# **Electrical and Mechanical Specifications**

The absolute maximum ratings of the SMP1345 series are provided in Table 2. Electrical specifications are provided in Table 3.

Typical performance characteristics of the SMP1345 series are illustrated in Figures 1 through 6.

#### Table 2. SMP1345 Series Absolute Maximum Ratings<sup>1</sup>

Parameter	Symbol	Minimum	Maximum	Units
Reverse voltage	VR		50	V
Power dissipation @ 25 °C lead temperature	PD		250	mW
Storage temperature	Tstg	-65	+150	°C
Operating temperature	TA	-65	+150	°C
Electrostatic discharge:	ESD			
Human Body Model (HBM), Class 1B			1000	V

1 Exposure to maximum rating conditions for extended periods may reduce device reliability. There is no damage to device with only one parameter set at the limit and all other parameters set at or below their nominal value. Exceeding any of the limits listed here may result in permanent damage to the device.

**ESD HANDLING**: Although this device is designed to be as robust as possible, electrostatic discharge (ESD) can damage this device. This device must be protected at all times from ESD when handling or transporting. Static charges may easily produce potentials of several kilovolts on the human body or equipment, which can discharge without detection. Industry-standard ESD handling precautions should be used at all times.

#### Table 3. SMP1345 Series Electrical Specifications<sup>1</sup> ( $T_A = +25$ °C, Unless Otherwise Noted)

Parameter	Symbol	Test Condition	Min	Тур	Max	Units
Reverse current	IR	$V_R = 50 V$			10	μΑ
Capacitance	CT	F = 1 MHz:				
		V = 1 V $V = 5 V$		0.19 0.18	0.20	pF pF
Resistance	Rs	F = 100 MHz:				
		l = 1 mA l = 10 mA		3.5 1.5	2.0	$\Omega \ \Omega$
Forward voltage	VF	I <sub>F</sub> = 10 mA		0.89		V
Carrier lifetime	TI	I <sub>F</sub> = 10 mA		100		ns
I region width				10		μm

<sup>1</sup> Performance is guaranteed only under the conditions listed in this table.

### **Package Dimensions**

Package dimensions are shown in Figures 7 to 11 (odd numbers), and tape and reel dimensions are provided in Figures 8 to 12 (even numbers).

#### **Package and Handling Information**

Instructions on the shipping container label regarding exposure to moisture after the container seal is broken must be followed. Otherwise, problems related to moisture absorption may occur when the part is subjected to high temperature during solder assembly. The SMP1345 series is rated to Moisture Sensitivity Level 1 (MSL1) at 260 °C. It can be used for lead or lead-free soldering. For additional information, refer to the Skyworks Application Note, *Solder Reflow Information*, document number 200164.

Care must be taken when attaching this product, whether it is done manually or in a production solder reflow environment. Production quantities of this product are shipped in a standard tape and reel format.

Notes:

#### 1. All measurements are in millimeters.

2. Dimensions and tolerances according to ASME Y14.5M-1994.

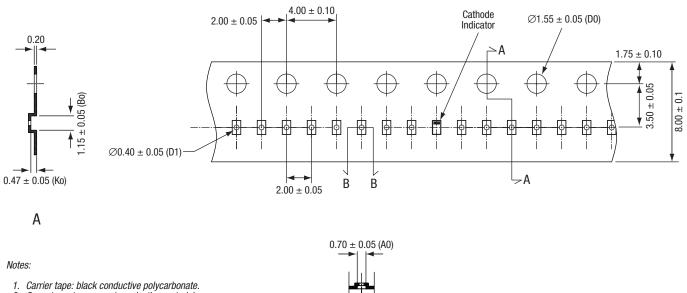

- З. These packages are used principally for discrete devices.
- This dimension includes stand-off height and package body thickness, 4.

but does not include attached features, e.g., external heatsink or chip capacitors. An integral heatslug is not considered an attached feature.

5. This dimension is primarily terminal plating, but does not include small metal protrusion.
