Note: The contact part numbers with "-6" are silver plated with 2.54 µm thickness.

* Strip Form contacts are used with Mini-Applicator and Loose-Piece contacts are with hand tools.

**Mini-Applicator is for use on Automachines. (See next page. Contact Technical Support for details.)

Application Tooling

Extraction Tool Part Number: 409158-1

Instruction Sheet 411-5774

- Used to extract contacts from wire type tab / receptacle housing.
(Take care when inserting tool as the lance section of D-5 is turned upside down to that of D-3.)
- With D-5 contacts only, it is possible to extract using a small-size slotted screwdriver.

• How to Use Extraction Tool

- 
- ① Insert Extraction Tool in the direction as shown, insert into the narrow lower section of Housing's reverse convex hole. (make sure that you are holding tool in proper position, top and bottom.)
- * Take care not to insert tool into contact section. If you've inserted by error, replace the contact with a new one before proceeding.

When Using D-5 Extraction Tool

- 
- ② The tip of Extraction Tool depresses housing lance, freeing contact.
- 
- ③ Contact can now be pulled out.

When Using Slotted Screwdriver

- 
- ② When you butt the tip of tool at lance section and depress it, contact is released.
- 
- ③ Contact can be pulled out.

AMP-3K/40 and AMP-5K/40 Terminating Machines

The AMP-3K/40 and AMP-5K/40 Terminators are designed for customers that require the increased output and quality of a semi-automatic machine at a competitive price. By incorporating the most commonly requested features as standard and offering a long list of optional equipment, these terminators offer flexibility to meet the specific needs of various applications at the lowest possible cost.

- 3,000 lb. [1361 kg] max. crimp force (AMP-3K/40)
- 5,000 lb. [2268 kg] max. crimp force (AMP-5K/40)
- Toolless removal of applicators and guards
- Jog capability
- Quiet, fast operation — 80/76 dBA and cycle time less than 0.400 seconds
- Accepts Heavy Duty Mini style applicators
- Wide range of optional equipment such as toolless precision crimp height adjust, batch counter, CQM capability and work light
- Order Catalog 1654856 for specifications and part numbers

Hand Tool

The crimping section incorporates Straight Action construction for improved reliability as with automachine.

Part No.:

See the preceding page.

Minimum order quantity: 1

Mini-Applicator

Part Number: Contact Technical Support

Minimum order quantity: 1

AMP-O-LECTRIC Model G Terminating Machine

The Model "G" Terminator is the most advanced design in the long-standing series of AMP-O-LECTRIC machines for terminating wire using reeled terminals and contacts. It features a reliable direct motor drive system. Its modular construction enables it to be used either as a bench-top unit, or in combination with fully-automatic lead-making equipment. For operator convenience, access to and lighting in the target area has been improved and the Crimp Quality Monitor (CQM) has been moved to eye level for bench-top use. The Model "G" is also quieter, plus improved guarding meets applicable European and domestic safety requirements.

- Quieter
- Improved guarding and lighting
- Toolless changeover of applicators
- Precision manual- or auto-adjust for crimp height
- Total and batch counter
- Accepts all existing Tyco Electronics miniature applicators, with minor modifications
- Reduced maintenance requirements
- Request Catalog 65828 for specifications and part numbers

Mini-Applicator

D-5300 Series (Wire-to-Panel and Wire-to-Wire)

D-5300 Series Reverse Mount Type

Reverse mount type allows Dynamic Series receptacle contact to be used on panel mount side.

The Dynamic D-5300 Series supports receptacle contact storage demand to conductor housing and such applications where safety standards are important. The receptacle contact satisfies the IP20 rating, which contributes to equipment safety. Plus, a new addition

to the lineup are long tab contacts so contact is made in advance when mating and retains current until completely unmated.

Also, because it uses the D-5000 Series high-current contacts, which have a good reputation in industry, it not only keeps costs for new equipment to a minimum, it also really helps to shorten initial evaluation times.

Material and Finish

Receptacle Contact — Copper alloy, gold plated or silver plated over nickel underplate

Tab Contact — Copper alloy, gold plated or silver plated over nickel underplate

Housing — Glass filled polyester (PBT), UL 94V-0

Performance Characteristics

*When connectors are used singly

Pitch — 400 mil (10.16mm)

Voltage Rating — 630 VAC

Current Rating —

#10: 30A; #12: 25A; #16: 16A

Contact Resistance — 2 mΩ max.

Dielectric Withstanding Voltage — 3,000 V (1 minute)

Operating Temperature — -55°C ~ +105°C

Panel Cutout

AMP Dynamic with HTS Connectors (Wire-to-Panel and Wire-to-Wire)

2800/3800 Series

This Series is a combination of the proven HTS series rectangular connectors and the popular Dynamic Series connector line.

Metal hoods and frames of HTS connectors, which offers many choices depending on sizes and mounting styles are employed. Sizes and number of positions can be selected to meet the appli-

cation needs. It is also suitable for high-current applications.

Sequential terminals are available to enable termination with automatic crimping machines. Termination time can be substantially reduced.

Approximately 30% higher density mounting is possible compared to the high density HTS connectors.

Dyna-Tap Connectors (Wire-to-Panel and Wire-to-Wire)

Product Facts

- As many Dyna-Tap Connectors will be fixed on casings where dust protection will be needed, dust covers are incorporated into the design. With the dust cover, this connector can be applied in various environments

Many pieces of FA equipment are produced by assembling sub-units with divided functions in the final assembly line. Power for each sub-unit of conventional equipment is branched from the power supply bus line over a printed circuit board. In order to save valuable printed circuit board space, Tyco Electronics has developed Dyna-Tap Connectors from which power can be tapped without printed circuits.

Dyna-Tap Connectors are a part of Dynamic Series, which are developed as power supply connectors. Dyna-Tap Connectors are optimized for branching power from the power supply bus line.

In order to cope with three power systems, which are the most popular in the industry, 6-position connectors are specified.

Product Lineup

Free-hanging type and panel mount type are available. The part number of the mating connector is 1-178288-6.

Applications

- Power taps in elevator towers
- Power taps for power protective relays
- Power taps among sub-units of semiconductor producing equipment
- Power supplies for equipment on production lines

Performance Characteristics

Voltage Rating — 250 VAC

Current Rating — 8A (18-position, with AWG#14)

Position — 6 pos. x 3 = 18 pos.

Durability — 500 cycles

Mating Dimensions

Tab Housings (18-Position)

Free-Hanging Type Part Number 1376807-1

Panel Mount Type Part Number 1376807-2

Panel Cutout
When mounting panel from the front, apply clamping torque of less than 49N [11 lbf].

Mating Receptacle Housing (6-Position)

Part Number 1-178288-6

Caution:

Dynamic Series contacts are available either with gold plating or tin plating. However, Dyna-Tap Contacts are only available with 0.38 µm thick gold plating. Mating gold plated contacts with tin plated contacts will cause electrolytic corrosion. Therefore, please choose gold plated contacts for the mating Dyna-Tap Connectors.

Dyna-Tap Connectors (Wire-to-Panel and Wire-to-Wire) (Continued)

D-3000 Series

D-3200 Series Dyna-Tap 24P (4P x 6 Row)

D-3200 4P common series are lined up in six rows.

Issues about branching maintenance and cost are handled with connectors.

The Dynamic Series power supply tap is known for its superior contact reliability. Compared to a terminal block it is possible to reduce installation and maintenance costs. Also, because the circuits are electronically commoned, circuit board and connector do not need to be mounted. This leads to reductions in number of components and man hours as well as an overall decrease in costs.

Material and Finish

Receptacle Contact — Copper alloy, plated gold or tin over nickel underplate

D-3 Contact — Copper alloy, plated gold or tin over nickel underplate

Tab Post — Copper alloy, plated 0.38 μm gold or 2.0 μm tin over 1.3 μm nickel underplate

Housing — Glass filled polyester (PBT), UL 94V-0

Performance Characteristics*

Pitch — 200 mil (5.08 mm)

Voltage Rating — 600 VAC

Current Rating —
24-position: 10 A Max.

Contact Resistance — 10 m Ω Max.

Dielectric Withstanding Voltage —
2,200 VAC (1 minute)

Operating Temperature —
-55°C ~ +105°C

*When connectors are used singly.

Dyna-Clamp Kit (Wire-to-Board, Wire-to-Panel and Wire-to-Wire)

Most connectors mounted outside of many pieces of FA equipment are made of metal because of their robustness. Connectors made of metal have a very high performance level.

However, connectors made of metal are more costly than connectors made of plastics.

Tyco Electronics has added a cable clamp function to the existing Dynamic Series. With this new design, the robustness of Dynamic Series connectors made of plastic has been improved remarkably.

This lower cost connector can contribute to the total cost reduction of end products.

Applications

- Power supply I/Os among sub-units of semiconductor producing equipment
- Power supply I/Os for control panels
- Power supply I/Os for power control panels
- Power supply I/Os for robots

Product Lineup

This 3-position connector was developed from the Dynamic Connector 5200 as its basis to realize low-cost 30 A class power distribution for FA equipment. The existing contacts can be used, which means the existing production method such as crimping tools or automatic machines can be utilized without any change.

Support for Obtaining UL, TÜV Approvals

It is more favorable to obtain UL and TÜV approvals with this connector than with metal connectors because of the following reasons:

Made of Plastic

Because of the plastic connector, ground wire at power supply is not necessary. This simplifies wirings of FA equipment and leads to lowering the total cost.

Sequential Structure

A sequential structure is designed so that the ground wire is always electrically connected before power lines.

Performance Characteristics

Voltage Rating — 6300 VAC

Current Rating — 30 A

Position — 3 pos.

Durability —

With 0.38 μ m contact: 50 cycles

With 0.76 μ m contact: 100 cycles

Ground

The ground mark is embossed on the connector housing so that operators can see it.
