

| ctrical Specifications (-40°C $\leq$ T <sub>A</sub> $\leq$ +85°C unless otherwise specified) |
|--|
|--|

| INPUT CHARACTERISTICS  | Limits    | Units                        |
|--|-----------|------------------------------|
| Minimum Control Current (See figure1)                                  | 2.0       | mA                           |
| Maximum Control Current for Off-State Resistance @TA=+25°C             | 0.4       | mA                           |
| Control Current Range (Caution: current limit input LED, see figure 5) | 2.0 to 25 | mA                           |
| Maximum Reverse Voltage  | 6.0       | V                            |
|  | · · · ·-  |                              |
| OUTPUT CHARACTERISTICS   | Limits    | Units                        |
| Operating Voltage Range  | 0 to ±400 | V <sub>(DC or AC peak)</sub> |
| Maximum Load Current @ T <sub>A</sub> =+40°C                           |           | ,                            |
| 5mA Control (See figure 1) (single and dual channel operation)         | 120       | mA                           |
| Maximum Peak Load Current (10ms maximum duration)                      |           |                              |
| (single and dual channel operation)                                    | 350       | mA                           |
| Maximum On-State Resistance @T <sub>A</sub> =+25°C                     |           |                              |
| For 50mA Pulsed load, 5mA Control (see figure3)                        | 35        | Ω                            |
| Maximum Off-State Leakage @T <sub>A</sub> =+25°C, ±320V (see figure 4) | 1.0       | μA                           |
| Maximum Turn-On Time @T <sub>A</sub> =+25°C (see figure 6)             | 2.0       | ms                           |
| For 50mA, 100 V <sub>DC</sub> load, 5mA Control                        |           |                              |
| Maximum Turn-Off Time @T <sub>A</sub> =+25°C (see figure 6)            | 2.0       | ms                           |
| For 50mA, 100 V <sub>DC</sub> load, 5mA Control                        |           |                              |
| Maximum Output Capacitance @ 50V <sub>DC</sub>                         | 12        | pF                           |
| GENERAL CHARACTERISTICS  | Limits    | Units                        |
| Minimum Dialoctria Strongth Input Output                               | 4000      | V                            |

| GENERAL CHARACTERISTICS  | Limits    | Units            |                  |
|--|-----------|------------------|------------------|
| Minimum Dielectric Strength, Input-Output  |           | 4000             | V <sub>RMS</sub> |
| Minimum Dielectric Strength, Pole-to-Pole  |           | 1000             | V <sub>DC</sub>  |
| Minimum Insulation Resistance, Input-Output, @T <sub>A</sub> =+25°C, 50%RH, 100V <sub>DC</sub> |           | 10 <sup>12</sup> | Ω                |
| Maximum Capacitance, Input-Output  |           | 1.0              | pF               |
| Maximum Pin Soldering Temperature (10 seconds maximum)   |           | +260             |                  |
| Ambient Temperature Range:   | Operating | -40 to +85       | °C               |
|  | Storage   | -40 to +100      |                  |

International Rectifier does not recommend the use of this product in aerospace, avionics, military or life support applications. Users of this International Rectifier product in such applications assume all risks of such use and indemnify International Rectifier against all damages resulting from such use.
