

VSC8664

Quad Port 10/100/1000BASE-T PHY and 100BASE-FX/1000BASE-X SerDes with Recovered Clock Outputs

Wide Range of Support

- Compliant with IEEE 802.3 (10BASE-T, 100BASE-TX, 1000BASE-T, 100BASE-FX, and 1000BASE-X) specifications
- Support for 802.3ah unidirectional transport for 100BASE-FX and 1000BASE-X fiber media
- Support for >16 kB jumbo frames in all speeds with programmable synchronization FIFOs
- Supports Cisco SGMII v1.7 and 1000BASE-X MACs, IEEE 1149.1 JTAG boundary scan, and IEEE 1149.6 AC-JTAG

Synchronous Ethernet

- Recovered clock output support for G.8261 and IEEE-1588 synchronous Ethernet applications, including programmable squelch control
- Patent-pending, fast link fail indication (<1 ms) to provide an earlier indication of a link failure to critical metro ethernet traffic and synchronization links

Flexibility

- Integrated quad I2C multiplexer to control SFPs or PoE modules, eliminating the need for an external two-wire serial device for the control and status of SFP or PoE modules

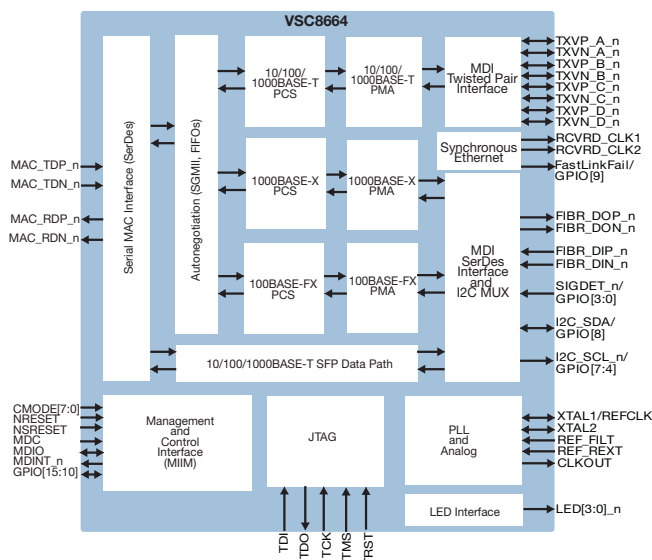

- VeriPHY® cable diagnostics suite provides extensive network cable information such as cable length, termination status, and open/short fault location
- Extensive test features (including near end, far end, and connector loopback, and Ethernet packet generator with CRC error counter) to decrease time-to-market

Advanced SerDes

- Dual, high-performance 1.25 Gbps SerDes to maximize receive jitter tolerance and minimize transmit jitter (in comparison to single SerDes architectures)
- Supports 100BASE-FX fiber, 1000BASE-X fiber, and triple-speed copper SFPs over SerDes pins
- Advanced SerDes feature capabilities including transmitter amplitude control, receiver equalization, and link integrity status information

Microsemi Corporation (Nasdaq: MSCC) offers a comprehensive portfolio of semiconductor and system solutions for communications, defense and security, aerospace, and industrial markets. Products include high-performance and radiation-hardened analog mixed-signal integrated circuits, FPGAs, SoCs, and ASICs; power management products; timing and synchronization devices and precise time solutions; voice processing devices; RF solutions; discrete components; enterprise storage and communications solutions, security technologies, and scalable anti-tamper products; Ethernet solutions; Power-over-Ethernet ICs and midspans; custom design capabilities and services. Microsemi is headquartered in Aliso Viejo, California, and has approximately 4,800 employees worldwide. Learn more at www.microsemi.com.
