Ambient operating temperature	–25°C to 70°C	•		•	•

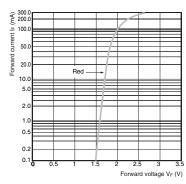

Note: For Switches with two LEDs, red and green, the recommended operating current is 12 mA for the red and 20 mA for the green LED for application with three-color illumination.

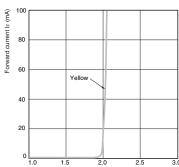

## ■ LEDs

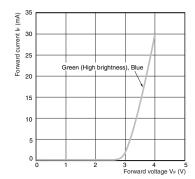

#### • Forward current reduction curve

## • Forward current and forward voltage curves

Note: 1. Make sure that the polarity of the LEDs is correct. The polarity is not indicated on the Switch, but the positive pole is located on the back surface of the Switch on the side with the OMRON mark.

2. Connect limiting resistors to the LEDs. The Switch does not have built-in limiting resistors, so satisfy the LED characteristics by obtaining the limiting resistance according to the following formula based on the voltage to be used.

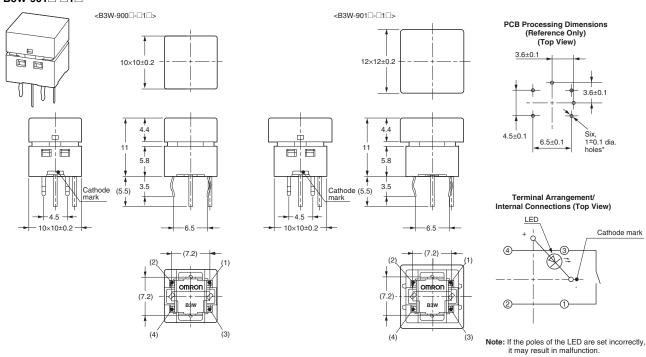

Limiting resistance (R)= 
$$\frac{\text{(Voltage used (E) - LED forward voltage (VF))}}{\text{LED forward current (IF)}} (\Omega)$$

$$R = \frac{V_F - V_F -$$

Note: Unless otherwise specified, a tolerance of  $\pm 0.4$  mm applies to all dimensions. No terminal numbers are indicated on the Switches.

## ■ Safety Precautions

Note: Refer to Safety Precautions in Tactile Switches (Cat. No. X037) for details on general safety precautions.

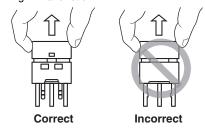

#### ■ Precautions for Correct Use

#### **LEDs**

Switches with high-brightness green (HG) or blue (B) LEDs are susceptible to static electricity. Be careful when handling a Switch with these LEDs as it may cause the Switch to breakdown.

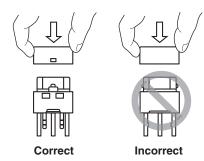

#### Removing the Cap

- Hold the cap at the side away from the mating section. Pull straight up.
- Do not remove the cap while the Switch is mounted. Doing so will apply force to the soldered section and LEDs, resulting in malfunction.

#### Placing the Cap on the Switch

Hold the Cap at the side away from the mating section. Push straight down until the mating section meets.

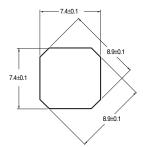

#### **Removing the Cap**

The Cap can be removed up to two times. Excessively removing the Cap will cause the mating section to become weak, resulting the operating section not mating completely or the Cap may fall off

#### **Film Dimensions**

Dimensions of the film are shown below. The thickness is 0.2 mm.
