OUTPUT VOLTAGE ADJUSTMENT

The ultra-wide output voltage trim range offers major advantages to users who select the PTH03010. It is no longer necessary to purchase a variety of modules in order to cover different output voltages. The output voltage can be trimmed in a range of 0.8 Vdc to 2.5 Vdc. When the PTH03010 converter leaves the factory the output has been adjusted to the default voltage of 0.8 V.

Efficiency Table ($I_o = 10A$)

Output Voltage	Efficiency
$V_o = 1.0\text{ V}$	85%
$V_o = 1.2\text{ V}$	87%
$V_o = 1.5\text{ V}$	89%
$V_o = 1.8\text{ V}$	91%
$V_o = 2.0\text{ V}$	92%
$V_o = 2.5\text{ V}$	93%

Notes:

1. Remote ON/OFF, Positive Logic

ON: Pin 3 open; or $V > V_{in} - 0.5\text{ V}$

OFF: Pin 3 GND; or $V < 0.8\text{ V}$ (min - 0.2 V).

2. See Figures 1 and 2 for safe operating curves.

3. A 470 μF electrolytic input capacitor is required for proper operation. The capacitor must be rated for a minimum of 700 mA rms of ripple current.

4. An external output capacitor is not required for basic operation. Adding 330 μF of distributed capacitance at the load will improve the transient response.

5. 1 A/ μs load step, 50 to 100% I_{omax} , $C_{out} = 330\text{ }\mu\text{F}$.

6. If utilized V_{out} will track applied voltage by $\pm 0.3\text{ V}$ (up to V_o set point).

7. The pre-bias start-up feature is not compatible with Auto-Track™. This is because when the module is under Auto-Track™ control, it is fully active and will sink current if the output voltage is below that of a back-feeding source. Therefore to ensure a pre-bias hold-off, one of the following two techniques must be followed when input power is first applied to the module. The Auto-Track™ function must either be disabled, or the module's output held off using the Inhibit pin. Refer to Application Note 150 for more details.

8. Tape and reel packaging only available on the surface-mount versions.

9. NOTICE: Some models do not support all options. Please contact your local Artesyn representative or use the on-line model number search tool at <http://www.artesyn.com> to find a suitable alternative.
