

It is easy to lose sight of scale when you've spent hours working on a PCB layout blown up on a screen. Keep a compact reality check handy with this ruler that tells you so much more than linear distance.

## Features:

- 1" high by 6" long ruler made of standard 0.062" thick FR4 PCB material with black soldermask
- Markings every 0.1" on Imperial side and 0.1cm on Metric side
- Common package footprints, including SMA, SOT89, BGAs, SOT23, TSSOP, and SOIC8
- Trace width diagram from 6mil to 40mil
- AWG drill holes for sizing drills and wires
- Handy diagrams for transistors and diodes
- Weight: 12.07g
