Note: Tolerances unless mentioned ± 0.1 mm. Unit = mm

2. Current limiting

A resistor should be used to limit current spikes that can be caused by voltage fluctuations. Otherwise damage could occur.

- 3. Storage
 - 3.1 Moisture proof bag should only be opened immediately prior to usage.
 - 3.2 Environment should be less than 30 and 60% RH when moisture proof bag is opened.
 - 3.3 After opening the package MSL Conditions stated on page 1 of this spec should not be exceeded.
 - 3.4 If the moisture sensitivity card indicates higher than acceptable moisture, the component should be baked at min. 60deg +/-5deg for 24 hours.
- 4. Iron Soldering

Hand soldering is not recommended for regular production. These guidelines are for rework only. Soldering iron tip should contact each terminal no more than 3 sec at 350 , using soldering iron with nominal power
