Table of Contents

Product Facts

- Solderless terminals and splices performs up to today's standards for reliable termination in applications ranging from control circuits to heavy duty power wiring
- This catalog describes only standard terminals and splices accommodating wire sizes from 26 AWG through 4/0 AWG
- These terminals are pre-insulated and color coded by wire size for easy identification
- Funnel entry on many terminals allows for easy wire insertion for high speed production
- Nylon or vinyl insulation provides high dielectric strength
- The serration or dimple feature inside the terminal barrel provides exceptional barrel contact and tensile strength
- Special plating process creates a high resistance to corrosion
- Use of AMP application tooling is designed for uniform high quality terminations
- UL, CSA, Military Approved

Table of Contents

Numerical values

To convert U.S. customary unit values in this catalog to their metric equivalents, use the following formulas:

To convert from	to	Multiply by
inch	millimeter (mm)	2.540000 x 10
inch	metre (m)	2.540000 x 10^{-2}
inch	centimeter (cm)	2.540000
foot	metre (m)	3.0480000 x 10^{-1}
pound-force	newton (N)	4.448222
bar	pascal (Pa)	1.000000 x 10^{5}
pound-force/inch^2	pascal (Pa)	6.894757 x 10^{3}
pound-mass	kilogram (kg)	4.535924 x 10^{-1}
ounce-mass	kilogram (kg)	2.834952 x 10^{-2}

To convert wire size (AWG) to the equivalent metric value using the circular mil area of the wire, use the following formula:

circular mil area (CMA)/1550.003 = square millimeter (mm^2)

Note: Dimensions in this catalog are for reference purposes only. Customer drawings are available on request.

Terminals and Spices (Continued)

Ordering Information

This catalog is designed for easy selection of terminal type to meet your needs. All terminals and splices are cataloged by tongue type and wire size.

If the part number is known, refer to the numerical index at the back of this catalog for page location of tabular information. In many instances the part is available in loose piece as well as tape mounted. FASTON terminals are available in strip form. When ordering tape mounted parts, specify the terminal or splice part number, the total quantity of parts required, the part number of the tooling to be used and the type of packaging desired (if applicable). The table shown at top right, lists the wire sizes available and the quantity per package for tape mounted and loose piece.

Insulated terminals and splices are color coded to indicate wire range and to help match the terminal with the appropriate tool. The table shown at right identifies the specific wire range insulation color.

Standard Packaging Quantities

Wire Size Range AWG	Packaging Quantity Loose Piece	Tape Mounted
26-22	1M/Box	2,500/Reel
22-14	1M/Box	5,000/Reel
16-14 H.D.	500/Box	2,500/Reel
12-10	500/Box	2,500/Reel
8 thru 4	100/Box	—
2 thru 4/0	50/Box	—

Note: Package quantities may vary with specific part numbers.

Insulation Color Code

Insulation Color Code	Wire Size Range AWG	Comments
Yellow	26-22	—
Transparent	24-20	—
Red	22-16	—

Terminal and Splices Performance Specifications (Continued)

The many millions of AMP terminals and splices that have given ten, fifteen and twenty years of service are ample proof of the testing and research that went into their design and manufacturing. Like all AMP solderless wiring devices, they are thoroughly tested to conform to standards of performance under heavy usage. Tests conducted in Tyco Electronics laboratories and research facilities, some of the best-equipped in their field, indicate that these terminals and splices meet or exceed applicable industrial requirements and military specifications. The result of some of the most popular tests are tabulated here.

Upon request, a formal test report will be supplied to support these values and document additional performance requirements not listed.

Terminal Stud Hole Size

Use to Select Proper Size Terminal

The chart shows sizes and dimensions of various studs and the corresponding terminal stud hole sizes used with AMP devices.

For example, with stud #5 (.125 Diameter), use AMP device listed for #5 stud (.129 Hole Diameter).

Terminal stud hole sizes may easily be checked by fitting sample terminal to black circle.

Stud Size		Stud Dia.	Minimum Terminal Hole Diameter
U.S. Cust.	Metric		
#0		.060	.064
#1		.073	.077
#2	M2	.086	.090
#3		.099	.103
#4		.112	.116
#5	M3	.125	.129
#6	M3.5	.138	.142

PIDG Terminals and Splices

Product Facts

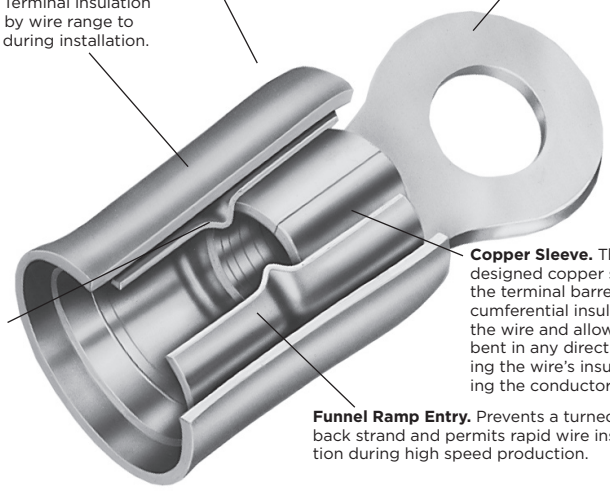
- Pre-insulated terminal designed for uniform reliability in most difficult circuit environments
- PIDG Terminals consist of tin plated copper or tin plated phosphor bronze body for spring spades with a copper sleeve and insulation sleeve fitted over terminal barrel
- Design of the tool dies and construction of the terminal allows for uniform insulation thickness under crimping pressure, transmitting this pressure evenly to the center of the crimp area

The AMP Mated Tool/Terminal Concept

- AMP compression crimping produces crimps for a given size wire and terminal that are alike in appearance and performance
- Terminal and crimping tool are designed as uniform matched devices
- Dies are precision-engineered from the finest hard-metal alloys
- Crimping pressure is controlled by a ratchet device on the hand tool or a corresponding pre-calibration in the crimping jaws of AMP automated crimping machines

The Crimp

- When done properly, crimping pressure can neither overstress nor understress the terminal barrel—machined dies fully bottom to the precise crimp height
- Resulting termination is free of contamination
- Resistant to shock and critical environments
- Tensile strength approaches that of the wire itself
- PIDG Terminals meet or exceed the requirements of MIL-T-7928, Type II, Class 1 and 2
- Refer to AMP Qualified Products for Military Application, Catalog 73-159 for Military Specification Number to AMP Part Number cross reference



Temperature Rating: 105°C Max.

Note: Over size expansions are provided in vinyl insulation only.

PIDG Terminals and Splices (Continued)

Rectangular Tongue Terminals

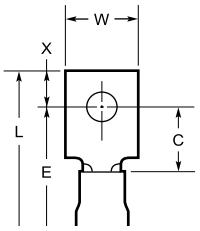
(Continued)



Material

Insulation -Nylon, UL 94V-2

Terminal Body -Copper per ASTM B-152

Plating -Tin per ASTM B-545

Metallic Sleeve -Copper per ASTM B-152

Plating — Nickel per QQ-N-290

PIDG FASTON Terminals and Splices

Product Facts

- Pre-insulated terminal designed for uniformed reliability in most difficult circuit environment
- Consists of an unplated or tin-plated brass body or a tin-plated phosphor bronze body with a specially designed copper sleeve and insulation sleeve fitted over the terminal barrel
- Design of the tool dies and construction of the terminal permits uniform insulation thickness under crimping pressure, transmitting this pressure evenly to the center of the crimp area

The AMP Mated Tool/Terminal Concept

- AMP compression crimping produces crimps for a given size wire and terminal that are alike in appearance and performance
- Terminal and the crimping tool are designed as uniform matched devices
- Dies are precision-engineered from the finest hard-metal alloys
- Crimping pressure is controlled by a ratchet device on the hand tool or a corresponding pre-calibration in the crimping jaws of AMP automated crimping machines

The Crimp

- When done properly, crimping pressure can neither overstress nor understress the terminal barrel—machined dies fully bottom to the precise crimp height
- Resulting termination is free of contamination
- Resistant to shock and critical environments
- Tensile strength approaches that of the wire itself

Temperature Rating: 105°C Max.

PIDG FASTON Terminals and Splices (Continued)

Receptacles

Receptacle Style:

A - No dimple with wire stop
B - Dimple with wire stop
C - No dimple, no wire stop

Material

Insulation -Nylon, UL 94V-2
Receptacle Body -Brass per ASTM B-36 or Phosphor Bronze per ASTM B-139
Plating -Tin per ASTM B-545 except where noted.
Metallic Sleeve -Copper per ASTM B-152
Plating -Tin per ASTM B-545

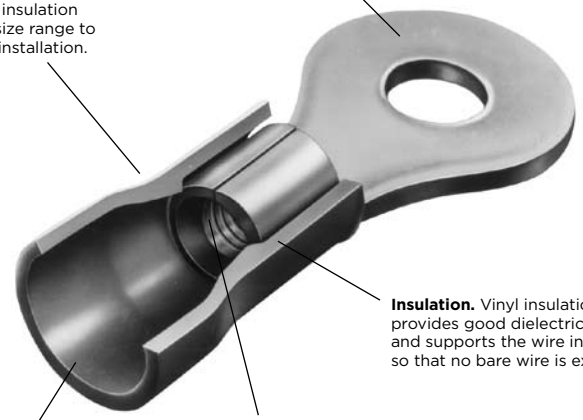
PLASTI-GRIP Terminals and Splices

Product Facts

- Pre-insulated PLASTI-GRIP solderless terminals and splices
- Designed specifically to answer the need for inexpensive, insulated electrical terminations
- Can be used in almost every type of commercial application
- Accommodate wire sizes from 22 AWG through 2/0 AWG

The Crimp

- Carefully engineered application tooling has been developed to ensure uniformly high quality terminations
- Tool and terminal have been designed as a team to promote ease and speed of application and at the same time to provide precise crimping pressure for every wire size
- The wire and the terminal barrel form a homogeneous mass of metal, providing a connection of maximum conductivity, tensile strength, and high resistance to corrosion
- The quality performance, the facility of installation and the inherent simplicity make them well-suited for many industrial applications



Temperature Rating: 90°C Max.

† Not UL or CSA Approved or Listed.

*Available in small packaging quantities.

[1]When using two or more wires in either end of a butt splice, the combined cross sectional area must be within the (CMA) circular mil range listed. (Not UL or CSA approved with use of multiple wires.)

[2]22-16 splices are 22-18 range in accordance with MIL-T-7928.

[3]Oval expansion.

[4]Funnel entry

[5]Oval expansion at one end; circular expansion at other end.

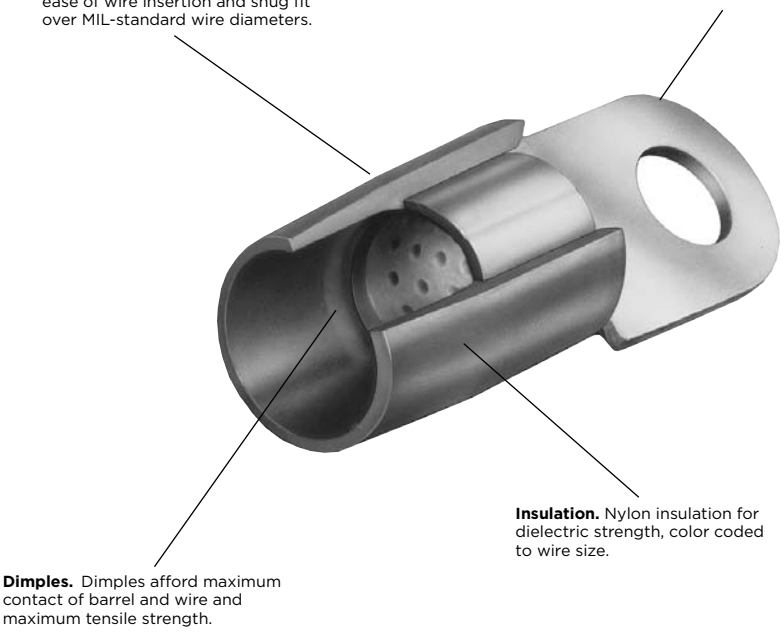
TERMINYL Terminals and Splices

Product Facts

- Designed to provide insulated terminals and splices for large wire sizes, many of which are used in airborne and ground support applications
- Tested under the procedures stipulated by MIL Spec. MIL-T-7928, they meet and exceed requirements
- Designed and engineered to withstand extreme vibration, shock and structural stresses, elevated temperatures and other conditions which could adversely affect the circuit requirements in complex air and space flight equipment
- The use of matching AMP tooling provides for precision crimping which makes all terminations identical
- This uniformity promotes maximum reliability and, coupled with tool die marks on the barrel indicating the wire size and color coding of the insulation sleeve, also serves as a built-in quality control factor
- Pre-insulated with color coded nylon which also acts as insulation support
- Wire size range of terminals is 8 AWG through 4/0 AWG



Temperature Rating: 105°C Max.

TERMINYL Terminals meet or exceed the requirements of MIL-T-7928, Type II, Class 2.

Refer to AMP Qualified Products for Military Application, Catalog 73-159 for Military Specification Number to AMP Part Number cross reference.

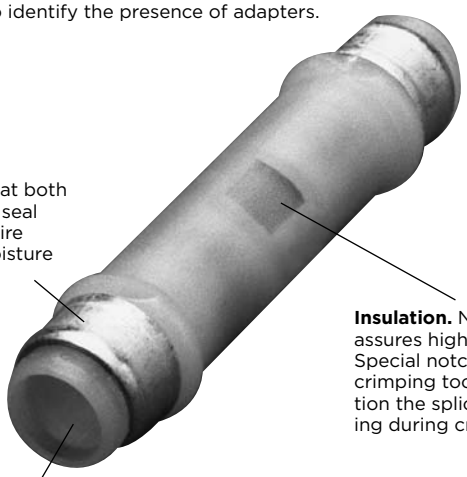
CERTI-SEAL Terminals and Splices

Product Facts

- Nylon window splice for military, commercial, aircraft, and missile applications that seals out vapors and fluids and imparts exceptional wire insulation support
- Metal rings at both ends of splice and permanently crimped to wire insulation for a moisture tight seal, even at altitude
- Designed to fit more than 100 insulation diameters in MIL-Spec wires from #24 to #10 AWG, and is available in three types
- First type is made with a nylon ring adapter within the wire entrance
- Second type, without nylon ring adapters
- Third type with a nylon ring adapter in one end only
- Special notch feature on the outside of the splice allows locator in the crimping tool to precisely position splice before crimping and to prevent twisting or horizontal movement during crimping
- Window area of each splice permits visual inspection of the linear plane of the crimp in relation to the inner metal sleeve
- Wire-stops in splice barrel indicate exact insertion depth of stripped wire-ends



Color Coding. The splice body is color coded by wire size: Tin plated for 24-20, Red for 22-18, Blue for 16-14, Yellow for 12-10. The metal rings are color coded green or orange to identify the presence of adapters.

Basic Splice Material. The basic splice body is constructed of fine grade high conductivity copper per ASTM B-152 and is either color coded or tin-plated per ASTM B-545. Tyco Electronics special plating process creates durable corrosion resistance to salt spray and most chemical fumes.

Rings. Metal rings at both ends permanently seal the splice to the wire insulation for a moisture tight seal.

Insulation. Nylon insulation assures high dielectric strength. Special notch feature allows crimping tool locator to position the splice to prevent twisting during crimping.

Adapters. Nylon ring adapter allows for smaller wire insulation diameters.

Tooling

Tool Part No. 46073 or 46074

Tool Part No. 59282 or 58325-1

Hand tooling features the AMP CERTI-CRIMP ratchet so that the operator fully closes tool so that crimping dies in tool head fully "bottom". Locator feature in head assures that splice is properly oriented in tool.

CERTI-SEAL Tools do not require wire insulation adjustment prior to crimping.

Class 1 and Class 2 Military Approvals

Approval	Dimensional Requirement	Application Tooling	Use	Performance Requirement
Class 1	Terminals must comply with the dimensional requirements specified by the military.	Hand application tool which must conform to the military's dimensional and performance specification.	For procurement by government agencies for maintenance and repair.	Per Military Specification Mil-T-7928G
Class 2	Terminals must comply with the dimensional requirements specified by the manufacturer's customer drawing. For field repair purposes Class 2 terminals must be capable of being replaced by Class 1 Terminals.	The terminal manufacturers recommended application tooling. **Note:** Several tape mounted part numbers are currently Class 2 approved.	For procurement by contractors and manufacturers for high volume production, modification, and repair.
