| Junction Temperature                | +150°C          |
| Storage Temperature Range           | -65°C to +150°C |
| Lead Temperature (soldering, 10s)   | +300°C          |
| Soldering Temperature (reflow)      | +260°C          |

**Note 1:** Signals on COM\_, NO\_ exceeding V+ or V- are clamped by internal diodes. A\_ and EN are clamped only to V- and can exceed V+ up to their maximum ratings. Limit forward-diode current to maximum current rating.

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

### ELECTRICAL CHARACTERISTICS—+5V Single Supply

(V+ = +5V ±10%, V- = 0, V<sub>IH</sub> = +2.4V, V<sub>IL</sub> = +0.8V, T<sub>A</sub> = T<sub>MIN</sub> to T<sub>MAX</sub>, unless otherwise noted. Typical values are at T<sub>A</sub> = +25°C.) (Notes 2, 3)

**Note 2:** The algebraic convention, where the most negative value is a minimum and the most positive value a maximum, is used in this data sheet.

**Note 3:** Parts are tested at +85°C and guaranteed by design over the entire temperature range.

**Note 4:** ΔRON = RON(MAX) - RON(MIN).

**Note 5:** ΔRON matching specifications for TQFN packaged parts are guaranteed by design.

**Note 6:** Flatness is defined as the difference between the maximum and minimum value of on-resistance as measured over the specified analog signal ranges.

**Note 7:** Guaranteed by design.

**Note 8:** Off-Isolation = 20log<sub>10</sub> (V<sub>COM\_</sub> / V<sub>NO\_</sub>), V<sub>COM\_</sub> = output, V<sub>NO\_</sub> = input to off switch.

**Note 9:** Between any two switches.

# MAX4638/MAX4639

## 3.5Ω, Single 8:1 and Dual 4:1, Low-Voltage Analog Multiplexers

### Detailed Description

The MAX4638/MAX4639 are low-voltage, CMOS analog muxes. The MAX4638 is an 8:1 mux that switches one of eight inputs (NO1–NO8) to a common output (COM) as determined by the 3-bit binary inputs A0, A1, and A2. The MAX4639 is a 4:1 dual mux that switches one of four differential inputs to a common differential output as determined by the 2-bit binary inputs A0 and A1. Both the MAX4638/MAX4639 have an EN input that can be used to enable or disable the device. When disabled, all channels are switched off. See Truth Tables.

### Applications Information

#### Overvoltage Protection

Proper power-supply sequencing is recommended for all CMOS devices. Do not exceed the absolute maximum ratings because stresses beyond the listed ratings can cause permanent damage to the devices. Always sequence V+ on first, then V-, followed by the logic inputs. If power-supply sequencing is not possible, add two small-signal diodes (D1, D2) in series with the supply pins for overvoltage protection (Figure 1). Adding diodes reduces the analog signal range to one diode drop below V+ and one diode drop above V-, but

Figure 1. Overvoltage Protection Using External Blocking Diodes

does not affect the devices' low switch resistance. Device operation is unchanged, and the difference between V+ and V- should not exceed 6V. These protection diodes are not recommended when using a single supply. For single-supply operation, V- should be connected to GND as close to the device as possible.

### Truth Tables

#### MAX4638 (Single 8-to-1 Mux)

| A2 | A1 | A0 | EN | ON SWITCH |
|----|----|----|----|-----------|
| X  | X  | X  | 0  | None      |
| 0  | 0  | 0  | 1  | NO1       |
| 0  | 0  | 1  | 1  | NO2       |
| 0  | 1  | 0  | 1  | NO3       |
| 0  | 1  | 1  | 1  | NO4       |
| 1  | 0  | 0  | 1  | NO5       |
| 1  | 0  | 1  | 1  | NO6       |
| 1  | 1  | 0  | 1  | NO7       |
| 1  | 1  | 1  | 1  | NO8       |

#### MAX4639 (Dual 4-to-1 Mux)

| A1 | A0 | EN | COMA | COMB |
|----|----|----|------|------|
| X  | X  | 0  | None | None |
| 0  | 0  | 1  | NO1A | NO1B |
| 0  | 1  | 1  | NO2A | NO2B |
| 1  | 0  | 1  | NO3A | NO3B |
| 1  | 1  | 1  | NO4A | NO4B |

| MAX4639ETP+T | -40°C to +85°C | 20 TQFN-EP* (4 × 4) |

+Denotes a lead(Pb)-free/RoHS-compliant package.

T = Tape and reel.

\*EP = Exposed pad.

### Chip Information

PROCESS: BiCMOS

### Package Information

For the latest package outline information and land patterns (footprints), go to [www.maximintegrated.com/packages](http://www.maximintegrated.com/packages). Note that a "+", "#", or "-" in the package code indicates RoHS status only. Package drawings may show a different suffix character, but the drawing pertains to the package regardless of RoHS status.

| PACKAGE TYPE | PACKAGE CODE | OUTLINE NO.             | LAND PATTERN NO.        |
