Figure 3. Schematic diagram

L78MxxAB - L78MxxAC Maximum ratings

# 3 Maximum ratings

Table 2. Absolute maximum ratings

| Symbol           | Parameter                            |                               | Value              | Unit |
|------------------|--------------------------------------|-------------------------------|--------------------|------|
| V                | DC input voltage                     | for V <sub>O</sub> = 5 to 18V | 35                 | V    |
| V <sub>I</sub>   | DC input voltage                     | for V <sub>O</sub> = 20, 24V  | 40                 | V    |
| Io               | Output current                       |                               | Internally limited | mA   |
| P <sub>D</sub>   | Power dissipation                    |                               | Internally limited | mW   |
| T <sub>STG</sub> | Storage temperature range            |                               | -65 to 150         | °C   |
| т                | Operating junction temperature range | for L78M00AC                  | 0 to 125           | °C   |
| T <sub>OP</sub>  | Operating junction temperature range | for L78M00AB                  | -40 to 125         | C    |

Note: Absolute maximum ratings are those values beyond which damage to the device may occur. Functional operation under these condition is not implied

Table 3. Thermal data

| Symbol            | Parameter                           | TO-220 | DPAK | Unit |
|-------------------|-------------------------------------|--------|------|------|
| R <sub>thJC</sub> | Thermal resistance junction-case    | 3      | 8    | °C/W |
| R <sub>thJA</sub> | Thermal resistance junction-ambient | 50     | 100  | °C/W |

### 7 Applications information

#### 7.1 Design considerations

The L78MxxAB series of fixed voltage regulators are designed with thermal overload protection that shuts down the circuit when subjected to an excessive power overload condition, internal short-circuit protection that limits the maximum current the circuit will pass, and output transistor Safe-Area compensation that reduces the output short-circuit as the voltage across the pass transistor is increased. In many low current applications, compensation capacitors are not required. However, it is recommended that the regulator input be bypassed with a capacitor if the regulator is connected to the power supply filter with long wire lengths, or if the output load capacitance is large. An input bypass capacitor should be selected to provide good high-frequency characteristics to insure stable operation under all load conditions. A 0.33  $\mu F$  or larger tantalum, mylar, or other capacitor having low internal impedance at high frequencies should be chosen. The bypass capacitor should be mounted with the shortest possible leads directly across the regulators input terminals. Normally good construction techniques should be used to minimize ground loops and lead resistance drops since the regulator has no external sense lead.

Figure 17. Current regulator

Figure 18. Adjustable output regulator

Figure 19. Current boost regulator

Figure 20. Short-circuit protection

Note:

The circuit of Figure 19 can be modified to provide supply protection against short circuits by adding a short-circuit sense resistor,  $R_{SC}$ , and an additional PNP transistor. The current sensing PNP must be able to handle the short-circuit current of the three-terminal regulator. Therefore, a four-ampere plastic power transistor is specified.

### 8 Package mechanical data

In order to meet environmental requirements, ST offers these devices in ECOPACK<sup>®</sup> packages. These packages have a lead-free second level interconnect. The category of second Level Interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark. ECOPACK specifications are available at: www.st.com.

# 10 Revision history

Table 15. Document revision history

| Date        | Revision | Changes  |
|-------------|----------|--|
| 30-Aug-2006 | 3        | Order Codes updated.                                 |
| 05-Oct-2006 | 4        | DPAK mechanical data updated and add footprint data. |
| 10-Dec-2007 | 5        | Modified: Table 14.                                  |
| 20-Feb-2008 | 6        | Modified: Table 14 on page 27.                       |

#### Please Read Carefully:

Information in this document is provided solely in connection with ST products. STMicroelectronics NV and its subsidiaries ("ST") reserve the right to make changes, corrections, modifications or improvements, to this document, and the products and services described herein at any time, without notice.

All ST products are sold pursuant to ST's terms and conditions of sale.

Purchasers are solely responsible for the choice, selection and use of the ST products and services described herein, and ST assumes no liability whatsoever relating to the choice, selection or use of the ST products and services described herein.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted under this document. If any part of this document refers to any third party products or services it shall not be deemed a license grant by ST for the use of such third party products or services, or any intellectual property contained therein or considered as a warranty covering the use in any manner whatsoever of such third party products or services or any intellectual property contained therein.

UNLESS OTHERWISE SET FORTH IN ST'S TERMS AND CONDITIONS OF SALE ST DISCLAIMS ANY EXPRESS OR IMPLIED WARRANTY WITH RESPECT TO THE USE AND/OR SALE OF ST PRODUCTS INCLUDING WITHOUT LIMITATION IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE (AND THEIR EQUIVALENTS UNDER THE LAWS OF ANY JURISDICTION), OR INFRINGEMENT OF ANY PATENT, COPYRIGHT OR OTHER INTELLECTUAL PROPERTY RIGHT.

UNLESS EXPRESSLY APPROVED IN WRITING BY AN AUTHORIZED ST REPRESENTATIVE, ST PRODUCTS ARE NOT RECOMMENDED, AUTHORIZED OR WARRANTED FOR USE IN MILITARY, AIR CRAFT, SPACE, LIFE SAVING, OR LIFE SUSTAINING APPLICATIONS, NOR IN PRODUCTS OR SYSTEMS WHERE FAILURE OR MALFUNCTION MAY RESULT IN PERSONAL INJURY, DEATH, OR SEVERE PROPERTY OR ENVIRONMENTAL DAMAGE. ST PRODUCTS WHICH ARE NOT SPECIFIED AS "AUTOMOTIVE GRADE" MAY ONLY BE USED IN AUTOMOTIVE APPLICATIONS AT USER'S OWN RISK.

Resale of ST products with provisions different from the statements and/or technical features set forth in this document shall immediately void any warranty granted by ST for the ST product or service described herein and shall not create or extend in any manner whatsoever, any liability of ST.
