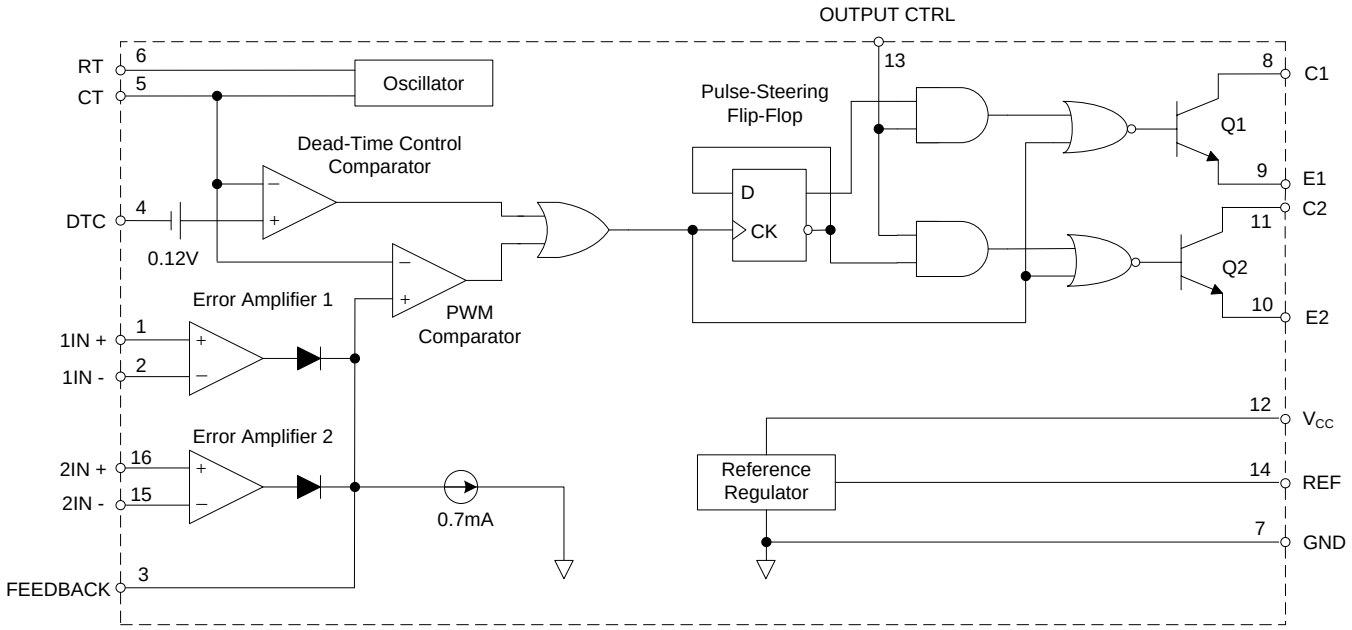
Output Function Table

Signal for Output Control	Output Function
V_I = GND	Single-ended or parallel output
V_I = V_{REF}	Normal push-pull operation

Functional Block Diagram



Absolute Maximum Ratings (Note 3)

Symbol	Parameter	Rating	Unit
V_{CC}	Supply Voltage (Note 4)	40	V
V_I	Amplifier Input Voltage	-0.3 to V_{CC} + 0.3	V
V_O	Collector Output Voltage	40	V
I_O	Collector Output Current	250	mA
$R_{\theta JA}$	Package Thermal Impedance (Note 5)	73	°C/W
–	Lead Temperature 1.6mm from case for 10 seconds	+260	°C
T_{STG}	Storage Temperature Range	-65 to +150	°C
–	ESD Rating (Machine Model)	200	V

Notes: 3. Stresses greater than those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "Recommended Operating Conditions" is not implied. Exposure to "Absolute Maximum Ratings" for extended periods may affect device reliability.

4. All voltage values are with respect to the network ground terminal.

5. Maximum power dissipation is a function of $T_J(max)$, $R_{\theta JA}$ and T_A. The maximum allowable power dissipation at any allowable ambient temperature is $P_D = (T_J(max) - T_A)/R_{\theta JA}$. Operating at the absolute maximum T_J of +150°C can affect reliability.

LIFE SUPPORT

Diodes Incorporated products are specifically not authorized for use as critical components in life support devices or systems without the express written approval of the Chief Executive Officer of Diodes Incorporated. As used herein:

A. Life support devices or systems are devices or systems which:

1. are intended to implant into the body, or

2. support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in significant injury to the user.

B. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or to affect its safety or effectiveness.

Customers represent that they have all necessary expertise in the safety and regulatory ramifications of their life support devices or systems, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of Diodes Incorporated products in such safety-critical, life support devices or systems, notwithstanding any devices- or systems-related information or support that may be provided by Diodes Incorporated. Further, Customers must fully indemnify Diodes Incorporated and its representatives against any damages arising out of the use of Diodes Incorporated products in such safety-critical, life support devices or systems.
