

Pin Description

Name	Type	Description
$\overline{\text{RST}}$	O	Reset Output (PT7M61xxCL/NL): $\overline{\text{RST}}$ is asserted when V_{CC} drops below voltage threshold V_{TH} . Active low.
RST	O	Reset Output (PT7M61xxCH): RST is asserted when V_{CC} drops below voltage threshold V_{TH} . Active high.
GND	P	Ground
V_{CC}	P	Supply Voltage.

Maximum Ratings

Storage Temperature	-65°C to +150°C
Ambient Temperature with Power Applied.....	-40°C to +85°C
Supply Voltage to Ground Potential (V _{CC} to GND)	-0.3V to +6.0V
DC Input Voltage (All inputs except V _{CC} and GND).....	-0.3V to V _{CC} +0.3V
DC Output Current (All outputs)	20mA
Power Dissipation	320mW (Depend on package)

Note:

Stresses greater than those listed under MAXIMUM RATINGS may cause permanent damage to the device. This is a stress rating only and functional operation of the device at these or any other conditions above those indicated in the operational sections of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect reliability.

DC Electrical Characteristics

Typical Operation Circuit

PT7M61xxNL Application Example

Please use N-ch open drains configuration, when a resistor R_{IN} is connected between the V_{CC} pin and power source V_{IN} . In such cases, please ensure that R_{IN} is less than $10k\Omega$ and that C is more than $0.1\mu F$. R_L could be $1k\Omega$ to $510k\Omega$.

LIFE SUPPORT

Diodes Incorporated products are specifically not authorized for use as critical components in life support devices or systems without the express written approval of the Chief Executive Officer of Diodes Incorporated. As used herein:

A. Life support devices or systems are devices or systems which:

1. are intended to implant into the body, or
2. support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in significant injury to the user.

B. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or to affect its safety or effectiveness.

Customers represent that they have all necessary expertise in the safety and regulatory ramifications of their life support devices or systems, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of Diodes Incorporated products in such safety-critical, life support devices or systems, notwithstanding any devices- or systems-related information or support that may be provided by Diodes Incorporated. Further, Customers must fully indemnify Diodes Incorporated and its representatives against any damages arising out of the use of Diodes Incorporated products in such safety-critical, life support devices or systems.
