## FRACTIONAL-N PLL WITH INTEGRATED VCO, 12.4 - 13.4 GHz

### General Description

The HMC807LP6CE is a fully functioned Fractional-N Phase-Locked-Loop (PLL) with an Integrated Voltage Controlled Oscillator (VCO). The input reference frequency range is 100 kHz to 220 MHz while the advanced delta-sigma modulator design in the fractional PLL allows both ultra-fine step sizes and very low spurious products. The highly integrated structure provides excellent phase noise performance over temperature, shock and process. The HMC807LP6CE is packaged in a leadless QFN 6 x 6 mm surface mount package. The output power is 8 dBm typical, making the HMC807LP6CE ideal for driving the LO port of many of Hittite's Hi Linearity and I/Q mixer products.

For theory of operation and register map refer to the "PLLs w/ Integrated VCO - Microwave VCOs" Operating Guide. To view the [Operating Guide](#), please visit [www.hittite.com](http://www.hittite.com) and choose HMC807LP6CE from the "Search by Part Number" pull down menu.

**Electrical Specifications,  $T_A = +25^\circ\text{C}$ ; VCCVCO, VDDCP, VCCCP = +5V; AVCC, VCCPS VDDPFD, AVDD, RVDD, DVDD, DVDDM, DVDDQ, VDDIO = +3.3V; AGND = DGND = 0V**

| 34                | VCCPS                  | Analog Power Supply for Prescaler, Nominally 3.3V                                                                                                        |
| 35                | DVDDM                  | Digital Power Supply for M-Counter, Nominally 3.3V                                                                                                       |
| 38                | RFOUT                  | RF output (AC coupled).                                                                                                                                  |

[1] This pin is not connected internally, however, this pin must be connected to GND to maintain product family pin for pin compatibility.

[2] This pin is not connected internally, however, this pin must be connected to Vcc to maintain product family pin for pin compatibility.

[3] BIAS ref voltage (pin 20) cannot drive an external load, and must be measured with a 10 GOhm meter such as Agilent 34410A; a typical 10 Mohm DVM will read erroneously.

**FRACTIONAL-N PLL WITH  
INTEGRATED VCO, 12.4 - 13.4 GHz**

**Evaluation PCB**

The circuit board used in the application should use RF circuit design techniques. Signal lines should have 50 Ohm impedance while the package ground leads and exposed paddle should be connected directly to the ground plane similar to that shown. A sufficient number of via holes should be used to connect the top and bottom ground planes. The evaluation circuit board shown is available from Hittite upon request.

| C37                                                                                                     | 0.039 $\mu$ F Capacitor, 0603 Pkg.                |
| C47, C73                                                                                                | 10,000 pF Capacitor, 0402 Pkg.                    |
| C57                                                                                                     | 22 $\mu$ F Tantalum Capacitor, Case D             |
| C58, C59                                                                                                | 4.7 $\mu$ F Tantalum Capacitor, Case B            |
| C61                                                                                                     | 3900 pF Capacitor, 0402 Pkg.                      |
| FB1 - FB4                                                                                               | 1000 Ohm 200 mA Ferrite Chip, 0805 Pkg.           |
| R1, R8                                                                                                  | 100k Ohm Resistor, 0402 Pkg.                      |
| R2, R7                                                                                                  | 120 Ohm Resistor, 0402 Pkg.                       |
| R3, R17, R20, R41                                                                                       | 1k Ohm Resistor, 0402 Pkg.                        |
| R4                                                                                                      | 620 Ohm Resistor, 0402 Pkg.                       |
| R5, R14, R15, R18, R19                                                                                  | 10k Ohm Resistor, 0402 Pkg.                       |
| R6                                                                                                      | 56 Ohm Resistor, 0402 Pkg.                        |
| R9                                                                                                      | 10 Ohm Resistor, 0402 Pkg.                        |
| R10, R22, R23                                                                                           | Zero Ohm Resistor, 0402 Pkg.                      |
| R11, R16, R40                                                                                           | 4.02k Ohm Resistor, 0402 Pkg.                     |
| R13                                                                                                     | 200 Ohm Resistor, 0402 Pkg.                       |
| R21                                                                                                     | 30 Ohm Resistor, 0402 Pkg.                        |
| TP1 - TP6                                                                                               | Test Point PC Compact SMT                         |
| U1                                                                                                      | HMC764LP6CE Fractional-N PLL, with Integrated VCO |
| U2, U4, U6                                                                                              | Low Noise 3.3V, 100 mA Linear Regulator           |
| U5                                                                                                      | Low Noise Op-Amp, THS4031IDGN                     |
| U8, U9                                                                                                  | 5V, 800mA Voltage Regulator                       |
| Y2                                                                                                      | 3.3V, 50 MHz VCXO Crystal Oscillator              |
| PCB <sup>[2]</sup>                                                                                      | 125536 Evaluation Board                           |

[1] Reference this number when ordering complete evaluation PCB

[2] Circuit Board Material: Rogers 4350 or Arlon 25FR and FR4
