### Restriction on the use of Hazardous Substances (RoHS)

At TE Connectivity, we're ready to support your RoHS requirements. We've assessed more than 1.5 million end items/components for RoHS compliance, and issued new part numbers where any change was required to eliminate the restricted materials. Part numbers in this catalog are identified as:

**RoHS Compliant** — Part numbers in this catalog are RoHS Compliant, unless marked otherwise. These products comply with European Union Directive 2002/95/EC as amended 1 January 2006 that restricts the use of lead, mercury, cadmium, hexavalent chromium, PBB, and PBDE in certain electrical and electronic products sold into the EU as of 1 July 2006.

NOTE: For purposes of this Catalog, included within the definition of RoHS Compliant are products that are clearly "Out of Scope" of the RoHS Directive such as hand tools and other non-electrical accessories.

NOTE: Information regarding RoHS compliance is provided based on reasonable inquiry of our suppliers and represents our current actual knowledge based on the information provided by our suppliers. This information is subject to change. For latest compliance status, refer to our website referenced at right.

### Getting the Information You Need

Our comprehensive on-line RoHS Customer Support Center provides a forum to answer your questions and support your RoHS needs. A RoHS FAQ (Frequently Asked Questions) is available with links to more detailed information. You can also submit RoHS questions and receive a response within 24 hours during a normal work week. The Support Center also provides:

- Cross-Reference from Non-compliant to Compliant Products
- Ability to browse RoHS Compliant Products in our on-line catalog
- Downloadable Technical Data Customer Information Presentation
- More detailed information regarding the definitions used above
- So whatever your questions when it comes to RoHS, we have the answers at [www.te.com/leadfree](http://www.te.com/leadfree)

Center

Introduction (Continued)

**Mass termination capabilities of the ribbon cable connectors** have helped make ribbon cable, and particularly .050 [0.127] centerline cable, popular within the Electronics Industry. The ability to terminate up to 64 conductors simultaneously, without stripping or otherwise preparing the cable, presents obvious labor savings.

**Ribbon Cable Connectors** are wire-to-board devices used to make the transition between cable and pc board circuitry. They find heavy use within equipment to connect one board to another or one subsystem to another. The connectors are also used in input/output applications, connecting different pieces of equipment.

**Ribbon Cable Solutions** are available on three separate cable centerline spacings. They include:

- .025 [0.64] Centerlines**
- System 50 receptacles
  - System 50 paddleboards
  - Pin headers

- .039 [1.00] Centerlines**
- 2.0 mm receptacles
  - Breakaway pin headers

- .050 [1.27] Centerlines**
- 50/50 Grid connectors
  - Micro-MaTch connectors
  - Novo Receptacle connectors
  - DIP plugs
  - EUROLATCH receptacle connectors per DIN 41612 and IEC 603-2
  - Pin Headers

**System 50 ribbon cable receptacles** will terminate cable on .025 [0.64] centerlines. They are available in select sizes from 20 thru 100-positions, and accept wire size range 30 AWG [0.05 mm<sup>2</sup>] solid or stranded wire and 32 AWG [0.03 mm<sup>2</sup>] stranded pvc insulated wire. Housing and cover are made of high temperature tolerant thermoplastic material, black, UL 94V-0 rated. A single mating beam, phosphor bronze contact provides the interconnect between the con-

ductor and the .015<sup>2</sup> [0.38<sup>2</sup>] posts on .050 x .100 [1.27 x 2.54] grid. Also available in paddleboard configurations.

**2.0 mm [.079] ribbon cable receptacles** feature contacts on a true 2.0 mm [.079 in.] mating grid for 1.0 mm [.039 in.] pitch ribbon cable. Select configurations are available between 8 and 50-positions. Receptacles feature insulation displacement contacts (IDC).

**50/50 Grid connectors** Although AMPMODU 50/50 Grid Vertical Headers and Receptacles are designed for parallel board-to-board stacking in high density applications, Right-angle board-to-board and cable-to-board applications are also possible since the vertical receptacles also mate with non-latching right-angle headers and the vertical headers also mate with non-latching cable connectors.

**Micro-Match connectors** Miniaturization and the trend towards higher density of electronic functions on a substrate led to the introduction of Micro-MaTch. The system offers a range of board and wire connectors, enabling a variety of wire-to-

board and board-to-board interconnections. Its design prevents the traditional failure mode in tin-plated connections, fretting corrosion. An additional positioning spring in the female part absorbs relative movements caused by vibrations and thermal expansion between male and female contacts. By preventing movements on the contact spot, a gas tight connection can be guaranteed under all circumstances.

**Novo receptacles** feature two rows of contacts on .100 x .100 [2.54 x 2.54] centers on selected sizes of 10 thru 64-positions and mate with .025 [0.64] square or round posts. The Novo tuning-fork contact offers a military-approved design, at an affordable cost. Polarization options include military, center and military, or dual bar.

**DIP (Dual In-Line Package) plugs** provide a permanent connection of ribbon cable to a pc board or mating to DIP sockets. Using the same centerline dimensions as DIP integrated circuits, DIP plugs offer space efficiency and a low profile of .253 [6.43].

**Product Facts**

- **Preassembled housing and cover**
- **One-step termination**
- **End and daisy chain termination**
- **Positive end latching of connector to universal header**
- **Terminates 30 AWG [0.05 mm<sup>2</sup>] solid or stranded and 32 AWG [0.03 mm<sup>2</sup>] stranded .025 [0.64] centerline ribbon cable with PVC insulation**
- **Connectors are RoHS compliant**
- **Recognized under the Component Program of the Underwriters Laboratories, Inc. UL File No. E28476**
- **Certified by the Canadian Standards Association, File No. LR 7189**

The System 50 Ribbon Cable connector is a receptacle connector that will terminate ribbon cable on .025 [0.64] centerlines. It is available in select sizes from 10 to 100 positions and will accommodate 30 AWG [0.05 mm<sup>2</sup>] solid or stranded and 32 AWG [0.03 mm<sup>2</sup>] stranded

conductors with PVC cable insulation.

The housing and cover are of a high temperature tolerant thermoplastic (black) with a UL 94V-0 rating. A phosphor bronze single mating beam contact provides the interconnect between the conductor and the .015 [0.38] square posts

on the .050 x .100 [1.27 x 2.54] grid. The contacts are plated with 30 gold duplex plating. The latching feature is located on the receptacle, not the header, and saves board space and eliminates future problems of "latch height compatibility."

**Note:** All part numbers are RoHS compliant.

Ultra ATA Bus Connectors, .025 [0.64] Centerline Ribbon Cable

Product Facts

- IDC termination
- Backward compatible with current IDE Interfaces
- Improved signal integrity: 1 to 1 signal to ground ratio
- Improved crosstalk when compared to existing IDE Cable Assembly
- Color coded connectors for "System board," and "Master HDD" and "Slave HDD"
- Cable impedance 80 ohms
- Up to 3 connectors per cable assembly
- 15 microinches gold plating
- Recognized under the Component Program of the Underwriters Laboratories, Inc.  UL File No. E28476
- Certified by the Canadian Standards Association,  File No. LR 7189
- Terminates 30 AWG solid or stranded PVC insulated 80 conductor ribbon cable

Ultra ATA is the next generation IDE (Integrated Drive Electronics) bus. The current IDE bus has a maximum data transfer rate of about 16.5 MB/second. As the bus speeds and disk drive performances increase, the cable assembly between the motherboard and hard drive becomes a limiting factor in data transfer from the drive.

The Ultra ATA connector and cable assembly from TE provide the customer with improved electrical performance by creating a 1:1 signal-to-ground ratio. The connector design incorporates an IDC bus bar to common the 40 additional ground signals. The cable is .025" centerline PVC ribbon cable. The connector is fully backward compatible with existing 40-position headers with pin 20 removed on motherboards and disk drives.

The new connectors are color coded to identify:

1. system board connector
2. primary or master hard drive connector
3. slave drive connector

Standard Issues

The Ultra ATA cable performance specification is part of the Small Form Factor Committee No. 8049. Compaq Computer and Western Digital are the major sponsors of the standard.

Contacts Available:

- 80 position IDC contact terminations
- 40 signal contacts
- 40 ground terminations to special IDC bus bar

.025 [0.64] Centerline Ribbon Cable Connectors  
Ultra ATA Bus Connectors

2.0 mm [.079] Receptacle Connectors

Product Facts

- True hard metric 2.0 x 2.0 [.079 x .079] mating grid for 1.0 [.039] pitch ribbon cable
- Wide selection of configurations, 8-50 positions
- Insulation displacement (IDC), beryllium copper contacts, duplex plated gold-over-nickel
- Top/bottom single beam contact orientation
- UL 94V-0 rated thermo-plastic components
- Assemblies are furnished preassembled with termination covers
- Optional polarization
- Optional strain relief available
- Connector assemblies packaged for ease of handling and protection
- Recognized under the Component Program of the Underwriters Laboratories, Inc. UL File No. E28476
- Certified by the Canadian Standards Association, File No. LR 7189

Performance Data

- Durability** — 150 cycles
- Termination Resistance** — 25 milliohms max.
- Mating Force** — 1.67 N max. per contact
- Unmating Force** — 0.14 N min. per contact
- Operating Temperature** — -65°C to +105°C

Technical Documents

- Product Specification**  
108-1372
- Application Specification**  
114-40038

The 2.0 [.079] receptacle connector family features contacts on a true 2.0 x 2.0 [.079 x .079] mating grid for 1.0 [.039] pitch 28 AWG ribbon cable. A variety of configurations are available from 8 through 50 positions. This small, compact connector is finding wide acceptance throughout the electronic industry, particularly in the smaller laptop and notebook type computers with 63.5 [2.5] drives. Other areas of application include point-of-sale terminals, fax machines, photocopiers, printers, consumer electronics, and other computer peripheral equipment.

These receptacles feature insulation displacement contacts (IDC) with a top/bottom single-beam contact orientation. Contacts are beryllium copper, duplex plated 0.00076 [.000030] gold

in the mating area and 0.00254 [.000100] min. tin on termination end, all over 0.00127 [.000050] nickel underplating. Contact mating area is 1.54 [.061] from the face of the housing and they accept 0.50mm [.0197] round or square posts.

Housings are made of UL 94V-0 rated polyester with optional center bar polarization. Complete assemblies are furnished preassembled with termination covers. The complete assembly presents a compact design only 5.2 [.203] wide over the termination cover by 4 [.157] deep by 4 [.157] wide mating end. Terminated height is 8.48 [.334]. Optional strain relief available. Assemblies are packaged for ease of handling and protection.

## 2.0 mm [.079] Receptacle Connectors, Non-Polarized and Center Polarized Bar

### Material and Finish

**Housing and Termination Cover** — UL 94V-0 rated polyester, black

**Contacts** — Beryllium copper, duplex plated 0.00076 [.000030] min. gold on mating end, 0.00013 [.000005] min. gold on termination end, all underplated 0.00127 [.000050] min. nickel

**Note:** Accepts 0.08-0.09mm<sup>2</sup> [28 AWG] ribbon cable, PVC insulated 1.00 [.039] pitch. See Application Specification for details.

Board-to-Board Vertical Receptacles and Headers

Product Facts

- Surface-mount products for parallel board-to-board applications, as well as right-angle board-to-board and cable-to-board applications
- High density .050 x .050 [1.27x1.27] centerline grid
- Three board-to-board stack heights: .250 [6.35], .320 [8.13] and .390 [9.91]
- Non-protrusive metallic holdowns
- Reliable dual beam receptacle contacts for redundant contact
- Duplex plated receptacle and post contacts; gold plated on mating areas, tin plated on tails
- Compatible with standard surface-mount processing (VPR and IR)
- Receptacle and header allow for drainage of processing fluids
- Tape and reel packaging available. Contact TE for details
- Polarized header and receptacle assemblies
- Sizes of 10, 20, 30, 40, 50, 60, 70, 80 and 100 positions
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476
- Certified by Canadian Standards Association File No. LR7189

AMPMODU 50/50 Grid Vertical Headers and Receptacles are designed for parallel board-to-board stacking in high density applications.

Right-angle board-to-board and cable-to-board applications are also possible, since the vertical receptacles also mate with non-latching right-angle headers (page 24) and the vertical headers also mate with non-latching cable connectors.

Available are double row, vertical shrouded headers and receptacles in sizes ranging from 10 through 100 positions (in 10 position increments).

Parallel board-to-board stack heights of .250 [6.35], .320 [8.13] and .390 [9.91] are achievable by selection of the appropriate header. The receptacle is the same for all three stack height headers.

Non-protrusive metallic holdowns are designed for use in .062 [1.57] or thicker

PC boards and allow surface mounting to both sides of the board. In addition to providing retention during processing, the holdowns are soldered during reflow and therefore provide long-term strain relief for the solder joints.

AMPMODU 50/50 Grid Vertical Headers and Receptacles are designed to be compatible with standard surface-mount processes; IR (infrared) and VPR (vapor phase reflow). The surface-mount connectors have been designed so that dimensioning, tolerances, referenced datums,

holddown characteristics and packaging methods result in a system that is compatible with robotic assembly.

The headers and receptacles feature polarization to prevent misalignment.

Board-to-Board Right-Angle Headers

Product Facts

- Surface-mount products for right-angle board-to-board and cable-to-board applications
- Double-row, right-angle shrouded headers
- High density .050 x .050 [1.27 x 1.27] centerline grid
- Latching and non-latching versions available
- Non-protrusive metallic holddowns
- Metallic tabs, when soldered to PC board pad, provide added mechanical support
- Duplex plated post contacts; gold plated on mating area, tin plated on tails
- Compatible with standard surface-mount processing (VPR and IR)
- Standoffs on header housings allow for drainage of processing fluids
- All headers are polarized
- Sizes of 10, 20, 30, 40, 50, 60, 70, 80 and 100 positions
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476
- Certified by Canadian Standards Association File No. LR7189

AMPMODU 50/50 Grid Right-Angle Headers will accommodate a variety of high density packaging applications; right-angle board-to-board applications when mated with vertical receptacles (page 20) and right-angle cable-to-board applications when mated with cable connectors (page 26). The small .050 x .050 [1.27 x 1.27] centerline contact spacing allows efficient use of the PC board area.

Mechanical support of the headers to the PC board is provided by non-protrusive metallic holddowns designed for .062 [1.57] or thicker PC boards. These holddowns are of the same

design as those used in the vertical headers (page 21) and receptacles (page 20). There are also metallic tabs that are soldered to the surfaces of the PC board pads for added support.

AMPMODU 50/50 Grid Right-Angle Headers are available in double-row, in either latching or non-latching versions, and in sizes ranging from 10 through 100 positions (in 10 position increments). The latching version provides positive retention when mated with the latching cable connector (page 26). All headers feature polarization to help prevent misalignment during mating.

Cable-to-Board Connectors

Product Facts

■ Double-row receptacle connectors provide cable-to-board connection capabilities for vertical headers (non-latching) and right-angle headers (latching and non-latching)

■ IDC (Insulation Displacement Crimp) mass termination of solid or stranded round conductor .050 [1.27] centerline ribbon cable with PVC or polyethylene insulation

■ Accommodates ribbon cable conductor sizes of 28 AWG [0.08-0.09 mm²] and 30 AWG [0.05 mm²] and insulation diameters up to .036 [0.91] maximum

■ Reliable single beam receptacle contact design

■ Duplex plated receptacle contacts; gold plated in mating area, tin in termination area

■ Terminating covers (sold separately) provide both strain relief and protection to the termination area

■ Sizes of 10, 20, 30, 40, 50, 60, 70, 80 and 100 positions

■ Connectors available with or without metal latch

■ Connectors without latches are polarized to help prevent mismatching

■ Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476

■ Certified by Canadian Standards Association File No. LR7189

These double-row cable connectors, with a .050 x .050 [1.27 x 1.27] centerline contact spacing, provide cable-to-board connection capabilities for the AMPMODU 50/50 Grid Connector System. Cable connectors without a latch will mate with the vertical headers (page 21), while cable connectors with or without a latch can be used to mate with the right-angle headers (page 24).

The cable connectors feature reliable single-beam IDC (insulation displacement crimp) contacts which are duplex plated with .000030 [0.00076] gold. These contacts can be mass terminated to either solid or

stranded round conductor ribbon cable with conductor sizes of 28 AWG [0.08-0.09 mm²] and 30 AWG [0.05 mm²] and a maximum insulation diameter of .036 [0.91]. During termination, the terminating covers, which must be purchased separately, assist in guiding the wire into the IDC contacts, then provide strain relief when fully seated. Actual termination is accomplished with the TE manual tooling shown on page 28.

The latching version of the cable connector is equipped with a metal latch which provides positive retention of the receptacle cable connector when mated with a surface-

mounted right-angle header. The cable connector without a metal latch features polarization to help prevent mismatching. All connectors are available in sizes ranging from 10 through 100 positions (in 10 position increments).

Cable-to-Board Connectors

Cable-to-Board Receptacle Connectors, Double Row, .050 x .050  
[1.27 x 1.27] Centerline

Material and Finish

**Housing** — Thermoplastic, black, 94V-0 rated

**Latch** — Stainless steel

**Contacts** — Phosphor bronze; duplex plated .000030 [0.00076] minimum gold in mating area, .000150 [0.00381] minimum tin on solder tail, with entire contact underplated .000050 [0.00127] minimum nickel

Cable Connector Terminating Cover,  
Double Row

**Note:** All part numbers are RoHS compliant.

**Application Tooling for Cable Connectors**

The Manual Miniature Application Frame Assembly 91295-1, equipped with a Cover Closing Kit 543518-1, is used for the IDC termination of ribbon cable to the cable connectors shown on page 26.

Prior to termination, the covers must be partially assembled onto a connector housing, the cable inserted between the covers and contacts and the covers preclosed by hand, clamping the cable in place.

In the Manual Miniature Application Frame Assembly, the covers are fully seated to complete the mass termination and provide strain relief for the completed connection.

For tooling information, call Technical Support Center **1-800-522-6752**.

Manual Miniature Application Frame Assembly 91295-1 with Cover Closing Kit 543518-1

**Note:** Refer to TE Instruction Sheets 408-9817 (Frame Assembly 91295-1) and 408-9909 (Cover Closing Kit 543518-1) for complete termination/tooling information.

**Note:** All part numbers are RoHS compliant.

Performance Specifications

Board-to-Board Connectors, Vertical and Right-Angle

- Mating Force** — 6.4 oz (1.78 N) max. per contact
- Unmating Force** — 1.0 oz [0.28 N] min. per contact
- Durability** — Tested to 200 cycles min.
- Current Rating** — (30°C T rise); .5 ampere per contact
- Operating Temperature Range** — -65°C to +105°C
- Termination Resistance** — 16 milliohms max. (initial)
- Insulation Resistance** — 5000 megohms min. (initial)
- Dielectric Withstanding Voltage** — 300 VAC

Cable-to-Board Connectors

- Mating Force** — 6.4 oz (1.78 N) max. per contact
- Unmating Force Without Latch** — .5 oz [0.14 N] min. per contact
- Durability** — Tested to 200 cycles min.
- Current Rating** — (10°C T rise); .5 ampere per contact
- Operating Temperature Range** — -65°C to +105°C
- Termination Resistance** — 25 milliohms max. (initial and final)
- Insulation Resistance** — 5000 megohms min. (initial)
- Dielectric Withstanding Voltage** — 300 VAC

Technical Documents

Various technical documents are available for your use:

**Product Specifications** describe technical performance characteristics and verification tests. They are intended for the Design, Component and Quality Engineer.

Micro-MaTch Miniature Connector System

Micro-MaTch Miniature Connector System

Features/ Benefits

- Available in 2 to 20 positions
- Applicable Wire: 20~28 AWG
- Wire connectors supplied on-tape and suitable for mass termination of 28 AWG [0.08 mm<sup>2</sup> to 0.09 mm<sup>2</sup>] ribbon cable
- Tin plated contact design
- Guaranteed minimum contact force of 2.0 N
- Fretting corrosion proof thanks to additional positioning spring member
- Full range of application tooling from hand tool to fully automated equipment

1. Contact Pin
2. Contact Spring
3. Positioning

Miniaturization and the trend towards higher density of electronic functions on a substrate led to the introduction of smaller interconnection systems. The Micro-MaTch connector family, with its contact spacing of 1.27 mm, fully complies with the electronic packaging requirements of today and the future. The system offers a range of board and wire connectors, enabling a variety of wire-to-board and board-to-board interconnections. The Micro-MaTch contact concept shown on this page is essentially different from other systems available.

By its design the traditional failure mode in tin plated connections, fretting corrosion, is prevented. Due to an additional positioning spring in the female part,

relative movements caused by vibrations/thermal expansion between male and female contacts are absorbed. By preventing movements on the contact spot, a gas tight connection can be guaranteed under all circumstances. The contact spring is located in the board connector and not in the cable connector, which is usually the case. The counter part, incorporated in the cable connector, is a simple pin, either with an insulation displacement section, suitable for the mass-termination of cable or with a kinked solder leg to be soldered onto a PC Board. The separation of these two basic functions of the contact system — contact force generation and wire termination — enables the independent

optimization of both functions and also leads to relatively simple contact shapes. Because of their shapes contacts can be post-plated, leaving no bare edges in the contact and wire slot area. The contact spring system features an additional spring member — the positioning spring — which compensates positional tolerances. In this way the contact spring can be fully optimized for its basic function, so that the relatively high contact force, required for tin plated contact systems, can be guaranteed under all circumstances. The Micro-MaTch contact spring system is absolutely fretting corrosion proof by its design.

**Micro-MaTch Miniature Connector System —  
Female-on-Board Connector, Top Entry**

This connector version incorporates the patented Micro-MaTch contact spring system and is designed to be soldered onto PC Boards with a nominal thickness of 1.6 mm.

The solder legs are indented, providing firm retention of the connector before and during the soldering operations.

As polarization is accomplished directly between the Micro-MaTch male connectors and the PC Board, this top entry female connector does not have any polarizing features. Therefore, the orientation of the connector on the PC Board is irrelevant.

**Notes:**

1. Connectors are always sideways mounted onto an adhesive tape.
2. Standard packaging quantity is 2500 connectors on a reel with a diameter of 600 mm.
3. At additional charge a special packaging option is available: 250 connectors on a reel with a diameter of 250 mm, packed in a dedicated dispenser box.

**Mates with:**

**X-338095-X**  
**X-215083-X**  
**X-215464-X**  
**X-338728-X**

Micro-MaTch Miniature Connector System —  
Female-on-Board Connector, Side Entry

This connector version is identical to the top entry version with two exceptions:

- The solder legs are parallel to the mating face of the connector instead of perpendicular.
- It's housing is polarized, so that polarization is accomplished directly between the two mating connectors. Proper orientation of the connectors on the PC Board is relevant here.

Notes:

1. Connectors are always sideways mounted onto an adhesive tape.
2. Standard packaging quantity is 2500 connectors on a reel with a diameter of 600 mm.
3. At additional charge a special packaging option is available: 250 connectors on a reel with a diameter of 250 mm, packed in a dedicated dispenser box.

Micro-MaTch Miniature Connector System —  
Female-on-Board Connector, Side Entry

**Micro-MaTch Miniature Connector System —  
Female-on-Board Connector Surface Mount Device (SMD)**

This SMD connector version is designed for standard reflow and infrared solder processes (“FULL SMD”). Polarization is accomplished by the housing, therefor no polarization holes in the PC Board are required.

The contact is designed with an additional spring to compensate for differences in thermal expansion between housing and PCB. Due to this feature, tension on solder joints is prevented.

**Notes:**

1. To enable automatic Pick & Placement, connectors are always packed in embossed tape according EIA481 specification.
2. Standard packaging quantity is 900 pcs on a reel with a diameter of 330 mm.
3. Connectors are supplied with or without a feature for vacuum Pick & Placement.
4. For this connector no additional solder hold down is required.

Micro-MaTch Miniature Connector System —  
Male-on-Board Connector

This male connector version is designed to be soldered onto PC Boards with a nominal thickness of 1.6 mm.

The solder legs are indented for firm retention of the connector in the PC Board.

The connector housing features a polarizing pin on one end for proper orientation of this connector version.

## Micro-MaTch Miniature Connector System — Male-on-Wire Connector

For the wire connection, a well-known type blade with a single slot is used. The insides of the slots are tin plated for stable and reliable connections.

The connector is supplied with a pre-assembled cover, providing excellent positioning of the ribbon cable before and during the insulation displacement process.

After termination the cover is held in place by each individual contact in addition to two plastic latches at both ends of the connector.

### Remark:

The Micro-MaTch Male-on-Wire connector is specifically designed to be disengaged from its counterpart by pulling the cable in the appropriate direction.

### Notes:

1. Connectors are always sideways mounted onto an adhesive tape.
2. Standard packaging quantity is 2500 connectors on a reel with a diameter of 600 mm.
3. At additional charge a special packaging option is available: 250 diameter of 250 mm, packed in a dedicated dispenser box.

Micro-MaTch Miniature Connector System —  
Paddle Board Connector

Direct soldering of a ribbon cable onto a PC Board is a very difficult job with the smaller sizes of ribbon cable. If such a permanent cable connection is required, the application can be facilitated by using this connector type.

The Paddle Board connector is applied to the ribbon cable with the same application tooling, available for the termination of the Male-on-Wire connector.

The solder legs are indented and provide mechanical retention of the connector/cable assembly in the PC Board before and during soldering.

This Paddle Board connector version is designed to be soldered onto PC Boards with a nominal thickness of 1.6 mm.

Notes:

1. To enable automatic Pick & Placement, connectors are always packed in embossed tape according EIA481 specification.
2. Standard packaging quantity is 900 pcs on a reel with a diameter of 330 mm.
3. Connectors are supplied with or without a feature for vacuum Pick & Placement.
4. For this connector no additional solder hold down is required.

Micro-MaTch Miniature Connector System —  
Crimp On Snap In (COSI) Connector

Basic Part Number 338095  
and Contacts Part Numbers  
338096 and 338097

This crimp version for discrete Wire-to-Board applications is fully compatible with all female connectors of the Micro-MaTch family.

Insulation and wire crimp barrel are copies of the well proven AMPLIMITE contacts. After mating with a Micro-MaTch female connector the contacts are fully protected by isolating plastics. Contacts are made of a pre-tinned phosphor bronze.

Contacts are supplied in a range for 24-20 AWG and 28-24 AWG. For repair operations an extraction tool is available; Part Number 734873-1.

Notes:

1. Contacts can be crimped using a G-terminator or mini stripper crimper based applicator.
2. For the contacts on strip the standard packaging quantity is 15.000 pcs on a reel with a diameter of 600 mm.
3. For repair/service contacts are packaged 750 pcs. Per reel, to be used with handtools.
4. The housings are bulk packed in a box with a packaging quantity varying from 200 to 900 pcs per box.

Micro-MaTch Miniature Connector System — Specials

SMC Connector Part Number 100411

This connector type enables a solderless application to the printed circuit board. Contact is made on the surface of the PCB, enabling the use of paperphenol and epoxy boards with both drilled and punched holes. This connector is suitable for both Wire-to-Board as Board-to-Board connections. Because this connector is mounted on the solder side, the components of both PCB's in a parallel Board-to-Board application, will be in the same direction. By this, the stacking of two or more PCB's is possible. Application tooling available on request.

X-338095-X

Locking Latch Part Numbers 338068/338069/338070

For Wire-to-Board applications this feature provides an audible click during mating. This feature is available for the standard Micro-MaTch female connectors. Cross reference is made by base part number x-338068-x instead of x-215079-x, x-338069-x instead of x-188275-x and x-338070-x instead of x-215460-x (standard large reel packaging only).

Mates with: X-338095-X X-338728-X  
X-215464-X X-215083-X

In-board SMD Part Number 188431

This connector is only tooled in 20 position (9-188431-0) and packaged in embossed tape according to EIA481 standards. The connectors are equipped with a feature for vacuum Pick & Placement. It enables the mounting of a PCB with the solder side direct behind e.g. a display. It is also possible to obtain a parallel BTB application with an extreme low PCB distance of 4.2 mm.

Mates with: X-338095-X X-338728-X  
X-215464-X X-215083-X

Male SMD Part Number 338728

This connector enables the possibility to have a full SMD to SMD Board-to-Board application. It mates with all Micro-MaTch female connectors, and will be packaged according EIA 481 standard. Consult TE for more information.

Mates with: X-215079-X X-338070-X  
X-215460-X X-188431-X  
X-188275-X X-338068-X  
X-338069-X

Micro-MaTch Miniature Connector System —  
Specials

Micro-MaTch Miniature Connector System Application Tooling

**Pistol Handgrip Tooling.** This is a handtool for terminating Micro-MaTch Male-on-Wire and Paddle Board connectors. Meant for small quantities or repair services. Pistol handgrip and adapter must be ordered separately.

**Standard Pistol Handgrip Part Number 734155-1.** This basic tool can be used for Micro-MaTch and other applications.

**Pistol Handgrip Adapter Set Part Number 734024-1.** This adapter can be used for Micro-MaTch terminations, together with the pistol handgrip.

**Bench Press Tooling Part Number 733280-3.** This complete tool includes a Micro-MaTch dedicated tool set mounted on the bench press 654173-2.

**Bench Press Part Number 91085-2.** This basic press is a hand operated version. This press can also be obtained in a pneumatically operated version; Part Number 91112-3.

**Bench Press Tool Set Part Number 733278-2.** This tool set is designed especially for Micro-MaTch. It fits both pneumatically and hand operated press.

**COSI Hand Tooling Part Number 734870-1** for 24-20 AWG, and **Part Number 734870-2** for 28-24 AWG. These dedicated tools can be obtained for services/repair applications.

**G-terminator Part Number 677-499-1.**

**Applicators for G-terminator. Part Number 677894-1** for AWG 28-24 (Part Number 338096-1) and **Part Number 677895-1** for AWG 24-20 (Part Number 338097-1).

**Micro-MaTch Miniature Connector System Application Tooling** (Continued)

**Semiautomatic Tooling Part Number 677410-1.**  
This tool can be used for Micro-MaTch lead end and for daisy chain assembly applications.

**Semiautomatic Tooling Part Number 677412-5** for Micro-MaTch only and **Part Number 1-677412-0** for both Micro-MaTch and other ribbon cables. This machine can be used for lead end assemblies.

**Connector Dispenser Part Number 677463-1.**  
The dispenser accepts the Micro-MaTch standard reels (2500 pcs/reel). It automatically removes the pre-set connector quantity from the reel and drops it in a separate box. Quantity can easily be programmed by the user.

Micro-MaTch Miniature Connector System  
Application Tooling

**Micro-MaTch Miniature Connector System Lead Assembly**

It is possible to deliver custom made Micro-MaTch lead assemblies, both cable end assemblies and daisy-chain assemblies, in all positions between 4 and 20 in all required cable lengths. All leads are 100% electrically tested on shortcut and connection before shipment. A flexible 7 stranded cable is used for easy assembly. Special cable on request. For order information contact TE.

**Micro-MaTch Miniature Connector System Sample Box**

**Sample Box  
Part Number 1377074-1**

This box includes samples of all connector types within the Micro-MaTch family, examples of leads, printed circuit boards and a CD-ROM. The CD-ROM includes an electronic version of this catalogue, an animation of the contact principle and CAD files of all connector types.

This sample box is an aid in visualizing the variety of applications where Micro-MaTch can be implemented.

Universal I/O Pin Connectors without Mounting Ears

Novo Connectors

Product Facts

- .100 x .100 [2.54 x 2.54] mating grid for .050 [1.27] pitch ribbon cable
- Tuning fork contact offers a military approved design, at an economical cost
- Polarization options include military, center and military, and dual bar
- Choice of duplex gold plating on contact mating area
- Insulation displacement contacts for fast, economical mass terminations
- Contact design provides uniform latching of contacts and housing with connector cover
- Housing, cover and strain relief made of UL 94V-0 rated thermoplastic material
- Selected 10 thru 64-position configurations available
- Accepts wire size range 28-26 AWG [0.08-0.15 mm²], solid or stranded
- Snap-on strain relief and choice of pull loops available
- One-step termination with Novo tooling
- Recognized under the Component Program of the Underwriters Laboratories, Inc. UL File No. E28476
- Certified by the Canadian Standards Association, File No. LR 7189

Novo receptacles offer a dual contact interface with all normal force created by metal-to-metal contact. This provides a higher degree of contact reliability.

Novo receptacles feature two rows of contacts on .100 x .100 [2.54 x 2.54] centerlines in select sizes from 10 to 64 positions. Contacts mate with .025<sup>2</sup> [0.64<sup>2</sup>] or round posts with .245 [6.22] max. and .175 [4.45] min. lengths. The Novo tuning fork contact offers a military-approved design, and at a lower cost.

Contacts are made of phosphor bronze and are available in a choice of duplex .000015 [0.00038] or .000030 [0.00076] gold in the mating area, and .000100 [0.00254] tin in the termination area, with the entire contact underplated with .000050 [0.00127] nickel.

Housings are made of UL 94V-0 thermoplastic material and feature military, military and center, and dual bar polarization.

Optional accessories include a snap-on strain relief and pull loops.

Novo receptacles can be terminated to .050 [1.27] pitch ribbon cable by a wide variety of one-step application tooling.

Assemblies are packaged in tubes for ease of handling, protection and termination.

Novo Receptacles, Military Polarized\* .100 x .100 [2.54 x 2.54] Centers

Housing Assembly with Cover (Preassembled) and Strain Relief (Optional)

Contacts mate with .025 [0.64] sq. or round pins with .245 [6.22] max. and .175 [4.45] min. lengths.

<sup>1</sup>.000015 [0.00038] gold or gold flash over palladium-nickel .000015 [0.00038] min. total on post/pin mating end, .000100-.000200 [0.00254-0.00508] tin on termination end, with entire contact underplated .000050 [0.00127] nickel.  
<sup>2</sup>.000030 [0.00076] gold or gold flash over palladium-nickel .000030 [0.00076] min. total on post/pin mating end, .000100-.000200 [0.00254-0.00508] tin on termination end, with entire contact underplated .000050 [0.00127] nickel.  
**Note:** These receptacles include a housing assembly and cover (preassembled). Strain reliefs may be purchased separately using the component part nos. listed above.  
All part numbers are RoHS compliant.

.050 [1.27] Centerline Ribbon Cable Connectors  
Novo Connectors

**Housing Assembly with  
Recessed Cover  
(Preassembled) and Strain  
Relief (Optional)**

**Housing, Cover & Strain Relief** —  
UL 94V-0 rated thermoplastic, black

**Contacts** — Phosphor bronze, duplex plated .000030 [0.00076] gold or gold flash over palladium-nickel .000030 [0.00076] min. total on post/pin mating end, .000100-.000200 [0.00254-.000508] tin on termination end, with entire contact underplated .000050 [0.00127] nickel.

## Mateable Pin Headers —

**Universal** — pages 84-95  
**Low Profile** — pages 76-83

**LOW PROFILE** — pages 76-83

**Mateable Universal I/O Pin Connectors** — pages 45 and 46

## Pull Tabs — page 63

Keying Plug — page 64

**Pull Loops** — page 66

**Application Tooling** — pages 70-74

## Product Specifications

108-40000 Novo and Novo Stackable  
Receptacles; 108-40004 Ribbon Cable,  
PVC Insulated

## Application Specification

## 114-40005 Novo Receptacles

## Instruction Sheets

Instructional material covering operation, setup, maintenance, repair, etc. is included with each machine, tool or die set. If this material is required prior to receiving your tooling, call TE at the numbers listed below for the applicable documents.

**Note:** All part numbers are RoHS compliant.

Female Socket Connectors, .100 x .100 [2.54 x 2.54] Centers, 622 and 636 Series

Technical Data

**Color** — 622 Series, Blue; 636 Series, Black

**Contact Material** — 622 Series, Beryllium copper; 636 Series, Phosphor bronze

**Contact Plating** — 622 Series, .000030 [0.00076] min. gold on mating end, .000100-.000200 [0.00254-0.00508] tin on termination end, both over .000050 [0.00127] nickel underplate; 636 Series, .000015 [0.00038] min. gold on mating end, .000100-.000200 [0.00254-0.00508] tin on termination end, both over .000050 [0.00127] nickel underplate.

**Housing Material** — Glass-filled thermoplastic, UL 94V-0 rated

**Cable** — 26-28 AWG solid or stranded, PVC insulated ribbon cable

**Mateable Connectors** — Universal and Low Profile Pin Headers — pages 76-95

**Universal I/O Ribbon Cable Connectors** — pages 45 and 46

**Polarization** — Military and center polarized only

■ **Recognized under the Component Program of the Underwriters Laboratories, Inc.**  UL File No. E60980

■ **Certified by the Canadian Standards Association.**  File No. LR 92984

Application Tooling

**Die** — 1437000-9 [T&B# 779-2151 ref.]

**Handtool** — 1437000-6 [T&B# 779-2100 ref.]

**Bench Press (Manual)** — 1437001-4 [T&B# 779-3200 ref.]

**Bench Press Platen** — 5-1437000-6 [T&B# 779-3130 ref.]

**Bench Press Base Plate** — 6-1437000-4 [T&B# 779-3151 ref.]

Accessories

.050 [1.27] Centerline Ribbon Cable Connectors  
Female Socket Connectors, .100 x .100 [2.54 x 2.54] Centers, 622 and 636 Series

Female Socket Connectors, .100 x .100 [2.54 x 2.54] Centers, 609 Series

Technical Data

**Color** — Blue  
**Contact Material** — Beryllium copper  
**Contact Plating** — .000030 [0.00076] min. gold on mating end, .000100-.000200 [0.00254-0.00508] tin on termination end, both over .000050 [0.00127] nickel underplate.  
**Housing Material** — Glass-filled thermoplastic, UL 94V-0 rated  
**Cable** — 28-30 AWG solid or stranded, PVC insulated ribbon cable  
**Mateable Connectors** —  
**Universal and Low Profile Pin Headers** — pages 76-95  
**Universal I/O Ribbon Cable Connectors** — pages 45 and 46  
**Polarization** — Military only or military and center polarized

- **Recognized under the Component Program of the Underwriters Laboratories, Inc.**  UL File No. E60980
- **Certified by the Canadian Standards Association,**  File No. LR 92984

Application Tooling

**Die** — 1437000-9 [T&B# 779-2151 ref.]  
**Handtool** — 1437000-6 [T&B# 779-2100 ref.]  
**Bench Press (Manual)** — 1437001-4 [T&B# 779-3200 ref.]  
**Bench Press Platen** — 5-1437000-6 [T&B# 779-3130 ref.]

**Note:** These part numbers are listed on TE customer drawing 1-1437026-9.

Accessories

**Note:** All part numbers are RoHS compliant.

**Ribbon Cable Assembly Machines (R-CAM)**

**Product Facts**

- **Terminates 28 AWG**  
[0.08 mm<sup>2</sup>] .050 [1.27]  
centerline and 30 AWG  
[0.05 mm<sup>2</sup>] .025 [0.64]  
centerline cable to a variety  
of connectors
- **Automatic in-process  
electrical testing — tests all  
circuits for opens, shorts  
and high-voltage breakdown  
(up to 1,000 volts for  
receptacles, 800 volts for  
card edge connectors and  
300 volts for .025 [0.64]  
centerline connectors);  
rejects cable assemblies  
failing any of these tests**
- **Operated by a user-friendly,  
interactive touchscreen —  
or a keyboard on the  
R-CAM 4**
- **Self-diagnostics shut  
down the machine when a  
malfunction occurs, pinpoint  
the malfunction, and  
identify it on the screen**
- **Produced under a Quality  
Management System  
certified to ISO 9001**

A copy of the  
certificate is available  
upon request.

The R-CAM 4, pictured above, is the newest fully automatic Ribbon Cable Assembly Machine for producing and testing daisy-chained ribbon cable assemblies. Enhancements of this model include the capability to process pre-manufactured slit-and-twist cable and the ability to produce assemblies with up to 10 connectors.

The R-CAM 2A, 3A, and 4 terminate 28 AWG [0.08 mm<sup>2</sup>], .050 [1.27] centerline cable to a variety of connectors. The R-CAM 4 will also terminate 30 AWG [0.05 mm<sup>2</sup>] .025 [0.64] centerline cable.

All of the R-CAM models automatically perform an in-process electrical test of all circuits for opens and shorts. In addition, all models automatically test the assembly for high-voltage breakdown up to 1,000 volts, depending on the

machine and connector style. The purpose of this test is to detect gaps that may have been created during assembly that could eventually short out when in use. If an assembly fails any of these tests, the machine will shear the cable off at that point and automatically discard it into an alternate bin.

These machines are programmed and operated with an interactive touchscreen that allows operators to access manual, set-up, run, and edit modes through easy-to-follow menu-driven prompts.

Self-diagnostics shut down the machine if a malfunction — such as misloaded connectors or incorrectly fed cable — is detected, pinpoint the malfunction, and identify it on the touchscreen.

Models 2A and 3A are available in 120 or 220 VAC, 8 A,

50 or 60 Hz. Model 4 operates at 120 or 220 VAC, 50-60 Hz, single phase, 15A.

The R-CAM 2A and 3A require a minimum air supply of 80 psi [5.52 bar] at 8 scfm [0.0038m<sup>3</sup>/s]. The R-CAM 4 requires 80 psi [5.52 bar] at 12 scfm [0.0057 m<sup>3</sup>/s].

**Need more information?**

For more information, specifically about tooling, call TE at the numbers listed below.

Application Tooling

Application Tooling

**Manual Arbor Frame  
Assembly,  
Part No. 91085-2**

Bench frame for applying a variety of IDC connectors, including AMPMODU MT and CHAMP. Features adjustable ram and handle, and a slide base. Tooling is mounted to the ram and into the tracks of the base plate.

**Hand Tool Kit—Part No. 768340-1**

Terminating kit for .050 [1.27] centerline ribbon cable with 28 or 26 AWG [0.08 or 0.15 mm<sup>2</sup>] stranded or solid, or 30 AWG [0.05 mm<sup>2</sup>] solid conductors. Includes commercial grade hand tool with ratchet control for complete termination cycle, base assembly, bench-mount, tooling sets for standard and Novo receptacles, card edge connectors and D-Sub HDF low-profile connectors, and a carrying case.

**Pneumatic Auto-Cycle  
Unit, Part No. 91112-3**

Basically an air-powered version of Manual Arbor Frame Assembly 91085-2. Features adjustable ram and cycle time, and automatic cycling when the lower assembly is slid into the frame to the rear of the base plate. Includes a guard around the frame opening.

**Tooling Instruction Sheets**

- 408-7777**—Manual Arbor Frame Assembly
- 408-6732**—Pneumatic Auto-Cycle Assembly
- 408-9828**—Hand Tool Kit 768340-1 for Connector-Specific Kits

**Pneumatic Foot Pedal Unit  
Part No. 91112-2**

Foot pedal indicates cycle—features adjustable ram and cycle time.

Low Profile Headers

Product Facts

- Available in selected positions 10 thru 60
- Flame retardant, thermoplastic housings, 94V-0 rated
- Vertical and right-angle versions available in double row configurations
- Available in .025 [0.64] square drawn wire posts
- Wash out clearance for flux removal
- Mates with Ribbon Cable Connectors
- Available with and without eject latches
- Available with and without “kinked” soldertails for PCB retention
- Headers are recognized under the Component Program of Underwriters Laboratories Inc. File No. E28476 
- Headers are certified by Canadian Standards Association, File No. LR 7189 
- Low profile IDC headers are recognized under the Component Program of Underwriters Laboratories Inc. File No. E60980, Vol. 5 

Performance Characteristics

Electrical

- Insulation Resistance** — 5,000 megohms minimum initial
- Dielectric Withstanding Voltage** — 1,000 V rms at sea level
- Current** — 1 ampere maximum per contact
- Operating Voltage** — 250 VAC

Environmental

- Operating Temperature** — -65°C to +105°C

.100 x .100 [2.54 x 2.54] Centerlines (Continued)

Right-Angle PCB Mount  
.025 [0.64] Square Post  
(Mating End)

Material and Finish

**Housing** — Glass-filled nylon,  
UL 94V-0 rated, black

**Posts** — Brass, plated as follows:

**Plating A** — Duplex plated, gold flash  
over palladium-nickel, .000030  
[0.00076] min. total on mating surfaces,  
.000100 [0.00254] min. tin on solder  
area, with entire post underplated  
.000050 [0.00127] min. nickel  
**or** .000030 [0.00076] min. gold on  
mating surfaces, .000100 [0.00254]  
min. tin on solder area, with entire post  
underplated .000050 [0.00127] min.  
nickel

**Plating B** — Duplex plated, gold flash  
over palladium-nickel, .000015  
[0.00038] min. total on mating surfaces,  
.000100 [0.00254] min. tin on solder  
area, with entire post underplated  
.000050 [0.00127] min. nickel  
**or** .000015 [0.00038] min. gold on  
mating surfaces, .000100 [0.00254]  
min. tin on solder area, with entire post  
underplated .000050 [0.00127] min.  
nickel

Note: All part numbers are RoHS compliant.

Right-Angle PCB Mount  
.025 [0.64] Square Post  
(Mating End)

Material and Finish

**Housing and Eject Latches** —  
PBT, UL 94V-0 rated, blue

**Posts** — Phosphor bronze, plated as  
follows:

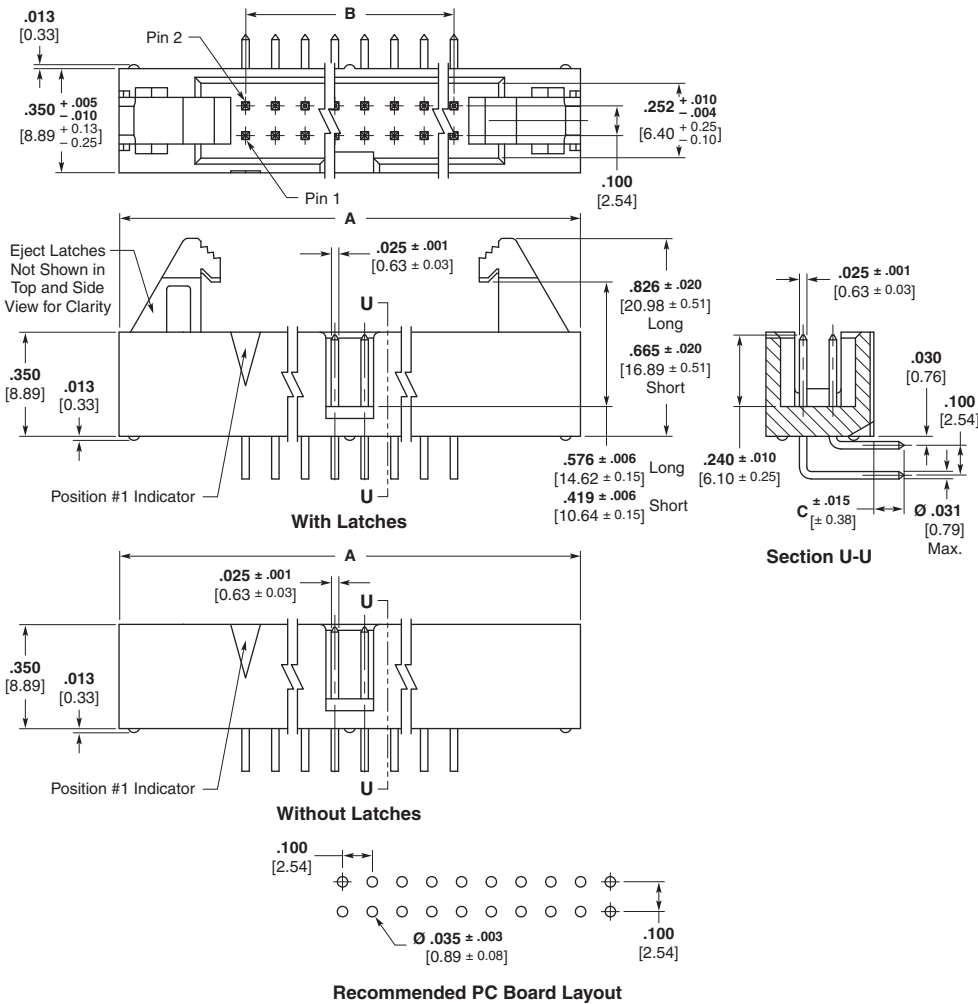

**Plating** — Duplex plated, .000030  
[0.00076] min. gold on mating surfaces,  
.000100 [0.00254] min. tin on solder  
area, with entire post underplated  
.000050 [0.00127] min. nickel

- Notes:**
1. Pin headers in 10- and 14-position sizes have only one slot for snap-in polarizer (military polarization), located as shown.
  2. Pin headers in 10-position size have only slot for dual polarization, located as shown.
  3. For information regarding latch/pin header applications and for ordering latches separately, refer to page 96.

**Plating Code A** — Gold flash over palladium-nickel plate, .000015 [0.00038] min. total on the mating surfaces, .000100 [0.00254] min. tin plate on the soldertails, over .000050 [0.00127] min nickel underplate **or** .000015 [0.00038] min. gold on the mating surfaces, .000100 [0.00254] min. tin plate on the soldertails, over .000050 [0.00127] min. nickel underplate.

**Plating Code B** — Gold flash over palladium-nickel plate, .000030 [0.00076] min. total on the mating surfaces, .000100 [0.00254] min. tin plate on the soldertails, over .000050 [0.00127] min nickel underplate **or** .000030 [0.00076] min. gold on the mating surfaces, .000100 [0.00254] min. tin plate on the soldertails, over .000050 [0.00127] min. nickel underplate.

**Note:** All part numbers are RoHS compliant.

Universal Ejection Style Pin Headers

Military, Center and Dual Polarized, Vertical Mount

Universal Ejection Style Pin Headers, Military, Center and  
Dual Polarized, .100 x .100 [2.54 x 2.54] Centerlines (Continued)

Mounting Information

4-24 self-tapping screws and 2-56 bolts and nuts are available for mounting straight-thru pin headers of pc boards. Typical applications and part nos. for ordering this hardware are presented below.

Recommended Mounting Hole Pattern  
For Vertical PCB Mount Headers

PC board thicknesses are : .062 [1.57] for .110 [2.79] long posts,  
.125 [3.18] for .155 [3.94] long posts.

**Note:** 2-56 bolts and nuts may be used to mount pin headers with and without latches. If latches are to be used, the bolts must be positioned in the pin header before the latches are installed.

Pin Header Mounting using 4-24 Self-Tapping Screws:  
Part No. 19156-1 (for .062 [1.57] Thick PC Board)  
19156-2 (for .093 [2.36] Thick PC Board)  
19156-3 (for .125 [3.18] Thick PC Board)

Pin Header Mounting with 2-56 Bolts and Nuts:  
Part No. 746383-1 (Bolt Only)  
Kit No. 102198-1 (Bolt and Nut, 2 Each per Kit)

**Note:** All part numbers are RoHS compliant.

- Notes:** 1. Pin headers in 10- and 14-position sizes have only one slot for snap-in polarizer (military polarization), located as shown.  
2. Pin headers in 10-position size have only slot for dual polarization, located as shown.  
3. For information regarding latch/pin header applications and for ordering latches separately, refer to page 96.

**Notes:**

1. Pin headers in 10- and 14-position sizes have only one slot for snap-in polarizer (military polarization), located as shown.
2. Pin headers in 10-position size have only slot for dual polarization, located as shown.

## Military, Center and Dual Polarized, Right-Angle Universal Ejection Style Pin Headers

**Plating Code A** — Gold flash over palladium-nickel plate, .000015 [0.00038] min. total on the mating surfaces, .000100 [0.00254] min. tin plate on the soldertails, over .000050 [0.00127] min nickel underplate **or** .000015 [0.00038] min. gold on the mating surfaces, .000100 [0.00254] min. tin plate on the soldertails, over .000050 [0.00127] min. nickel underplate.

**Plating Code B** — Gold flash over palladium-nickel plate, .000030 [0.00076] min. total on the mating surfaces, .000100 [0.00254] min. tin plate on the soldertails, over .000050 [0.00127] min nickel underplate **or** .000030 [0.00076] min. gold on the mating surfaces, .000100 [0.00254] min. tin plate on the soldertails, over .000050 [0.00127] min. nickel underplate.

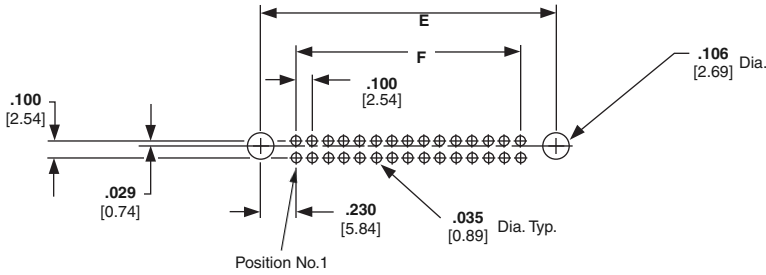

**Note:** All part numbers are RoHS compliant.

Universal Ejection Style Pin Headers, Military, Center  
and Dual Polarized, .100 x .100 [2.54 x 2.54] Centerlines (Continued)

Mounting Information

No mounting hardware  
is supplied by TE.

Recommended Mounting Hole Pattern  
For Right-Angle PCB Mount Headers

PC board thicknesses are : .062 [1.57] for .110 [2.79] long posts,  
.125 [3.18] for .155 [3.94] long posts.

Military, Center and Dual Polarized, Right-Angle  
Universal Ejection Style Pin Headers

Universal Ejection Style Pinless Headers, Military, Center and Dual Polarized, .100 x .100 [2.54 x 2.54] Centerlines

Vertical PCB Mount  
.025 [0.64] Sq. Posts  
(without latches)

Pinless Header

Material and Finish

Housing — Black PBT or nylon,

**Notes:** 1. 10- and 14-position pinless headers have only one slot for snap-in polarizer (military polarization).  
2. 10-position pinless headers have only one slot for dual polarization.  
3. For information regarding latch/pin header applications and for ordering latches separately, refer to page 96.  
All part numbers are RoHS compliant.

**Note:** All part numbers are RoHS compliant.

Universal Ejection Style Pinless Headers, Military, Center  
and Dual Polarized, .100 x .100 [2.54 x 2.54] Centerlines (Continued)

Installation of Press-Fit  
Pinless Headers

Insertion Instructions:

1. Place pinless header over preinstalled posts so that post tips start into header cavities.
2. With bottom of pc board supported, place steel block over header. Steel block must be wider and longer than header so that it covers all four sides of the header. However, for headers with latches pre-assembled, the steel block must not interfere with the latches.
3. Apply an even, centered force on steel block until header bottoms on pc board. If posts are longer than .545 [13.84], they may be forced against the steel block before the header is fully seated. In this situation, extreme caution must be taken so that posts are not damaged or pushed out of the pc board.

**Insertion Force:** 60 lb. [267 N] max.

**Retention Force:** 20 lb. [89 N] min.

TE recommends the use of a typical manual frame assembly for insertion of pinless headers. The frame assembly and steel block are not supplied by TE.
