------------|--|-------------------|-------------|-------|
| T _{STG} | Storage Temperature | | -40 to +125 | °C |
| T _{OPR} | Operating Temperature | | -40 to +85 | °C |
| | Reflow Temperature Profile (Refer to page 12) | | | |
| EMITTER | | | | |
| I _F (avg) | DC/Average Forward Input Current | | 20 | mA |
| I _F (pk) | Peak Forward Input Current (50% duty cycle, 1 ms P.W.) | | 40 | mA |
| I _F (trans) | Peak Transient Input Current - (≤1 μs P.W., 300 pps) | | 1.0 | A |
| V _R | Reverse Input Voltage | | 5 | V |
| P _D | Input Power Dissipation | | 35 | mW |
| DETECTOR | | | | |
| I _O (avg) | Average Output Current (Pin 6) | | 60 | mA |
| V _{EBR} | Emitter-Base Reverse Voltage | HCPL0700/HCPL0701 | 0.5 | V |
| V _{CC} , V _O | Supply Voltage, Output Voltage | HCPL0700/HCPL0730 | -0.5 to 7 | V |
| | | HCPL0701/HCPL0731 | -0.5 to 18 | |
| P _D | Output power dissipation | | 100 | mW |

Electrical Characteristics ($T_A = 0$ to 70°C unless otherwise specified)

Individual Component Characteristics

*All typicals at $T_A = 25^\circ\text{C}$

Notes:

1. Current Transfer Ratio is defined as a ratio of output collector current, I_O , to the forward LED input current, I_F , times 100%.
2. Pin 7 open. Use of a resistor between pins 5 and 7 will decrease gain and delay time.
3. Common mode transient immunity in logic high level is the maximum tolerable (positive) dV_{CM}/dt on the leading edge of the common mode pulse signal, V_{CM} , to assure that the output will remain in a logic high state (i.e., $V_O > 2.0\text{V}$). Common mode transient immunity in logic low level is the maximum tolerable (negative) dV_{CM}/dt on the trailing edge of the common mode pulse signal, V_{CM} , to assure that the output will remain in a logic low state (i.e., $V_O < 0.8\text{ V}$).
4. Device is considered a two terminal device: Pins 1, 2, 3 and 4 are shorted together and Pins 5, 6, 7 and 8 are shorted together.
5. 2500 VAC RMS for 1 minute duration is equivalent to 3000 VAC RMS for 1 second duration.
