Characteristics ESDA7P120-1U1M

1 Characteristics

Table 1: Absolute maximum ratings (T_{amb} = 25 °C)

Symbol	Parar	Value	Unit	
Vpp	Peak pulse voltage	IEC 61000-4-2: Contact discharge Air discharge	>30 >30	kV
P _{PP}	Peak pulse power	8/20µs	1400	W
I _{PP}	Peak pulse current	8/20µs	120	Α
T _{stg}	Storage junction temperature	-55 to +150	°C	
Тор	Operating junction temperatu	-55 to +150		

Figure 2: Electrical characteristics (definitions)

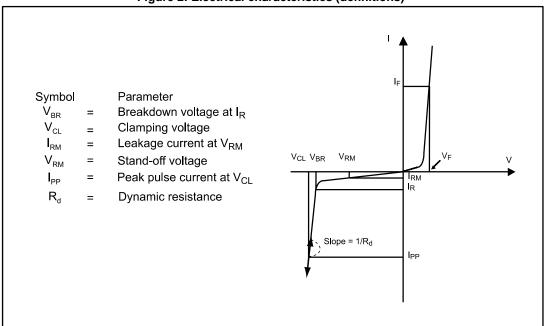

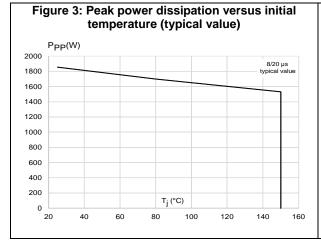

Table 2: Electrical characteristics (T_{amb} = 25 °C)

Symbol	Test condition	Min.	Тур.	Max.	Unit
V _{BR}	$I_R = 1 \text{ mA}$	6.4	6.8		V
I _{RM}	V _{RM} = 5 V			350	nA
I _{RM}	V _{RM} = 5.5 V			1.5	μΑ
R _d	8/20 µs		0.035		Ω
V _{CL}	I _{PP} = 80 A, 8/20 μs		9.5	10.0	V
VcL	I _{PP} = 100 A, 8/20 μs		10.2	10.7	V
VcL	I _{PP} = 120 A, 8/20 μs		11	11.5	V

2 **Package information**

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK® packages, depending on their level of environmental compliance. ECOPACK® specifications, grade definitions and product status are available at: www.st.com. ECOPACK® is an ST trademark.

57

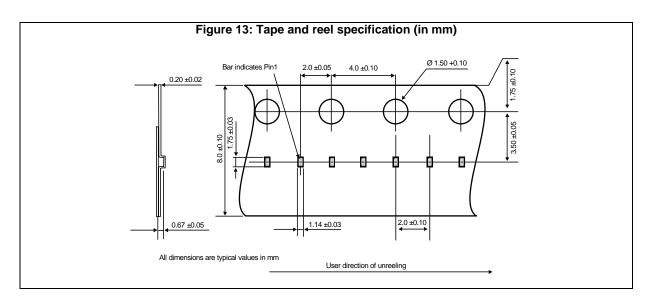

ESDA7P120-1U1M Package information

Product marking may be rotated by multiples of 90° for assembly plant differentiation. In no case should this product marking be used to orient the component for its placement on a PCB. Only pin 1 mark is to be used for this purpose.

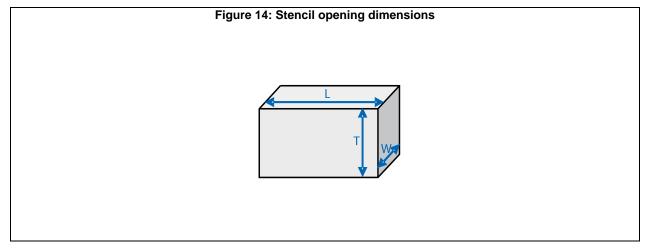

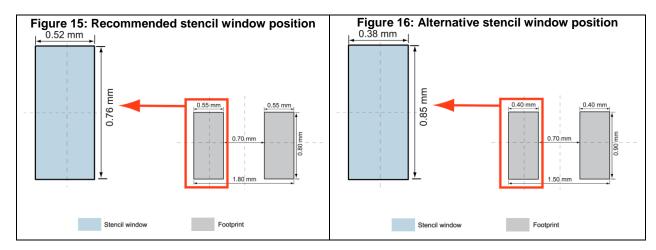

PCB recommendation ESDA7P120-1U1M

3 PCB recommendation

3.1 Stencil opening

- 1. General recommendation on stencil opening design
 - a. Stencil opening dimensions: L (Length), W (Width), T (Thickness).
- 2. General design rule
 - a. Stencil thickness (T) = $75 \sim 125 \mu m$
 - b. Aspect ratio = $\frac{W}{T} \ge 1.5$
 - c. Aspect area = $\frac{L \times W}{2T(L+W)} \ge 0.66$
- 3. Reference design
 - a. Stencil opening thickness: 100 µm
 - b. Stencil opening for leads: Opening to footprint ratio is 90%.

577

ESDA7P120-1U1M PCB recommendation

3.2 Solder paste

- 1. Use halide-free flux, qualification ROL0 according to ANSI/J-STD-004.
- 2. "No clean" solder paste is recommended.
- 3. Offers a high tack force to resist component movement during PCB movement.
- 4. Solder paste with fine particles: powder particle size is 20-45 μm.

3.3 Placement

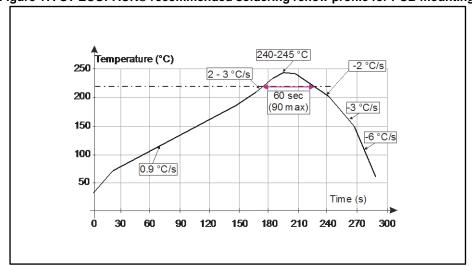

- 1. Manual positioning is not recommended.
- 2. It is recommended to use the lead recognition capabilities of the placement system, not the outline centering
- 3. Standard tolerance of ± 0.05 mm is recommended.
- 4. 3.5 N placement force is recommended. Too much placement force can lead to squeezed out solder paste and cause solder joints to short. Too low placement force can lead to insufficient contact between package and solder paste that could cause open solder joints or badly centered packages.
- 5. To improve the package placement accuracy, a bottom side optical control should be performed with a high resolution tool.
- 6. For assembly, a perfect supporting of the PCB (all the more on flexible PCB) is recommended during solder paste printing, pick and place and reflow soldering by using optimized tools.

3.4 PCB design preference

- 1. To control the solder paste amount, the closed via is recommended instead of open vias.
- 2. The position of tracks and open vias in the solder area should be well balanced. A symmetrical layout is recommended, to avoid any tilt phenomena caused by asymmetrical solder paste due to solder flow away.

3.5 Reflow

Minimize air convection currents in the reflow oven to avoid component movement.

Ordering information ESDA7P120-1U1M

4 Ordering information

Figure 18: Ordering information scheme

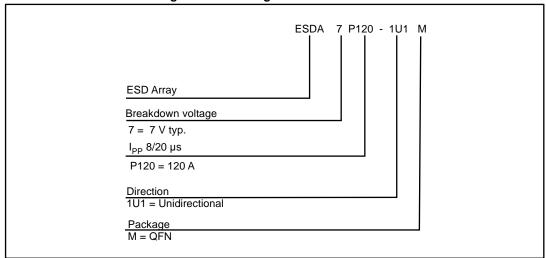

Table 4: Ordering information

Order code	Marking ⁽¹⁾	Package	Weight	Base qty.	Delivery mode
ESDA7P120-1U1M	E	QFN 1610	2.4 mg	8000	Tape and reel

Notes:

5 Revision history

Table 5: Document revision history

The state of the s				
Date	Revision	Changes		
18-Jan-2017	1	Initial release.		
09-Feb-2017	2	Updated Figure 1: "Pin configuration".		
10-Jul-2017	3	Updated Table 3: "QFN 1610 package mechanical data".		

⁽¹⁾The marking can be rotated by multiples of 90° to differentiate assembly location

IMPORTANT NOTICE - PLEASE READ CAREFULLY

STMicroelectronics NV and its subsidiaries ("ST") reserve the right to make changes, corrections, enhancements, modifications, and improvements to ST products and/or to this document at any time without notice. Purchasers should obtain the latest relevant information on ST products before placing orders. ST products are sold pursuant to ST's terms and conditions of sale in place at the time of order acknowledgement.

Purchasers are solely responsible for the choice, selection, and use of ST products and ST assumes no liability for application assistance or the design of Purchasers' products.
