

# HDP-20 Crimp Snap-In Contact Connectors (Continued)

### **Product Facts**

- Shell sizes offer wide choice of contact positions—9, 15, 25, 37 and 50
- Lower cost, commercial version of the military approved series
- Tin or zinc plated shells, with or without grounding indents
- Crimp snap-in contacts allows loading of only the number of contacts being used
- Available with shielding hardware and shielding enclosure kits
- Numerous cable clamps and mating hardware options
- Low cost, high performance, precisionformed crimp contacts

- Machine applied terminations assure highest production rates at lowest applied cost
- Intermateable with any size 20 Subminiature D connector dimensionally complying with MIL-C-24308
  - Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476
- Listed under Underwriters Laboratories Inc., Standard 1863, Communication Circuit Accessories, File No. E81956
- Certified by Canadian Standards Association, File No. LR 1088108 (LR 7189-207)

# Shielded Connector, Preassembled Kit

Designed to meet the requirements of Local Area Networking, this Subminiature D Shielded Connector Kit is available with slide latches attached to the receptacle. The receptacle is shielded and covered with a durable plastic enclosure. This shielding decreases emissions and provides an effective EMI/RFI barrier.

Preassembled connector kits are available in Subminiature D, shell size 2, 15-position configuration and accept crimp, snap-in HD-20 contacts. Contacts are available separately and allow for selective positioning.

Other sizes and styles can be made available, consult TE.

#### Material and Finish:

**Cable Connectors** 

Inserts-94V-0 rated nylon, black Enclosures—Elastomer, styrene polyolefin, or PVC, black

Shields and Shells—Carbon steel per ASTM A109, plated with .000200 [0.00508] min. tin over .000050 [0.00127] min. copper

**Cable Connectors** 

# HDP-20 Application Tooling

HDP-20 contacts may be applied by a variety of hand tools and machines. For low production runs, repairs and prototype work, we offer either our premium CERTI-CRIMP Hand Tool or our commercial PRO-CRIMPER II Hand Tool. For medium-volume production, you have the choice of our AMP-O-LECTRIC Model "G" Terminating Machine, our new Model "M" Terminating Machine, or our AMP-O-MATIC Model II Stripper-Crimper Machine. The Stripper-Crimper is typically used for terminating the wires of jacketed cable. All three machines can be bench mounted.

**Cable Connectors** 

For production requirements ranging from non-stop high volumes to countless series of short runs, our popular AMPOMATOR CLS IV+ fullyautomated lead-making machine is an ideal choice.

For further information about these or other TE hand tools and machines, call the TE Tooling Assistance Center at 1-800-722-1111.

### **AMPOMATOR CLS IV+ Lead-Making Machine**

This versatile machine now incorporates two AMP-O-LECTRIC Model "G" Terminating Units. Basically, it produces single-wire leads in lengths from 1.62 [41.2] to 1000 [25 400]. It measures, cuts, strips and terminates wire sizes from 26 to 10 AWG [0.12 to 6 mm<sup>2</sup>] stranded and 26 to 16 AWG [0.12 to 1.4 mm<sup>2</sup>] solid. Production rates range up to 4800 leads per hour for 3 [76.2] lengths.

The machine is microprocessor controlled, and programmed and operated with an easy-to-follow, menudriven touchscreen. It can retain data for up to 200 lead assemblies. Off-line programming is also possible with optional software OffLine-Plus for Windows 95, Part No. 189263-2.

Air requirement is 90 psi [6.21] bar minimum at 15 scfm [0.0071 m<sup>3</sup>/s]. Power requirement is single-phase 220 VAC, 50 or 60 Hz, 25 A.

For further information request Catalog 124324.

# HDP-22 Crimp Snap-In Contact Connectors

### **Product Selection Guide**

# HDP-22 Crimp Snap-In Contact Connectors (Continued)

**Product Facts:** 

- Approximately 65% higher density than HD-20 connectors
- Lower cost, commercial version of the military approved Series 90 family
- Available with shielding overmold hardware and shielding enclosure kits
- Capable of using numerous standard HD-20 cable clamps and mating hardware

- Low cost, high performance, precisionformed crimp contacts
- Intermateable with any size 22 Subminiature Ď connector dimensionally complying with MIL-C-24308
- **Recognized under the Component Program of** Underwriters Laboratories Inc., 🔊 File No. E28476
- Listed under Underwriters Laboratories Inc., Standard 1863, Communication Circuit Accessories, (UL) File No. E81956
- Certified by Canadian Śtandards Association, File **S₽**∘ No. LR 1088108 (LR 7189-207)

Instruction Sheet—408-9381

Note: Instruction Sheets for TE Tooling are packaged with the tooling. For additional information call the Tooling Assistance Center: 1-800-722-1111.

#### Applicators

To accommodate the broad range of wire termination products that TE produces most TE terminating machines are designed for use with interchangeable applicators. The basic styles are quickly interchangeable to minimize costly down times, and feature dial-in wire and insulation crimp-height settings. Special applicators are now available for use with the AMP Crimp Quality Monitor, for measuring the crimp height of each termination as it is made, plus evaluating the quality of each crimp.

For further information, request Catalog 65404.

For applicator part numbers, call the TE Tooling Assistance Center at 1-800-722-1111.

Notes: 1. Strip form contacts shipped 20,000 pieces/reel.

#### Insertion/Extraction Tool No. 91285-1 (Instruction Sheet—408-9404)

This tool contains interchangeable tips to Insert/Extract Size 22, 28-22 AWG [0.08-0.4 mm<sup>2</sup>] Crimp Contacts Size 20, 28-20 AWG [0.08-0.4 mm<sup>2</sup>] Crimp Contacts Size 20, Posted Contacts

# **Application Tooling**

# AMP-O-LECTRIC MODEL "G" **Terminating Machine**

A totally new design of our most popular machine for bench-top operation. It features a quiet and highly-reliable direct motor drive, electronic controls for ease of setup and operation, and improved guarding and lighting for operator convenience and safety. All versions also include either manual or automatic precision adjustment for crimp height. Power requirement is 120 or 220 VAC, 50 or 60 Hz.

For further information, request Catalog 65828.

#### AMP-O-MATIC Model II Stripper-Crimper Machine

This machine automatically strips as well as terminates individual wires. Similar to the AMP-O-LECTRIC Model "G" machine, applicators are quickly interchangeable, and it includes precision adjustment for crimp height. All adjustments can be made from the front of the machine without special tools. Power requirement is 120 VAC. Air requirement is 80-100 psi [5.52-6.89 bar], 3.5 scfm 0.00165 m<sup>3</sup>/sl.

For further information request Catalog 65004.

#### **PRO-CRIMPER II** Hand Tool Part No. 90800-1

Features interchangeable die sets and ratchet control that provides full die closure to help eliminate partial crimps. The new design is more durable, and requires dramatically less hand force

For further information, request Catalog 82276.

### **Product Facts**

- Insulation displacement contacts preloaded in housings
- No wire stripping
- Post plated contacts with no bare edges
- Duplex plated contacts gold on mating end and tin on crimp end
- Patented contact ensures reliable termination of a wide range of wire sizes and insulation diameters
- Removable contacts for replacement and repair

# HDE-20 Basic Shielding Hardware Kits (Continued)

#### Each kit contains:

- Connector
- Inner shield
- Outer shield

Ferrules must be purchased separately.

#### Material and Finish:

Connector Shell-Steel, tin plated Connector Insert-94V-0 rated thermoplastic, black

Shield-Steel, tin plated

Contacts—Phosphor bronze Contact Finish—Duplex plated: A-.000030 [0.00076] gold on mating end, tin on termination end, with entire contact nickel underplated B-Gold flash on mating end, tin on termination end, with entire contact nickel underplated

Hand Tools with Modular Heads

# **Technical Documents:**

**Instruction Sheets** 408-6790 408-9414 408-6789

**Note:** Instruction Sheets for TE Tooling are packaged with the tooling. For additional information call the Tooling Assistance Hotline: **1-800-722-1111.**  A modular interchangeable head provides versatility to these tools. Along with the head used to terminate Subminiature D connectors, heads are available to terminate other TE product lines.

The head used to terminate the Subminiature D, HDE connectors can be used with a manual pistol grip tool, an air pistol grip tool and a bench mount power assembly. These tools terminate one unstripped wire per cycle and index the connector to the next terminating position. The head rotates to permit optimum access to the wiring area.

**Manual Pistol Grip Tool** 

Handle and Head Tool Assembly No. 608868-1 Handle No. 58074-1 Head Assembly No. 58063-2

This tool is manually actuated, using modular heads.

**Air Pistol Grip Tool** 

Handle No. 58075-1 Head Assembly No. 58063-2 Air actuated, utilizing modular heads.

Bench Mounted Tools with Modular Heads Bench Mount Pneumatic Power Assembly

Bench Assembly No. 58338-1 Head Assembly No. 58063-2

This tool is air actuated with either a foot or knee switch.

Dimensions are shown for

reference purposes only. Specifications subject

to change.

Bench Mount Electric Power Assembly

Head Assembly No. 58063-2 This tool electrically powered and actuated by a foot switch.

# HDE-20 Application Tooling (Continued)

### **Product Facts**

- Low applied costs
- Automatic termination of jacketed cable
- Automatic continuity check and shorts test
- Single- or double-ended assemblies
- Microprocessor controlled with touch input screen
- Stored program capability
- Selective termination of connector positions
- Rapid tooling changeover for different connector types
- Handles a variety of TE insulation-displacement connectors
- Terminates both multicolor and single-color wires
- Remote programming capability
- Straight or right-angle wire dress
- **Control Module** 852423-1 120 VAC

# **Technical Documents:**

# **CHAMPOMATOR 3A Terminating Machine**

This machine is the high-productivity way to terminate multiconductor, jacketed cable with a variety of TE connectors having insulation displacement contacts. It automatically sorts the wires, and terminates them in a programmed sequence. The sequence may use all or some of the connector contacts, such as for various RS-232 wiring patterns.

All cable assemblies are tested for continuity and shorts. The machine is microprocessor controlled, and programmed by a touch input screen. The easy programming simplifies the process and reduces training requirements. The machine's internal storage capability can retain up to 50 cable assemblies, which can be easily retrieved by number or name. Production monitoring and diagnostics can also be accessed through the touch

Contact TE for the tooling required for your specific applications.

### **CHAMPOMATOR 2.5 Terminating Machine**

This is a compact, semiautomatic bench machine. It is microprocessor controlled, and programmed using a membrane switch keyboard. The potential machine rate is one pair of wires per second. Contact TE for the tooling required for your specific applications.

The CHAMPOMATOR Model 2.5 Bench Terminating Machine-Part No. 354786-4 is used in conjunction with Control Module-Part No. 852423-1.

Contact TE for application specific requirements.

# Manual Arbor Tool

The arbor tool with applicator is used to terminate jacketed cable. Wires are neatly routed and trimmed to length with the cable jacket close to the connector. 400 to 800 terminated wires per hour are typical.

# Subminiature D Connectors HDF-20 for Flat Ribbon Cable

### **Product Facts**

- Available in all 5 standard shell sizes
- Visual inspection of termination possible
- Fluted cover provides positive alignment of cable prior to termination
- Wide range of application tooling
- Patented insulation displacement contact latches into the connector cover
- Contact design provides a "gas-tight" termination

**Cable Connectors** 

- Contacts accept 28 AWG [0.08mm2] solid and stranded, and 26 AWG [0.15mm2] solid and stranded round conductor flat ribbon cable on .050 [1.27] centers
- Qualified to Battelle Level III environment
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476
- Certified by Canadian Standards Association, File No. LR 7189
- Listed and complies with UL 1863, Communication Circuit Accessories File No. E81956

# **HDF-20 Application Tooling**

## **Application Tooling**

Hand Tool Kit No. 768340-1

Consists of a hand tool frame, a universal base assembly, a bench mount kit, and connector-specific tooling for AMP-LATCH Standard and Novo Receptacles, Card-Edge Connectors, and AMPLIMITE HDF-20 Connectors.

**Note:** For 50-position HDF connectors, you must also order Connector-Specific Kit No. 768350-1.

Note: All part numbers are RoHS compliant.

Catalog 82068 Revised 4-12

# **HD-20 Solder Cup Connectors**

**Product Facts** 

- Preloaded duplex-plated solder cup contacts
- Shell finish in choice of standard zinc or tin
- Two-piece 94V-0 rated plastic insert
- Anti-solderwicking contact design
- Intermateable with other subminiature D connectors
- Available in 9, 15, 25 and 37 position (shell sizes 1-4) plugs and receptacles
- Easy application without special application tools
- Shields offer full EMI shielding and ESD insulation

**Cable Connectors** 

- Crimped shield termination for low impedance
- Shield crimp provides strain relief
- Shields may be post molded or covered with enclosures
- Recognized under the Component Program of Underwriters Laboratories, Inc., File No. E28476
- Listed under Underwriters Laboratories Inc., connectors for use in data, signal, control & Power Applications components, File No. E127344
- Certified by Canadian Standards Association, File No. LR 97981

# Accessories

Numerous accessories are available for strain relief and cable clamping, shielding, connector-to-connector mating, connector-toconnector pc board mounting, and keying. These accessories are illustrated and tabled on the following pages.

To help discern the accessories available for a particular connector type, refer to the Product Selection Guide at the beginning of the connector section. Also, the connector the accessory is used with is listed under the Related Product Data heading next to the accessory listing.

The TE Quik-Snap Backshell Kit is a one-piece, all-plastic cable clamp kit designed for use with either the AMPLIMITE HDP-20, HDP-22, or HDE, all-plastic or metal-shell connectors.

Kits are available for connector sizes 1, 2, 3, and 4 with a cable exit option of 180° or 120°.

### Each kit contains:

- 1-Hinged, plastic clamp
- 2-Self-tapping screws
- 1-Strain relief clip
- 1-Cable exit gate plug (Used to close unused exit)

(For metal-shell connector applications an optional kit with 2 retainer clips and screws is available.)

#### Material and Finish:

Cover-Polypropylene, black Strain Relief Clip—Stainless steel Retainer Clip—Stainless steel Screws—Carbon steel, zinc plated Cable Gate—Polypropylene, Black

# Unshielded Cable Clamps

# Straight Exit Low Profile for Jacketed Cable

Low Profile Cable Clamps feature a two-piece construction which allows the two cover halves to be snapped together, no hardware is required for assembly. They can be used on plugs or receptacles and will not interfere with commonly used mating hardware. Sufficient Cable Support Gates (or a Cable Support Gate Latch) are supplied with each cable clamp kit to achieve adjustable clamping over a wide range of jacketed cable diameters.

#### Material

Black thermoplastic

#### Box and Lid Cable Clamps can be used on either plugs or receptacles and will not interfere with commonly used hardware. Their hinged construction allows easy assembly to a harness. A wide range of cable diameters are accommodated through the use of cable support gates, supplied with each cable clamp.

Cable clamps are available in kits with appropriate hardware for convenient plug/receptacle mating. See below for kits with Male Screw Retainers.

#### Straight/90° Exit Cable Clamps can be used on a plug or receptacle and will not interfere with commonly used mating hardware. Their three-piece construction allows easy assembly to a cable harness. Also, the same cable clamp components are used for both straight and 90° cable exit applications. This is accomplished by simply positioning the Male and Female Panels on the Yoke for the desired angle.

## Material

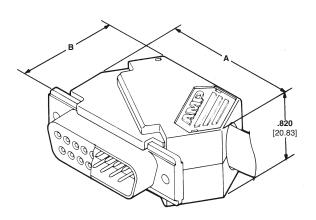

Black thermoplastic

 $^{\ast}$  2-56 is the male thread size. The female thread size is 4-40.

A Each part is individually bulk packed for multiple kit orders.

Notes: 1. All parts are packaged unassembled.

2. Each female screwlock kit is comprised of two assemblies as illustrated above.

 One or two flat washers may be required for panel thicknesses less than .060 [1.52]. Female screwlocks are not recommended for panel thicknesses greater than .060 [1.52].

4. Female screwlocks with 2-56 thread size are to be used with cable clamps with mounting flanges. Female screwlocks with 4-40 and M3 (Metric) thread sizes can be used with all other cable clamps.

Female screwlocks mate with male screw retainers (pages 146 and 147).

6. Short female screwlocks cannot be used with HDF connectors (pages 125 & 126)

\*Each part is individually bulk packed for multiple kit orders.

Notes: 1. All parts are packaged unassembled.

 Each kit is comprised of a slide latch and two screws, flat washers (if required), lock washers and hex nuts. Style I slide latches are also furnished as part of cable clamp kits (page 142).

Style I slide latches can be used with cable clamps that do not extend beyond the front flange of the connector or on connectors without cable clamps.

4. Style II slide latches can be used with any cable clamp that has the mounting ear configuration as shown above.

5. Style III slide latches can be used on connectors without cable clamps or with cable clamps that do not have the mounting ear configuration shown with Style II above.
