## REVISION HISTORY

### **Revision History: AD8646/AD8647/AD8648**

#### **8/2016—Rev. E to Rev. F**

|                                          |    |
|------------------------------------------|----|
| Changes to Figure 18 and Figure 21 ..... | 9  |
| Changes to Figure 39 .....               | 12 |

#### **3/2014—Rev. D to Rev. E**

|                                                      |   |
|------------------------------------------------------|---|
| Changes to Differential Input Voltage, Table 3 ..... | 6 |
|------------------------------------------------------|---|

#### **4/2010—Rev. C to Rev. D**

|                                                                |    |
|----------------------------------------------------------------|----|
| Changes to Features Section and General Description Section .. | 1  |
| Updated Outline Dimensions .....                               | 16 |
| Changes to Ordering Guide Section .....                        | 18 |

#### **2/2009—Rev. B to Rev. C**

|                                                                                  |    |
|----------------------------------------------------------------------------------|----|
| Change to Supply Current Shutdown Mode (AD8647 Only)<br>Parameter, Table 1 ..... | 3  |
| Change to Supply Current Shutdown Mode (AD8647 Only)<br>Parameter, Table 2 ..... | 5  |
| Added Figure 50; Renumbered Sequentially .....                                   | 15 |
| Updated Outline Dimensions .....                                                 | 16 |
| Changes to Ordering Guide .....                                                  | 18 |

#### **10/2007—Revision B: Initial Combined Version**

|                                           |    |
|-------------------------------------------|----|
| ESD Caution .....                         | 6  |
| Typical Performance Characteristics ..... | 7  |
| Theory of Operation .....                 | 15 |
| Power-Down Operation .....                | 15 |
| Multiplexing Operation .....              | 15 |
| Outline Dimensions .....                  | 16 |
| Ordering Guide .....                      | 18 |

### **Revision History: AD8646**

#### **10/2007—Rev. 0 to Rev. B**

|                                     |           |
|-------------------------------------|-----------|
| Combined with AD8648 .....          | Universal |
| Added AD8647 .....                  | Universal |
| Deleted Figure 4 and Figure 7 ..... | 7         |
| Deleted Figure 33 .....             | 11        |

#### **8/2007—Revision 0: Initial Version**

### **Revision History: AD8648**

#### **10/2007—Rev. A to Rev. B**

|                                                              |           |
|--------------------------------------------------------------|-----------|
| Combined with AD8646 .....                                   | Universal |
| Added AD8647 .....                                           | Universal |
| Deleted Figure 7 .....                                       | 6         |
| Deleted Figure 11 .....                                      | 7         |
| Deleted Figure 16 and Figure 17 .....                        | 8         |
| Deleted Figure 24 .....                                      | 9         |
| Deleted Figure 27, Figure 28, Figure 31, and Figure 32 ..... | 10        |

#### **6/2007—Rev. 0 to Rev. A**

|                                      |    |
|--------------------------------------|----|
| Changes to General Description ..... | 1  |
| Updated Outline Dimensions .....     | 12 |
| Changes to Ordering Guide .....      | 12 |

#### **1/2006—Revision 0: Initial Version**

## SPECIFICATIONS

$V_{SY} = 5\text{ V}$ ,  $V_{CM} = V_{SY}/2$ ,  $T_A = +25^\circ\text{C}$ , unless otherwise noted.

Table 1.

| Parameter                                     | Symbol               | Conditions                                                                                                         | Min  | Typ  | Max  | Unit    |
|-----------------------------------------------|----------------------|--------------------------------------------------------------------------------------------------------------------|------|------|------|---------|

## ABSOLUTE MAXIMUM RATINGS

Table 3.

| Parameter                           | Rating                                          |
|-------------------------------------|-------------------------------------------------|
| Supply Voltage                      | 6 V                                             |
| Input Voltage                       | GND to $V_{SY}$                                 |
| Differential Input Voltage          | $\pm 6$ V                                       |
| Output Short Circuit to GND         | Indefinite                                      |
| Storage Temperature Range           | $-65^{\circ}\text{C}$ to $+150^{\circ}\text{C}$ |
| Operating Temperature Range         | $-40^{\circ}\text{C}$ to $+125^{\circ}\text{C}$ |
| Lead Temperature (Soldering 60 sec) | $300^{\circ}\text{C}$                           |
| Junction Temperature                | $150^{\circ}\text{C}$                           |

Stresses at or above those listed under Absolute Maximum Ratings may cause permanent damage to the product. This is a stress rating only; functional operation of the product at these or any other conditions above those indicated in the operational section of this specification is not implied. Operation beyond the maximum operating conditions for extended periods may affect product reliability.

## THERMAL RESISTANCE

$\theta_{JA}$  is specified for the worst-case conditions, that is, a device soldered in a circuit board for surface-mount packages.

Table 4. Thermal Resistance

| Package Type   | $\theta_{JA}$ | $\theta_{JC}$ | Unit                        |
|----------------|---------------|---------------|-----------------------------|
| 8-Lead SOIC_N  | 125           | 43            | $^{\circ}\text{C}/\text{W}$ |
| 8-Lead MSOP    | 210           | 45            | $^{\circ}\text{C}/\text{W}$ |
| 10-Lead MSOP   | 200           | 44            | $^{\circ}\text{C}/\text{W}$ |
| 14-Lead SOIC_N | 120           | 36            | $^{\circ}\text{C}/\text{W}$ |
| 14-Lead TSSOP  | 180           | 35            | $^{\circ}\text{C}/\text{W}$ |

## ESD CAUTION

### ESD (electrostatic discharge) sensitive device.

Charged devices and circuit boards can discharge without detection. Although this product features patented or proprietary protection circuitry, damage may occur on devices subjected to high energy ESD. Therefore, proper ESD precautions should be taken to avoid performance degradation or loss of functionality.

## THEORY OF OPERATION

### POWER-DOWN OPERATION

The shutdown function of the AD8647 is referenced to the negative supply voltage of the operational amplifier. A logic level high ( $> 2.0\text{ V}$ ) enables the device, while a logic level low ( $< 0.8\text{ V}$ ) disables the device and places the output in a high impedance condition. Several outputs can be wire-OR'ed, thus eliminating a multiplexer. The logic input is a high impedance CMOS input. If dual or split supplies are used, the logic signals must be properly referred to the negative supply voltage.

### MULTIPLEXING OPERATION

Because each op amp has a separate logic input enable pin, the outputs can be connected together if it can be guaranteed that only one op amp is active at any time. By connecting the op amps as shown in Figure 48, a multiplexer can be eliminated. With the reasonably short turn-on and turn-off times, low frequency signal paths can be smoothly selected. The turn-off time is slightly faster than the turn-on time so, even when using sections from two different packages, the overlap is less than 300 nanoseconds.

## OUTLINE DIMENSIONS

COMPLIANT TO JEDEC STANDARDS MS-012-AA

CONTROLLING DIMENSIONS ARE IN MILLIMETERS; INCH DIMENSIONS (IN PARENTHESES) ARE ROUNDED-OFF MILLIMETER EQUIVALENTS FOR REFERENCE ONLY AND ARE NOT APPROPRIATE FOR USE IN DESIGN.
