[1)] J-STD20 and JESD22

[2)] All devices tested under avalanche conditions, for a time periode of 10ms, at 20mA.

[3)] t_c is the time constant for the capacitive displacement current waveform (independent from T_j, I_{LOAD} and di/dt), different from t_{rr} which is dependent on T_j, I_{LOAD} and di/dt. No reverse recovery time constant t_{rr} due to absence of minority carrier injection.

[4)] Under worst case Z_{th} conditions.

[5)] Only capacitive charge occuring, guaranteed by design.
