

# REF-01/REF-02

## ABSOLUTE MAXIMUM RATINGS (Note 1)

|                               |             |
|-------------------------------|-------------|
| REF-01/REF-02 A, E, H .....   | 40V         |
| REF-01C/REF-02C .....         | 30V         |
| Power Dissipation .....       | 500mW       |
| Output Short-Circuit Duration |             |
| To Ground .....               | Indefinite  |
| To $V_{IN} \leq 16V$ .....    | Indefinite  |
| To $V_{IN} > 16V$ .....       | Not Allowed |

|                                            |                |
|--------------------------------------------|----------------|
| Storage Temperature Range .....            | -65°C to 150°C |
| Operating Temperature                      |                |
| REF-01/REF-02, REF-01A/REF-02A ...         | -55°C to 125°C |
| REF-01E/REF-02E, REF-01H/REF-02H,          |                |
| REF-01C/REF-02C, REF-01D/REF-02D ....      | 0°C to 70°C    |
| Lead Temperature (Soldering, 10 sec) ..... | 300°C          |

## PACKAGE/ORDER INFORMATION

|                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                 |                                                                                                                                    |                                                                                           |                                                                                                                                                                                                |          |          |          |          |          |          |         |          |         |                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                        |          |          |          |          |          |          |  |          |

**Note 1:** Absolute Maximum Ratings are those values beyond which the life of a device may be impaired.

**Note 2:** Line and load regulation specifications include the effect of self heating.

**Note 3:** Limit current in or out of Pin 3 to 50nA and capacitance on Pin 3 to 30pF.

**Note 4:**  $\Delta V$  is defined as the absolute difference between the maximum output voltage and the minimum output voltage over the specified temperature range expressed as a percentage of nominal output.

$$\Delta V = \left| \frac{V_{MAX} - V_{MIN}}{V_{OUT}} \right| \cdot 100$$

**Note 5:**  $\Delta V$  specification applies trimmed or untrimmed.

**Note 6:** TC is defined as  $\Delta V$  divided by the temperature range, i.e.,

$$TC = \frac{\Delta V}{T_{MAX} - T_{MIN}}$$

**Note 7:** 0.1Hz to 10Hz noise cannot be 100% tested on modern high speed test equipment, so Linear Technology does not put a guaranteed maximum specification on this parameter for standard units. 100% bench testing of 0.1Hz to 10Hz noise is available on special request. To ensure low output noise, Linear Technology *does* 100% test 10Hz to 1kHz noise. Consult factory for details.

## PACKAGE DESCRIPTION

**H Package**  
**8-Lead TO-5 Metal Can (.230 Inch PCD)**  
 (Reference LTC DWG # 05-08-1321)

\* LEAD DIAMETER IS UNCONTROLLED BETWEEN THE REFERENCE PLANE AND 0.045" BELOW THE REFERENCE PLANE

\*\* FOR SOLDER DIP LEAD FINISH, LEAD DIAMETER IS  $0.016 - 0.024$  (0.406 - 0.610)

H8 (TO-5) 0.230 PCD 1197

**OBSOLETE PACKAGE**

PACKAGE DESCRIPTION

J8 Package  
8-Lead Cerdip (Narrow .300 Inch, Hermetic)  
(Reference LTC DWG # 05-08-1110)

OBSOLETE PACKAGE

## PACKAGE DESCRIPTION

**N8 Package**  
**8-Lead PDIP (Narrow .300 Inch)**  
 (Reference LTC DWG # 05-08-1510)

\*THESE DIMENSIONS DO NOT INCLUDE MOLD FLASH OR PROTRUSIONS.  
 MOLD FLASH OR PROTRUSIONS SHALL NOT EXCEED 0.010 INCH (0.254mm)

N8 1098
