### 4 Part number

**Brevis: A10204** 

#### 5 General data

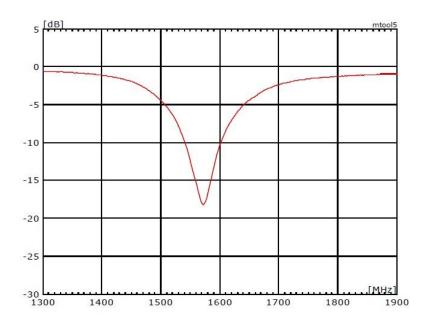

| Product name                 | Brevis GPS                       |
|------------------------------|----------------------------------|
| Part Number                  | A10204                           |
| Frequency                    | GPS - 1575 MHz                   |
| Polarization                 | Linear                           |
| Operating temperature        | -40 °C to +140 °C                |
| Environmental condition test | ISO16750-4 5.1.1.1/5.1.2.1/5.3.2 |
| Impedance with matching      | 50 Ω                             |
| Weight                       | <0.2 g                           |
| Antenna type                 | SMD                              |
| Dimensions                   | 3 x 22 x 3 [mm]                  |

### 6 Electrical characteristics

|                             | Typical performance              | Conditions                                |
|-----------------------------|----------------------------------|---|
| Bandwidth                   | >50 MHz at -10 dB<br>Return Loss |   |
| Peak gain (Linear)          | 0 dBi                            |   |
| Average gain (Linear)       | -2.4 dBi                         |   |
| Average efficiency (Linear) | >50%                             | All data measured on Antenova's reference |
| Peak gain (RHCP)            | -2.8 dBi                         | boards, part numbers A10204-U1            |
| Average gain (RHCP)         | -5 dBi                           |   |
| Average efficiency (RHCP)   | >30%                             |   |
| Maximum Return Loss         | -17 dB                           |   |
| Maximum VSWR                | 1.4:1                            |   |

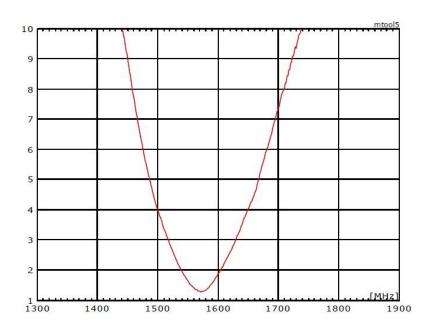

# 7 Electrical performance

### 7-1 Return Loss

Reference Board A10204-U1

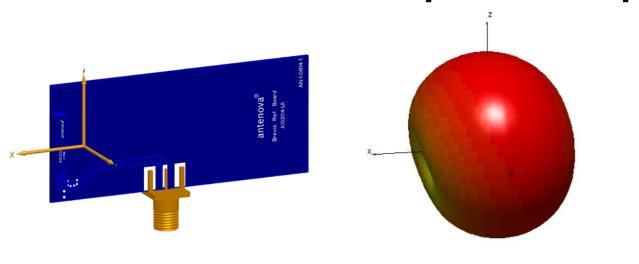

#### **7-2 VSWR**

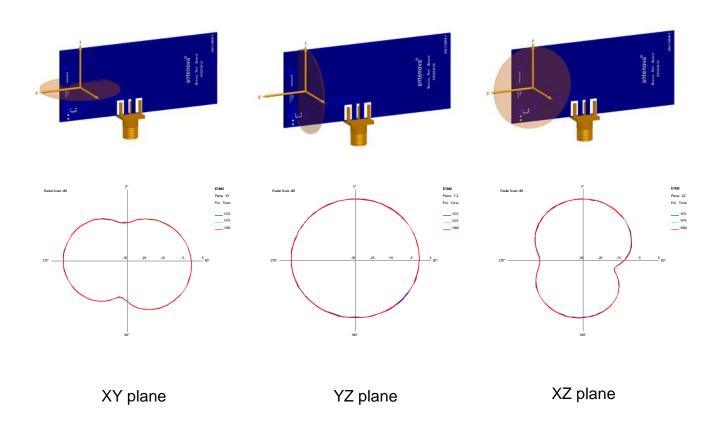

Reference Board A10204-U1

# 7-3 Antenna patterns

# 7.3.1. Reference Board A10204-U1 [Linear Polarization]

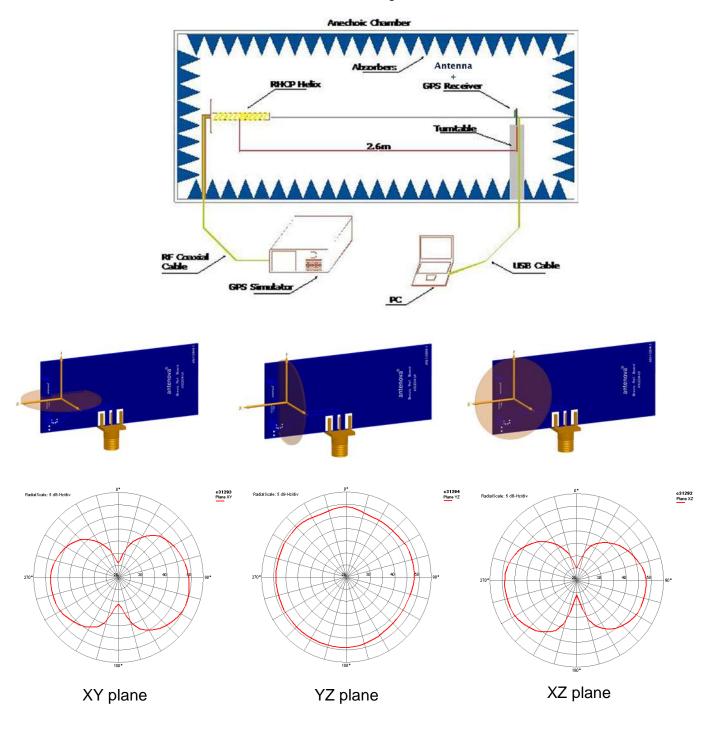

Patterns show combined polarisations measured on reference board A10204-U1

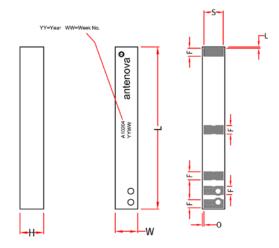

#### 7.3.2. Active Test Patterns

The typical radiation pattern of the Brevis A10204 GPS antenna has been measured in Antenova's "Active GPS" chamber, using Antenova's standard RF module based on SiRFstarIII™ GSC3LT IC combined with two stages of Saw Filters.

The above plots are CN number in dB.Hz on a scale of 20-50 dB.Hz.

### 8 Antenna dimensions

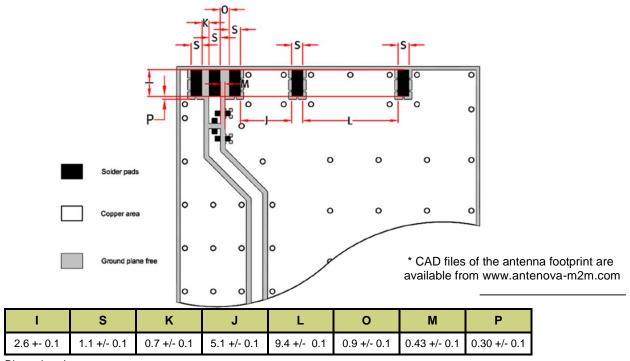

| L            | W           | Н            | F            | S            | 0            | L             |
|--------------|-------------|--------------|--------------|--------------|--------------|---------------|
| Length       | Width       | Height       |              |              |              |               |
| 22.0 +/- 0.2 | 3.0 +/- 0.2 | 3.2 +/- 0.15 | 1.1 +/- 0.15 | 2.6 +/- 0.15 | 0.2 +/- 0.15 | 0.35 +/- 0.15 |

Brevis (Part No: A10204)

Dimensions in mm

#### 10 Electrical interface

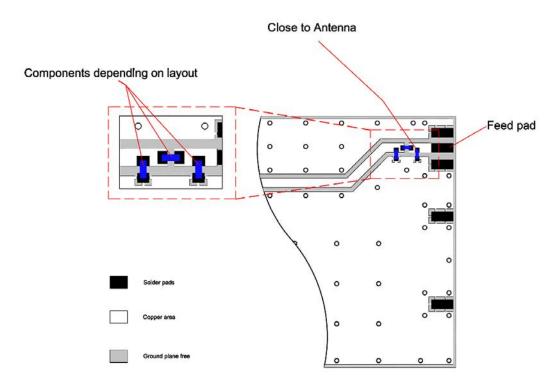

#### 10-1 Transmission lines

- All transmission lines should be designed to have a characteristic impedance of 50  $\Omega$
- The length of the transmission lines should be kept to a minimum
- Any other parts of the RF system like transceivers, power amplifiers, etc, should also be designed to have an impedance of 50  $\Omega$

Once the material for the PCB has been chosen (PCB thickness and dielectric constant), a coplanar transmission line can easily be designed using any of the commercial software packages for transmission line design. For the chosen PCB thickness, copper thickness and substrate dielectric constant, the program will calculate the appropriate transmission line width and gaps on either side of the track so the characteristic impedance of the coplanar transmission line is  $50\Omega$ .

### 10-2 Matching circuit

The antenna requires a matching circuit that must be optimized for each customer's product. The matching circuit will require up to three components and the following pad layout should be designed into the device so the correct circuit can be installed:

The antenna feed pad and the antenna ground pads are indicated in the drawing above. Additional pads are for mechanical attachment only and should not be grounded.

In addition to the matching circuit, a separate DC blocking capacitor will also be required between the radio and the antenna matching circuit.

Note: The component values for the matching circuit will vary depending on the size of the PCB and surrounding components. The impedance of the antenna should be measured before selecting suitable matching components. Antenova M2M offers this service on request. Contact sales@antenova-m2m.com for further information.

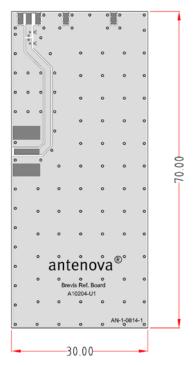

### 10-3 Antenna placement

Antenna placement locations and orientations are critical for achieving optimal system performance. Antenova strongly recommends placing the antenna near the edge of the board. Maximum antenna performance is achieved by placing the antenna towards one of the corners of the PCB, with the feed point of the antenna as close to the corner of the PCB as possible.

Antenova M2M offers a full range of development support to ensure efficient implementation of the antenna into the specific design. To overcome RF design issues, matching circuits, transmission lines, layout and other components, please contact Antenova M2M (sales@antenova-m2m.com) for design and placement recommendations.

#### 10-4 Reference board

The reference board has been designed for evaluation purposes of the Brevis A10204 antenna and it includes a SMA female connector

Dimensions in mm

Contact sales@antenova-m2m.com for further details

### 11 Soldering

This antenna is suitable for lead free soldering.

The reflow profile should be adjusted to suit the PCBA, oven and solder paste, while observing the following conditions:

- The maximum temperature should not exceed 240 °C
- However for lead free soldering, a maximum temperature of 255 °C for no more than 20 seconds is permitted.
- The antenna should not be exposed to temperatures exceeding 120 °C more than 3 times during the soldering process.

## 12 Hazardous material regulation conformance

The antenna has been tested to conform to RoHS requirements. A certificate of conformance is available from Antenova M2M's website.

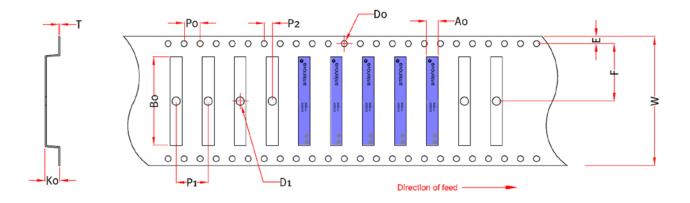

### 13 Packaging

### 13-1 Optimal storage conditions for packaged reels

| Temperature   | -10°C to 40°C   |  |
|---------------|---|--|
| Humidity      | Less than 75% RH  |  |
| Shelf Life    | 8 Months  |  |
| Storage place | Away from corrosive gas and direct sunlight                                 |  |
| Packaging     | Reels should be stored in unopened sealed manufacturer's plastic packaging. |  |

Note: Storage of open reels of antennas is not recommended due to possible oxidization of pads on antennas. If short term storage is necessary, then it is highly recommended that the bag containing the antenna reel is re-sealed and stored in like storage conditions as in above table.

# 13-2 Tape characteristics

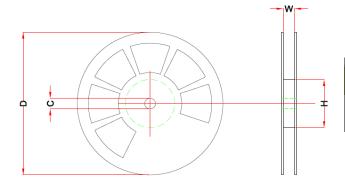

|   | W            | F            | E            | P0          | P1          | P2          | В0            | K0           | T           | D0          | D1           | A0           |
|---|--------------|--------------|--------------|-------------|-------------|-------------|---------------|--------------|-------------|-------------|--------------|--------------|
| ĺ | 32.0 +/- 0.3 | 26.2 +/- 0.1 | 1.75 +/- 0.1 | 4.0 +/- 0.1 | 8.0 +/- 0.1 | 2.0 +/- 0.1 | 22.35 +/- 0.1 | 3.55 +/- 0.1 | 0.3 +/- 0.1 | 1.5 +/- 0.1 | 2.05 +/- 0.1 | 3.3 +/- 0.05 |

Dimensions in mm

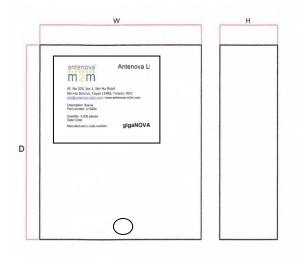

| Quantity        | Leading Space            | Trailing Space           |
|-----------------|--------------------------|--------------------------|
| 2000 pcs / reel | 50 blank antenna holders | 37 blank antenna holders |

### 13-3 Reel dimensions

| Width<br>(W) | Reel<br>Diameter<br>(D) | Hub<br>Diameter<br>(H) | Shaft<br>Diameter<br>(C) |
|--------------|-------------------------|------------------------|--------------------------|
| 57.5         | 330 +/- 2.0             | 80                     | 13 +/- 0.5               |

### 13-4 Box dimensions

| Width  | Breadth | Thickness |
|--------|---------|-----------|
| (W)    | (B)     | (H)       |
| 345 mm | 354 mm  | 45 mm     |

# 13-5 Bag properties

Reels are supplied in protective plastic packaging
