Specifications

CC15-24xxSxx-E Specifications

Items/Units			Model	CC15-2403Sxx-E	CC15-2405Sxx-E	CC15-2412Sxx-E	CC15-2415Sxx-E
Input	Nominal Voltage		V	DC24.0			
	Voletage Range		V	DC18 - 36			
	Efficiency typ	(*1)	%	89.0	90.0	89.0	89.0
	Current typ	(*1)	A	0.7	0.69	0.7	0.7
	Start-Up Voletage		V	DC16 - 18			
	Hysteresis Voletage		V	DC1 min			
Output	Nominal Voltage		V	3.3	5	12	15
	Maximum Current		A	4.5	3	1.25	1
	Voltage Accuracy max		%	+5%, -3%			
	Ripple & Noise max	(*2)	mVp-p	50mV		150mV	
	Start-Up Time		mS	20 - 100			
	Outpit Voltage Setting	(*1)	%	±1% of nominal output voltage			
Function	Over Current Protection			Works over 103% of rating			
	Over Voltage Protection			Works at 115 - 145% of rating			
	Low Voltege Protection			Works at 90% max of rating			
	Remote On/Off			Provided(RC open or −Vin～less than 1.2V : On, RC more than 10V～ +Vin : Off)			
Environment	Operating Temperature		℃	-40 - +85			
	Storage Temperature		℃	-40 - +85			
	Operating Humidity		% RH	5 - 95 (conditoin of maximum 38℃ in wet bulb temperature and non-condensation should be ensured.)			
	Storage Humidity		% RH	5 - 95 (conditoin of maximum 38℃ in wet bulb temperature and non-condensation should be ensured.)			
	Vibration			10-55Hz, 15 minutes sweep amd 1.52mm total amplitude, 3 directions, 2h for each, in non-operation.			
	Shock			980m/S^2 (100G), 6mS, 6 directions, 3 times for each, in non-operation.			
Isolation	Input - outpit			Product with case:DC1,000V or AC500V 1 minute, Cutoff current = 100mA (20±15℃)			
	Input - Case			Product with case:DC500V or AC500V 1 minute, Cutoff current = 10mA (20±15℃)			
	Output - Case			Product with case:DC500V or AC500V 1 minute, Cutoff current = 10mA (20±15℃)			
	Isoration Resistance			Product with case : Input-Output, Input-Case, Output-Case : DC500V 50MΩmin (20±15℃)			
	Input - outpit			Product without case:DC1,500V 1 minute, Cutoff current = 100mA (20±15℃)			
	Isoration Resistance			Product without case : Input-Output : DC500V 50MΩmin (20±15℃)			
Standards	Safety Standards			UL60950-1, CSA C22.2 No.60950-1(C-UL), EN60950-1(NEMKO)			
Mechanical	Weight (typ)		g	Product with case : 12 .5typ 15max , Product without case : 8typ 10max			
	Size (W×H×D)		mm	Product with case : DIP:38.4×6.8×29.6 , SMD:39.9×6.8×29.6			
				Product without case : DIP:37.9×5.0×27.6 , SMD:39.9×5.0×27.6			

Note: ”X” in model names is to be replaced by a symbol which represents the terminal configuration (F : DIP / R : SMD) and with or without the metal case (P : With case / H : Without case) for actual model names

Note: With nominal input voltage, maximum output current, and Ta=25℃, if not specified separately.

(*1) With nominal input voltage, maximum output current, and Ta=25℃

(*2) In 100MHz, Ta=25℃

SAFETY INSTRUCTIONS

Safety attention manual **Notes that use DC to DC converter**

Please be sure to read these instructions for safe design when using the product.
Improper use may pose the danger of smoke or fire.

⚠ Caution Notes

Storage

- Store the converter unit in the manner specified in the purchase specifications or catalog.
- Do not store the converter unit in a corrosive gas or corrosive dust environment.
- Do not store the converter unit in a strong electrical or magnetic field. It will cause damage.

Environment & Conditions of Use

- Do not operate the converter unit in a corrosive gas or corrosive dust environment.
- Operate the converter unit in the environment and under the conditions specified in the purchase specifications or catalog.
- Operate the input and output voltage, output current, etc. within the rated electrical specifications.
- This converter has no built-in over input voltage protection.
- A continuous over current condition may damage the converter.
- This DC to DC converter is not internally fused. To ensure safe operation and to receive each Safety Standards approvals, please install an external fuse (fast-blow type).
- Be sure to insulate the metal case bottom from surrounding components and trace pattern.
- Do not operate the converter unit in a strong electrical or magnetic field.
- If there is the possibility of surge voltages occurring, take surge voltage prevention countermeasures.
- Please do not touch the inside of the product because it could cause electric shock
- Please notes that do not enter the foreign object. because it could cause the breakdown, the ignition, and the electric shock.
- Do not change or modify the product , TDK will not be responsible for any damage due to modification.
- Do not remove or disassemble the case.
- The converter unit is not designed to be resistant to radiation. Do not use it in nuclear power controls medical equipment, etc.
- The converter unit is not designed to be resistant to radiation. Do not use it in nuclear power controls medical equipment, etc.
- Give due design consideration for safeguarding against personal injury, fire and other accidents.
- Give due design consideration for safeguarding against personal injury, fire and other accidents.
- The converter unit must be wired according to the measurement circuits given in the purchase specifications or catalog. Consult TDK concerning any other connection schemes to avoid possible damage.
- Do not inject reverse voltage or over voltage to the terminals from the outside because it could cause failure.

Notes

- The warranty period for this converter is five years, except for the following cases:
  - ∗ Malfunction or damage due to modification or incorrect operation.
  - ∗ Malfunction or damage due to transportation after the product has been delivered.
  - ∗ Malfunction or damage due to fire, earthquake, wind, flood, other natural disasters or abnormal voltages.
  - ∗ Malfunction or damage caused by other equipment connected to the product.
- Note that an extended storage (over 1 year) in a location of high temperature, humidity, or sudden temperature fluctuations may cause the solder connections to deteriorate.
- Do not apply any strong shock to the converter unit, such as dropping the product, etc. because it may cause damage to the terminal pins or to other parts.
